

Growing Together  
This Spring!

#5 | Mar 2026

# Teen Volunteer Program Monthly Newsletter

## March Highlights

This month our teen volunteers learned how to make buttons to hand out to guests who solve the Cypher Puzzle. Designed by teens and staff, these new buttons have been incredibly popular and have helped draw even more guests to our existing activities. Tabletop Archaeology has continued to grow as well, with staff and teen volunteers working together to refine this accessible activity. Finally, our Teen Leaders have done an exceptional job supporting and mentoring new volunteers throughout the month.

## Ancient Technology Day

On March 14th, teen volunteers were on-site for Ancient Technology Day to facilitate the Detective Archaeology and Cypher Puzzle activities exclusively. Around 15 guests engaged with the activities throughout the day with many families gravitating towards the activities with genuine enthusiasm. The food, vendors, and the focus on historic and prehistoric technology created an incredible atmosphere. Overall, it was a fun, engaging, and highly eventful day.
