

Neighborhood Notification: Bicycle Improvements on Mayo Boulevard from Tatum Boulevard to 56th Street

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: Mayo Boulevard from Tatum Boulevard to 56th Street

What: Where there is enough space on the roadway, bike lanes will be added. The number of travel lanes will remain the same, including turning lanes. The project does not remove or add parking.

When: Pavement maintenance (new asphalt) is planned for Spring 2026 and traffic lane improvements will happen shortly after.

Why: Bike lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. The slight narrowing of the lane widths to accommodate the bike lanes will help to guide cars and deter speeding.

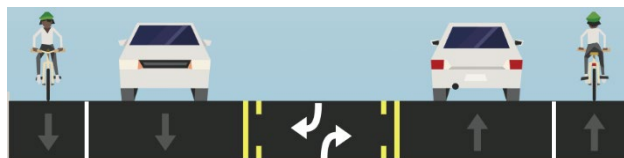

What will the Project Look Like?

CURRENT Travel Lanes on Mayo Boulevard from Tatum Boulevard to 56th Street

(Typical Cross Section)

PROPOSED Travel Lanes on Mayo Boulevard from Tatum Boulevard to 56th Street

(Typical Cross Section – existing turning lanes will be preserved)
