

Lithium-Ion Battery Fire Investigations

June 2026

Year to date, there have been 30 fires investigated, where a lithium-ion battery was found in the area of origin. Micro Mobility make up the highest number of incidents year-to-date.

Type of Device Powered

Name of Product:
Super Off-Road Solar Power Bank

Hazard:
The solar power bank's lithium-ion battery can swell and overheat, posing a burn hazard to consumers

Remedy:
Consumers should immediately stop using

Recall Date:
June 25, 2026

Units:
About 7,400

U.S. Consumer Product Safety Commission

Structure Type

FIRES AND EMERGENCIES

If a battery overheats or you notice an odor, change in shape/color, leaking, or odd noises from a device, stop using immediately. If safe to do so, move the device away from anything that can catch fire and call 911.

Lithium-Ion batteries are known to unexpectedly re-ignite minutes, hours, and even days after all visible fire has been put out.

If you observe a lithium-ion battery fire, leave the area, CLOSE the door, and call 911 immediately.

Water and fire extinguishers do not work on lithium-ion battery fires.
