

Better Access, Better Service

The City of Phoenix Water Department is preparing to improve water system reliability to the downtown area by installing a new 30-inch water transmission main in the area shown on the map below.

Through this project, two of the primary water transmission lines for the City of Phoenix water supply system will be connected together. The system improvements will result in improved system reliability, and flexibility.

Schedule

September 2009 – March 2010

Affected Water Services

Some water services will require replacement in conjunction with this project. Project staff will coordinate with the affected property owners to ensure a timely shut down and restoration of water services.

Project Map

Traffic/Parking Restrictions

During certain phases of construction activities there will be traffic restrictions along the project alignment. Restrictions within major roadways such as Jefferson Street, Washington Street, and 7th Avenue will be limited to off peak traffic hours to the extent possible. Please also be aware that parking restrictions will also be required during certain phases of the project.

Working together for Better Service

Thank you for your patience during this project. We are committed to working together with the community during construction and will do our best to minimize disruptions.

Project Personnel

Syd Anderson P.E. Engineering Supervisor
Tony Humphrey P.E. Construction Engineer
