

STREAMLINING BUSINESS SERVICES

Regulatory Relief: expanded adaptive re-use policies that make it easier to open a new business in an existing building; expanded International Existing Buildings ordinances that makes it easier for residents and businesses to remodel at their locations.

Alternative Certification: allows business owners to have plans approved by specially certified engineers and architects. This allows city to staff more efficiently and will make construction faster and more predictable.

Permit Extension: permits will be allowed to cover a longer planning and construction time period.

Business Coordinating Committee: top level managers in various departments that deal with building and approvals will meet regularly to discuss problems and opportunities that arise so improvement in the system continues.

To contact Councilman Sal DiCiccio with any questions, comments, or concerns please call 602-262-7491 or email Council.District.6@phoenix.gov.
