

# Lithium-Ion Battery Fire Investigations

## September 2025

Year to date, there have been 62 fires investigated, where a lithium-ion battery was found in the area of origin. Portable Electronics and Power Tools make up the highest number of incidents year-to-date.

### Type of Device Powered

■ 2023 ■ 2024 ■ YTD

### Consumer Product Recalls

#### Name of Product:

Anker Power Banks

#### Hazard:

The lithium-ion battery in power bank can overheat, posing fire and burn hazards

#### Remedy:

Stop using immediately and contact Anker

#### Recall Date:

September 18, 2025

#### Units:

About 481,000

U.S. Consumer Product Safety Commission

### Structure Type

■ 2023 ■ 2024 ■ YTD

## FIRES AND EMERGENCIES

If a battery overheats or you notice an odor, change in shape/color, leaking, or odd noises from a device, stop using immediately. If safe to do so, move the device away from anything that can catch fire and call 911.

Lithium-Ion batteries are known to unexpectedly re-ignite minutes, hours, and even days after all visible fire has been put out.

If you observe a lithium-ion battery fire, leave the area, CLOSE the door, and call 911 immediately.

Water and fire extinguishers do not work on lithium-ion battery fires.
