Scope:
This regulation limits the height of fuel tanks to be installed in the City of Phoenix. The Phoenix Fire Department has the proper equipment to fight a fire in a fuel tank that is a maximum of 70 feet high.

Code Reference:
5704.2.7 Design, construction and general installation requirement for tanks.
The design, fabrication and construction of tanks shall comply with NFPA 30. Each tank shall bear a permanent nameplate or marking indicating the standard used as the basis of design.

Regulation:
Tanks shall not be allowed to be installed inside the City of Phoenix limits when their height exceeds 66 feet (20117 mm) measured from the lowest level of the fire department access road.
