

# Lithium-Ion Battery Fire Investigations

## May 2026

Year to date, there have been 23 fires investigated, where a lithium-ion battery was found in the area of origin. Micro Mobility make up the highest number of incidents year-to-date.

### Type of Device Powered

#### Name of Product:

Wyze Labs – Solar Cam Pan Security Cameras

#### Hazard:

The recalled Wyze Solar Cam Pan security cameras' incorrect assembly instructions can lead consumers to accidentally puncture the lithium-ion battery's metal casing, causing the battery to rapidly overheat, posing a risk of serious injury or property damage from fire and burn hazards

#### Remedy:

Consumers should immediately stop using

#### Recall Date:

June 4, 2026

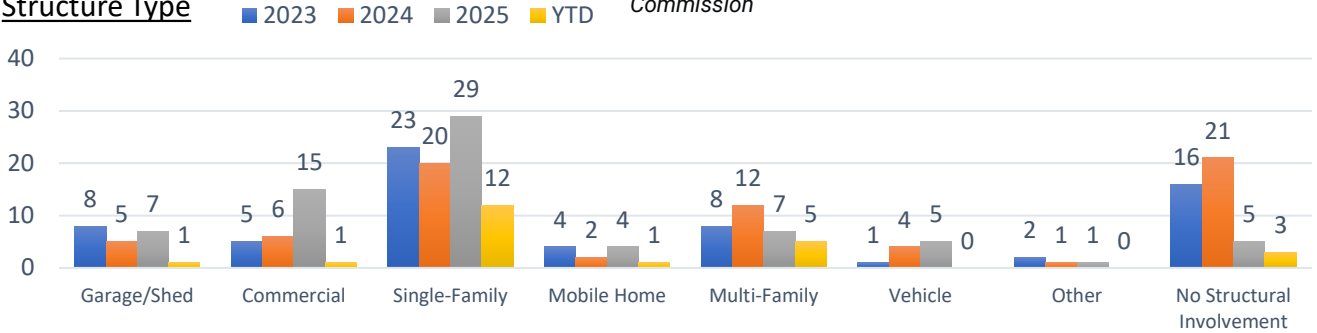

#### Units:

About 321,360

U.S. Consumer Product Safety Commission

### Structure Type

## FIRES AND EMERGENCIES

If a battery overheats or you notice an odor, change in shape/color, leaking, or odd noises from a device, stop using immediately. If safe to do so, move the device away from anything that can catch fire and call 911.

Lithium-Ion batteries are known to unexpectedly re-ignite minutes, hours, and even days after all visible fire has been put out.

If you observe a lithium-ion battery fire, leave the area, CLOSE the door, and call 911 immediately.

Water and fire extinguishers do not work on lithium-ion battery fires.
