REQUEST FOR QUALIFICATIONS

LIFT STATION 40 REFURBISHMENT DESIGN SERVICES

PROJECT NO. WS90400085-1

The City of Phoenix (City) is seeking a qualified consultant to provide engineering design services with possible the Construction Administration and Inspection (CA&I) for the development of rehabilitation improvements for Lift Station 40 located just north of Ray Road, between I-10 and the east bound off ramp. Design phase services for this project are funded in Fiscal Year (FY) 2017/18 with construction in FY 2019/20. The construction cost for the project is anticipated to be in the range of $4.5 Million to $5 Million.

SECTION I – PROJECT DESCRIPTION-

Lift Station 40 is a wet pit/dry pit facility that conveys wastewater via force main further north approximately 3.1 miles to a gravity sewer at Guadalupe Road east of 48th Street. The current lift station firm capacity is approximately 13 MGD. Currently, the installed four sewage pumps cannot be operated at full speed due to inadequate net positive suction head available (NPSHA) and are in need of replacement due to age. In addition, the wet well does not provide adequate storage capacity and/or operational flexibility and flows often back-up into influent gravity sewer. The City recently completed a hydraulic and process control study (Lift Station 40 Study and Analysis) which recommended several alternatives including construction of a new wet well with adequate storage volume. The proposed refurbishment project includes design of a new wet well and above grade discharge piping connecting the force main, rehabilitation or replacement of pumps and associated appurtenances, influent gravity sewer relocation, and miscellaneous site improvements, including drainage.

The City will be selecting a Construction Manager at Risk (CMAR) for this project under a separate advertisement. The selected CMAR will work as a team with the design professional and City staff to ensure an efficient and consistent design approach for this project.

The Lift Station Number 40 Study and Analysis Report, Project No. WS90700032-1, December 2016, is available for review on the 8th Floor of Phoenix City Hall, 200 W. Washington Street prior to RFQ submittal by appointment. Photographs or scanning of these documents is strictly prohibited. Consultants must contact 8th floor to make an appointment for this review.

SECTION II – SCOPE OF WORK

The design scope for this project will include, but is not limited to:

- Data collection and assessment, including geotechnical and soil corrosivity investigation and coordination with City’s Asset Management team.
- Design services for civil, mechanical, structural, architectural, electrical and I&C for the refurbishment project which includes preliminary and final basis of design report, 30%, 60%, 90% and final construction design plans and specifications for obtaining necessary permits.

The Construction Administration and Inspection services scope for this project includes, but is not limited to:

- Assist the City in obtaining permits and approvals for the work.
- Provide oversight of the project construction activities to ensure protection against defects and deficiencies in the work of contractors, their subcontractors and sub consultants.

- Inspect the site through various stages of construction to inspect the quality of the executed work and to verify the work is in accordance with construction documents and specifications.

- Confirm contractors' work progress and qualities of work completed.

- Review contractor cost proposals, submittals, shop drawings, requests for information (RFIs), payment applications, change orders, etc., as directed by the City.

- Perform field inspections (visual, probe, and testing) where required for completed repairs and reject work not conforming to project documents and specifications.

- Provide weekly field reports with associated photos/videos of observations and tests performed.

- Attend and/or conduct project-related construction progress meetings.

- Prepare punch list of corrective work to be performed by the contractor and any subsequent re-inspection.

- Review contractor as-builts, including documentation of the size, locations, and orientation of repairs, and facilitate the delivery of the final record drawings to the City.

- Track, compile, and categorize all project related documents, including inspection reports, progress photos, important project correspondence, meeting minutes, RFIs, Submittals, etc., on a flash drive or CD, following completion of the project, and deliver to the City Project Manager.

- Provide data from construction to update Computerized Maintenance Management System per direction of City's Water Asset Management Team.
