## Required Community Support and Outreach Documentation

The Parklet Application requires documented support by the local neighborhood. This Application must include a petition with signatures of support from any immediate adjacent property owner(s) on the same side of the street and 51% of the remaining property owners on the block. View [Parklet Location Petition](#).

## General Design Guidelines

Design for easy removal. The parklet will sit on top of the existing street surface. Because the parklet may cover critical infrastructure and utilities such as gas lines, sewer and water mains, they need to be designed for easy removal in case of an emergency. Parklets cannot block storm drains or catch basins.

No advertising is allowed on the surface or walls of the parklet. If the parklet is designed for PRIVATE use, the name of the sponsoring establishment may be placed on one wall or other feature of the parklet as approved on the construction plans.

Be creative. Think outside the standard tables and chairs on a platform. Include artistic and shade elements to enliven the streetscape.

See website for required design elements like safety features and structural load capacity. View [Parklet Program Policy](#).

## Design Document Requirements

Minimum 11 X 17 scaled and dimensioned drawings. Site plan must show dimensioned Parklet with right-of-way lines, dimensions to monument lines, property lines, and other physical references, such as sidewalks or curbs. Lettering size must be a minimum of 11point font.

## Liability Insurance Requirements

Encroachments permitted in the right-of-way must be covered by liability insurance. A certificate must accompany this application and thereafter be posted with the City each time the policy renews, is replaced, dropped, or on the date indicated on the certificate for renewal. The applicant is responsible for maintaining a current policy and submitting the updated policy on an annual basis to the City. Liability insurance in the amount of \$300,000 for residential and \$2,000,000 for commercial applicants is required and the City of Phoenix is to be named as an additional insured on applicant's insurance policy. The applicant will be required to hold harmless the City of Phoenix.

## Maintenance Requirements

The parklet will be owned and maintained by the applicant. The applicant is responsible for all costs associated with the design development, construction, installation, maintenance, and removal of the parklet. Applicant is required to sign an encroachment permit that outlines their responsibilities, including the requirement to keep the parklet free of debris, grime, and graffiti, and to keep all plants in good health. The permit obligates the applicant to ensure the parklet is swept daily and debris is removed from under and around the parklet a minimum of once per week.

## All Required Submissions for Parklet Application

For more information visit our website [Parklet Program](#).

- ☐ Site plan showing Parklet footprint in relation to surrounding streetscape context
- ☐ Dimensioned Parklet plan with construction details
- ☐ Design elevations with dimensions
- ☐ Community Support Petition with Signatures
- ☐ Certificate of Insurance
- ☐ Written document describing hours of operation and proposed furniture, fixtures, and storage plans for parklet

---

A completed Parklet Location Petition must be submitted with every Parklet Application.

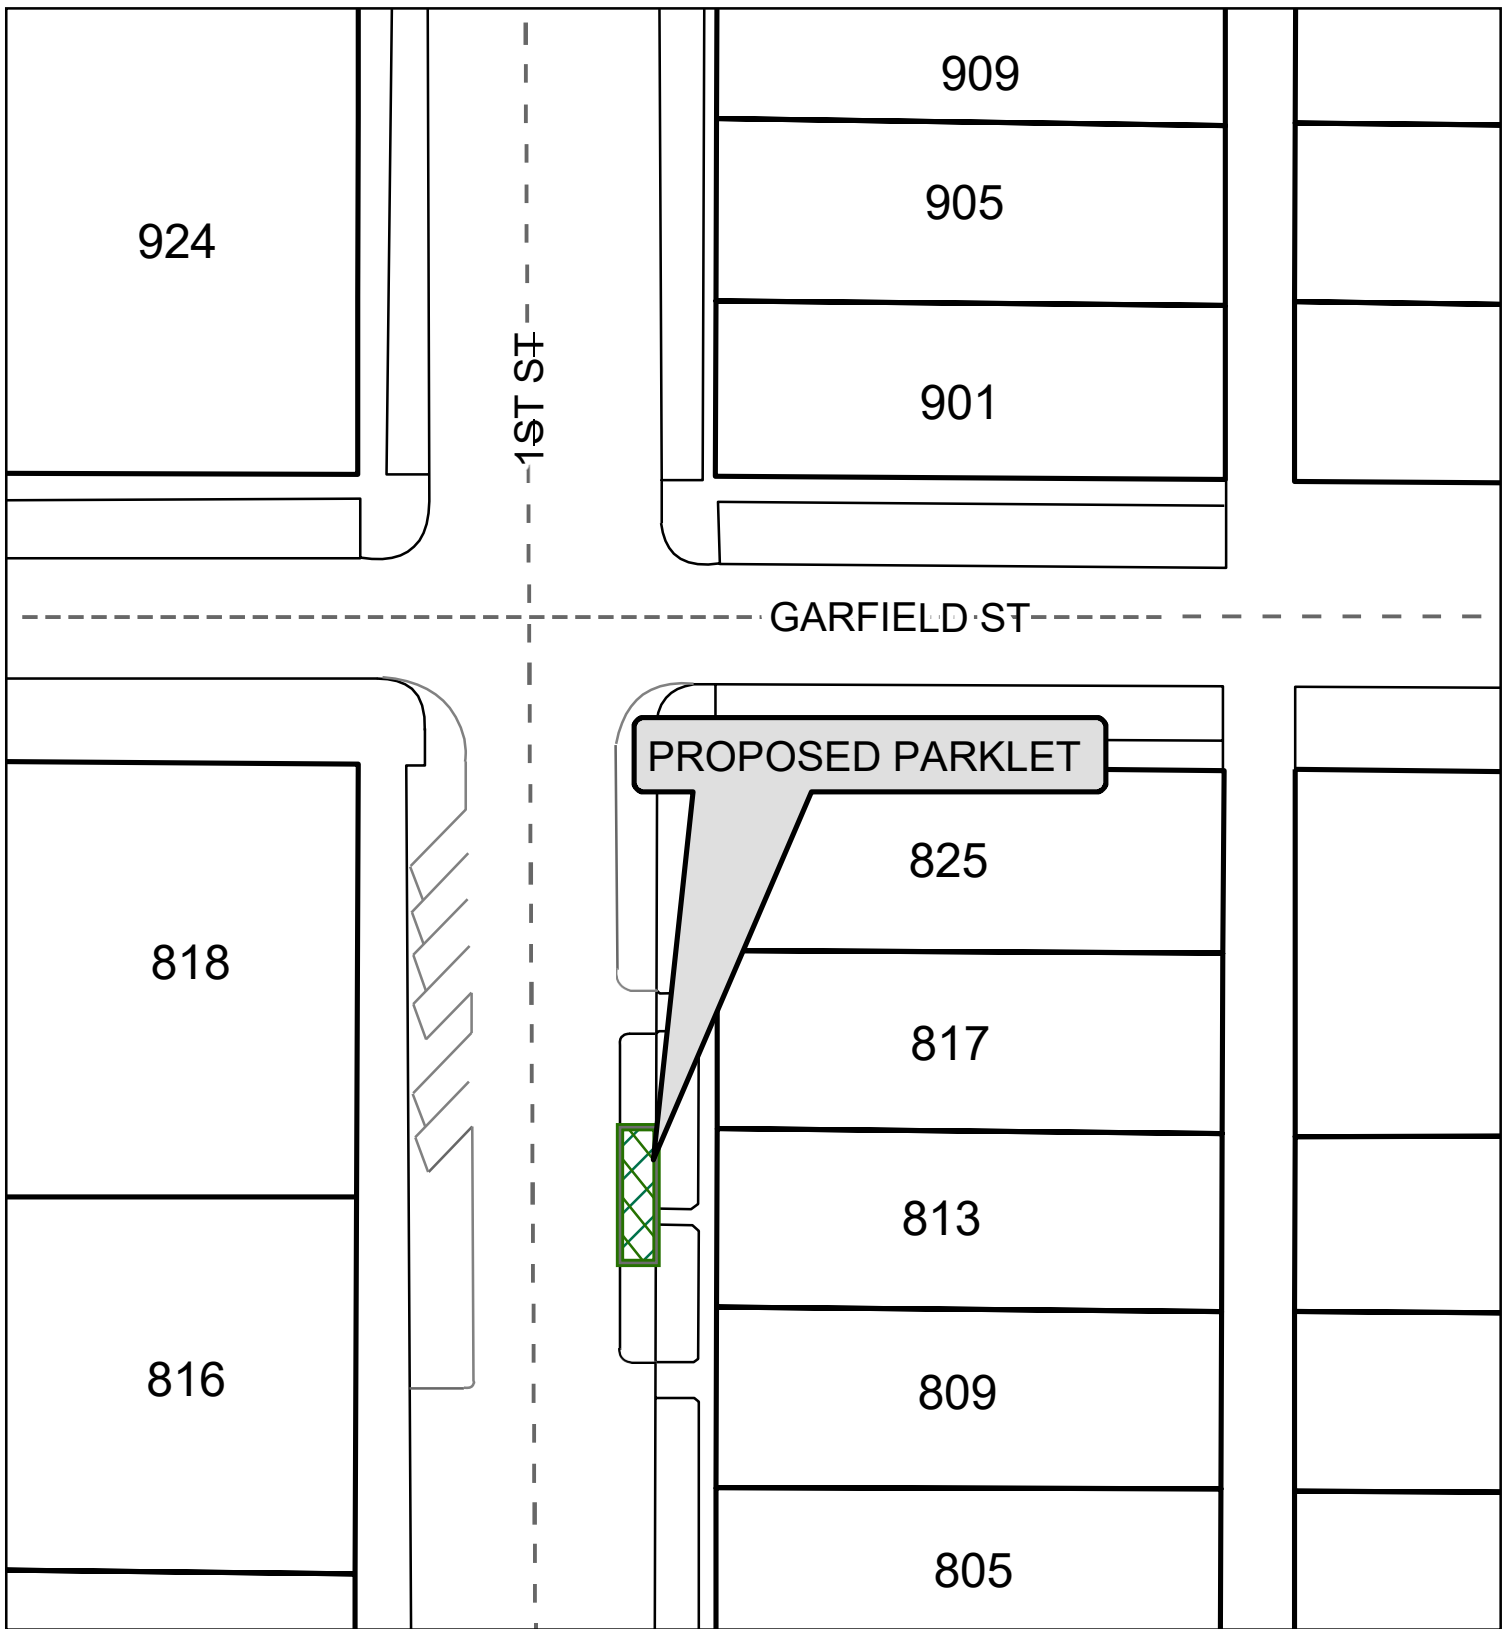

Parklet Applicants are required to obtain support from all adjacent property owners and other property owners on the block. Applicant must circulate a petition and obtain signatures of support from any owner(s) of property which Parklet will front, any immediate adjacent property owners on the same side of the street, and 51% of the remaining property owners on the block.

Proposed Parklet Location: \_\_\_\_\_

Attach map showing entire block with all property addresses and indicate supportive property owners (for examples, see: [https://www.phoenix.gov/pddsite/Documents/TRT/dsd\\_trt\\_pdf\\_00890.pdf](https://www.phoenix.gov/pddsite/Documents/TRT/dsd_trt_pdf_00890.pdf)).
