*Index Rate equals crimes per 100,000 persons.
Source: Phoenix Police Uniform Crime Report.

Total property crimes include burglary, larceny-theft, motor vehicle theft, and arson. Uniform Crime Reporting counts should not be compared with Arizona Revised Statute numbers. UCR data excludes unfounded cases. Clearances are not always counted in the month of the incident. Population figures are provided by the City of Phoenix Planning Department and are based on the Maricopa Association of Governments, Draft 3 Population & Unemployment Data, April 2003. These population numbers are projections based on the Municipal Planning Area (MPA) rather than the actual incorporated limits of the city, due to the changing nature of city boundaries. Prior to 2003, population was only reported based on the MPA. All population values are based on the projections that were available at the time the information was initially collected. Prior year projections have not been updated. The corporate limits population estimate as of September 30, 2008 was 1,563,218.
