

The City of Phoenix has contracted with Kiewit Corporation and Achen Gardner Construction to install the Drought Pipeline Project between a future booster pump station near 22nd Street and Maryland Avenue to 20th Street and Orangewood Avenue.

## Current Construction Activities:

- Construction of the 66" pipeline is currently in the Myrtle Wash. The pipeline will head north through the Myrtle Wash to 20th Street & Northview Avenue and continue to Orangewood Avenue. This area of construction is estimated to be complete near the end of 2021.
- 20th Street from Northview Avenue to Orangewood Avenue will be restricted to local access only, with no through traffic.
- Water service interruptions are not expected.

## Drought Pipeline Project:

Phoenix Water is building new pipelines and pump stations to ensure all customers will have access to safe, clean and reliable drinking water for generations to come. With shortages looming on the Colorado River, these improvements will provide a way to move water supplies to those areas at risk for shortage.

- Working hours will primarily be 6:00 AM to 4:00 PM, Monday through Saturday. Some construction may require night or Sunday work.
- Business, residential and pedestrian access will be maintained.
- No on-street parking will be allowed in the construction area.

Construction schedules are subject to change for a variety of reasons, including weather and personnel/material availability. The City of Phoenix and its contractors recognize the inconvenience of construction and we thank you for your patience and support!
