Appendix I	Additional Information Relating to Community Surveys
Appendix J	Additional Information Relating to the Health Profile
Appendix K	Maps

## Executive Summary

In accordance with federal Head Start and Community Services Block Grant requirements, the City of Phoenix Human Services Department (HSD) has undertaken a community assessment with the broad purpose of documenting the characteristics and needs of individuals and families served by its programs. This report summarizes the results of the assessment.

As one of the nation's largest cities in terms of both physical size and population, Phoenix is home to a diverse population. The characteristics of the City's population, particularly the demographics of those who are eligible for or receive HSD services, are a significant focus of the assessment. A few demographic realities and the associated considerations for HSD are especially noteworthy.

Most relevantly, nearly one-in-four Phoenix residents live in poverty, with even higher concentrations in neighborhoods in the southern and western portions of the City. Poverty rates are comparatively higher among children, Hispanic and Black residents, non-citizens, individuals who have not completed high school, and households headed by unmarried women. The services provided by HSD are critical to assisting these individuals and families to achieve self-sufficiency.

The median age of Phoenix residents is 32.9 years, significantly less than the state and national medians. Given that children and young adults are more likely to live in poverty than older adults, the youth of the City's residents has important implications for HSD. In fact, more than 35 percent of Phoenix children under the age of five years live in poverty. The services offered by HSD are often critical in helping the families raising these children make ends meet. Additionally, for a variety of reasons – parents working long hours, few books in the home, lack of access to quality child care – children from homes in poverty often start school at a disadvantage. Programs such as Early Head Start and Head Start are critical to bridging these gaps.

At the other end of the age spectrum, Phoenix is home to more than 200,000 residents over 60 years of age. These individuals are much less likely to live in poverty, with a 10.5 percent poverty rate among this group. However, many of these individuals have other needs, including the 57,000 seniors who live alone and the more than 40,000 households in which a grandchild is living with a grandparent, including 15,000 grandparents who are financially responsible for their grandchild. The senior centers operated by HSD offer a number of important supports, including meal programs and socialization opportunities.

The growth in the Hispanic population is another significant demographic trend. Phoenix became a majority-minority City over the past decade as the number of individuals of Hispanic descent increased 31 percent between 2000 and 2010. The Hispanic population is also much younger, on average. More than 60 percent of children in Phoenix schools are Hispanic. Phoenix residents of Hispanic descent are more likely than other racial groups to be living in poverty. Additionally, a sizeable number of Hispanic households struggle with English, which must be considered when planning services.

The City – like the State and country – continues to recover from the Great Recession. Employment has nearly recovered and sizeable gains have been made in the housing sector. However, recovery has been uneven and more than 350,000 Phoenixians live below the poverty line. Due to budgetary challenges at all levels of government, investments in many programs that provide assistance to these individuals and families have remained flat or been reduced.

Services available from the federal, State, and City governments generally reach only a fraction of those who could benefit. For example, more than 27,000 residents received services from HSD's family services centers, but this is less than 10 percent of the number of residents living in poverty. Similarly, the City's 3,090 Head start slots amount to only about 25 percent of the estimated number of low-income three-to-four year-olds living in the service area while Early Head Start slots are equal to than four percent of eligible infants and toddlers.

Those who do receive HSD services are generally very satisfied with them. More than 2,500 clients completed a survey in which they were asked to rank their satisfaction with the services they receive using a five-point scale (with five being extremely satisfied). Average scores for Early Head Start, Head Start, family services centers, senior centers, and volunteer income tax assistance programs exceeded 4.00. Scores were lower, but still positive for the Watkins Emergency Shelter and the Family Advocacy Center.

In the survey, clients were also asked to indicate what services that they do not currently receive would be most helpful to them and their families. The most frequently cited services include dental care, English instruction, full-day Head Start, and housing assistance (rent/mortgage assistance, as well as home repair and utility assistance).

HSD partners were also asked to respond to a separate survey. They expressed similarly positive impressions of the Department's programs, lauding staff and leadership in particular. They also cited HSD's intra- and inter-city collaborations as a source of strength. The partners also offered a number of suggestions for further improvement, covering both operational and programmatic areas.

The suggestions from HSD clients and partners – coupled with the analyses and research summarized in this report – offer a number of guideposts to the Department as it plans its services over the coming years.

## Introduction

The City of Phoenix's Human Services Department (HSD) provides a comprehensive array of services to help City residents meet emergency, short-term, and long-term needs and to reach their highest level of self-sufficiency. Programs include early childhood education, emergency assistance, older adult services, crime victim services, homeless services, and community- and faith-based initiatives.

Some of these programs are funded, at least in part, by federal funds, including Head Start grant dollars and the Community Services Block Grant (CSBG). Both of these grants require grantees to conduct periodic community assessments.

Specifically, federal Head Start regulations require grantees to conduct assessments that include:

- (1) The demographic make-up of Head Start eligible children and families, including their estimated number, geographic location, and racial and ethnic composition;
- (2) Other child development and child care programs that are serving Head Start eligible children, including publicly funded State and local preschool programs, and the approximate number of Head Start eligible children served by each;
- (3) The estimated number of children with disabilities four years old or younger, including types of disabilities and relevant services and resources provided to these children by community agencies;
- (4) Data regarding the education, health, nutrition and social service needs of Head Start eligible children and their families;
- (5) The education, health, nutrition and social service needs of Head Start eligible children and their families as defined by families of Head Start eligible children and by institutions in the community that serve young children;
- (6) Resources in the community that could be used to address the needs of Head Start eligible children and their families, including assessments of their availability and accessibility.<sup>1</sup>

The regulation further requires that Head Start grantees use this information to help determine program objectives, services, recruitment areas, and priorities.

The law establishing the Community Services Block Grant requires (*emphasis added*):

an assurance that the State will secure from each eligible entity in the State, as a condition to receipt of funding by the entity through a community services block grant made under this chapter for a program, *a community action plan* (which shall be submitted to the Secretary, at the request of the Secretary, with the State plan) *that includes a community-needs assessment for the community served*, which may be coordinated with community-needs assessments conducted for other programs;<sup>2</sup>

---

<sup>1</sup> 45 Code of Federal Regulations § 1305.3(c)

<sup>2</sup> 42 United States Code § 9908(b)(11)

Subsequent federal guidance requires assessments to be conducted every three years, the collection of current data related to poverty, and the compilation of information collected directly from low-income individuals.<sup>3</sup> The assessment is expected to support agencies' work to further the program's six national goals:

Goal 1: Low-income people become more self-sufficient.

Goal 2: The conditions in which low-income people live are improved.

Goal 3: Low-income people own a stake in their community.

Goal 4: Partnerships among supporters and providers of service to low-income people are achieved.

Goal 5: Agencies increase their capacity to achieve results.

Goal 6: Low-income people, especially vulnerable populations, achieve their potential by strengthening family and other supportive systems.

This assessment has been conducted to comply with the above conditions. In addition to meeting federal requirements, undertaking a regular assessment of the community affords HSD the opportunity to understand the needs of the individuals and families it serves, to identify the strengths of its programs as well as potential gaps, and to support strategic planning and allocation of resources.

## Data Sources and Methodologies

A variety of data sources have been incorporated in the assessment including:

- Census data
- Service data from federal, State, and City agencies
- Surveys of HSD service recipients and partners
- Secondary research to identify other relevant information

In order to compile the most current demographic data, this report relies on the Census Bureau's five-year American Community Survey (ACS) estimates for the period of 2010 through 2014, unless otherwise noted. The ACS is an ongoing survey that collects information from approximately one percent of American households each year and uses this sample to develop full-population estimates. The five-year ACS data produced a Phoenix population estimate of 1,511,330, which is about 1.7 percent less than the Census Bureau's official 2014 estimate of 1,537,058. Detailed information regarding the ACS tables used and methodologies employed is provided in Appendix A.

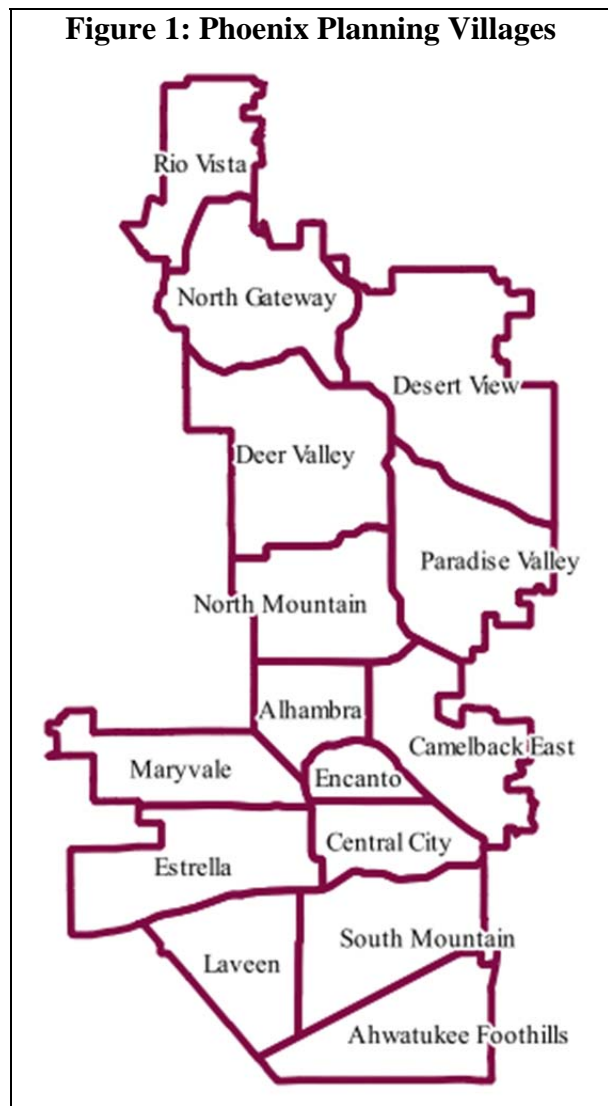

---

<sup>3</sup> U.S. Department of Health and Human Services, Administration for Children and Families, "States Establishment of Organizational Standards for CSBG Eligible Entities under 678B of the CSBG Act, 42 U.S.C. § 9914" (Information Memorandum Transmittal No. 138). January 26, 2015.

Phoenix is a large and diverse city. Data is therefore presented in terms of individual areas of the City whenever possible. Specifically, this assessment relies on the City's 15 planning villages to summarize data available at either the census tract or zip code level. Figure 1 illustrates the village boundaries and Appendix A includes discussion of the methodology used to apportion data across the villages. Additionally, data relevant to the Early Head Start and Head Start programs is presented according to the programs' specific service areas.

In order to provide a thorough overview of the public assistance programs available to low-income individuals and families and of how demand for these programs has changed in recent years, the assessment gathered enrollment data from a number of government agencies, including:

- City of Phoenix's Human Services and Housing Departments
- Arizona Departments of Child Safety (DCS), Economic Security (DES), Education (ADE), and Health Services (DHS), and the Arizona Early Childhood Development and Health Board (First Things First)
- Federal Social Security Administration and Department of Housing and Urban Development

A key source of data for this assessment was a community survey of HSD clients and partners conducted in January and February 2016. The survey sought to gauge respondents' opinions regarding their communities' strengths and challenges, the types of services they need and use, and their satisfaction with HSD services. The survey was made available online in English and Spanish and at Head Start delegate agency sites, senior centers, and family services centers. A separate online survey was emailed to a sample of HSD partners, including providers, advocates, and HSD Commission members.

A combined 2,246 client surveys (2,021 English and 225 Spanish) were completed. Of these, 204 indicated they participated in Early Head Start services within the past year, 631 received Head Start services, 268 attended a senior center, 65 utilized a Family Service Center, 54 received services from the Watkins Homeless Shelter, 20 used a family advocacy center, and 70 received volunteer income tax assistance (VITA). Respondents may have used multiple

services, making this a duplicated count. Additionally, 1,171 respondents did not report receiving any services. A total of 306 partner surveys were received. Copies of the English surveys and detailed tabulations of survey responses are included in Appendix I.

## Assessment Overview

This assessment is comprised of four Parts:

- Part I includes a general overview of the City, with sections devoted to the demographics of the City's residents, health, education, economy, housing, public safety, and community resources
- Part II provides information regarding the populations served by the Human Services Department and the various City and State services available to these groups
- Part III concludes the assessment with a brief overview of the results of surveys of HSD clients and partners regarding the strengths and needs of the City's neighborhoods and opportunities for HSD to help meet these needs

There are also 11 appendices that provide the detailed analyses developed to compile this assessment for readers interested in additional data.

## Part I: Overview of the City of Phoenix

The City of Phoenix is the political, economic, and geographic center of Arizona. Spread over almost 518 square miles – the nation’s tenth largest city in terms of land area – the City’s neighborhoods are remarkably diverse, ranging from affluent suburban communities to lower-income urban areas. Each neighborhood has its own unique strengths and faces its own particular challenges. Given this diversity, it is important to consider the City’s neighborhoods both individually and as part of the whole so that City services can be tailored to each area’s specific needs.

### Section I-1: Demographic Profile

Phoenix is home to more than 1.5 million residents, making it the sixth-most populous city in the country. Although the City’s growth has slowed in recent years, the Census Bureau estimates that Phoenix added almost 25,000 residents between July 2013 and July 2014.<sup>4</sup> The City’s 1.6 percent growth rate was the eighth-highest amongst the 34 cities with at least 500,000 residents.

The Maricopa Association of Governments (MAG) produces population projections. Starting with 2010 Census data, MAG projects that Phoenix will grow 1.3 percent annually through 2030.<sup>5</sup> At this growth rate, the City would grow to 1.85 million residents by 2030. At the village level, projected growth rates range from 0.7 percent in Paradise Valley to 4.7 percent in Desert View. In terms of the number of residents, five villages – Desert View, Estrella, Alhambra, Maryvale, and Laveen – are each expected to add at least 30,000 residents through 2030.

There are 528,307 households in the City. In Census parlance, each household has a single ‘householder’ who is the person, or one of the people, in whose name the home is owned or rented. A family household is defined as one in which at least one member of the household is related to the householder by birth, marriage, or adoption. About 63.5 percent of total Phoenix households, or 335,606, are considered family households. Of these, 219,817 are led by a married couple, representing 41.6 percent of all households. Of the remaining family households, more than twice as many are led by female householders (80,831) than male householders (34,958). In comparison, non-family households are slightly more likely to be led by a male householder (98,874) than a female householder (93,827).

Phoenix’s residents are younger than the State as a whole. The median age of Phoenix residents is 32.9 years compared to the statewide median of 36.5 years. Figure 2 compares the age distribution within the City to the State overall. Phoenix has a larger proportion of children and working-age adults (25 through 64 years-old), but a smaller proportion of seniors.

---

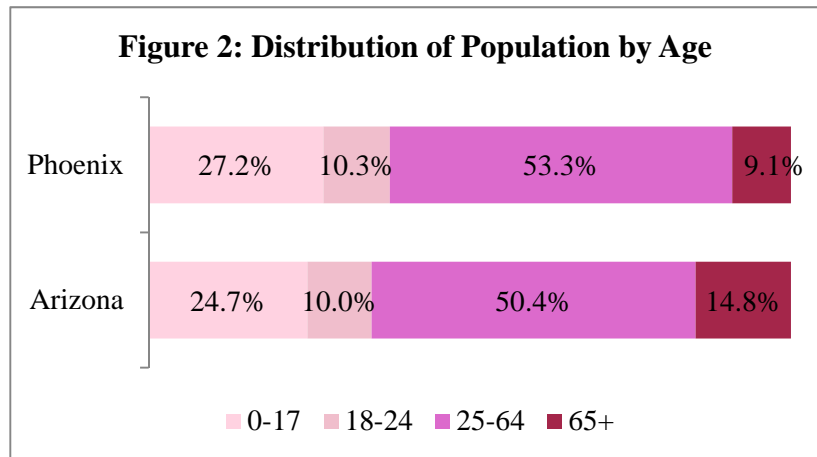

<sup>4</sup> Calculated from Tables: 2014 Cities and Towns at <http://www.census.gov/newsroom/press-releases/2015/cb15-89.html>, downloaded January 31, 2016.

<sup>5</sup> Population projections for Phoenix census tracts. Unpublished data provided by the Maricopa Association of Governments.

There are significant differences in the age distribution across Phoenix neighborhoods. In the southwestern villages, Laveen, Maryvale, Estrella, and South Mountain, as well as North Gateway, more than 30 percent of all residents are younger than 18 years. In both Maryvale and Estrella, more than one-in-three residents are children. Conversely, relatively larger shares of the population are 65

years of age and older in the northern and eastern parts of the City, with more than 11 percent of residents in the Paradise Valley, Rio Vista, North Mountain, Desert View, and Camelback East villages in this age group.

Phoenix is more racially diverse than the State as a whole and is majority-minority, meaning that less than half of the City's residents are non-Hispanic White. Figure 3 depicts the City's racial/ethnic makeup. Between the 2000 and 2010 census, the number of residents in each racial/ethnic category increased, but there were large differences across groups. The number of

of individuals of Asian descent increased 71 percent while the number of individuals reporting that they were White/Caucasian increased by only one percent. In terms of numbers, the most significant increase was in the number of individuals reporting Hispanic ethnicity, who grew by nearly 140,000, or 31 percent.

This trend is likely to continue as the Hispanic population is significantly younger than the White population. The median age of the Hispanic population in Phoenix is 25.0 years compared to 42.1 years for White residents. Approximately 55 percent of children in Phoenix are Hispanic.

Phoenix's racial diversity is also evident in the primary language spoken in City households. More than one-third of Phoenix households (177,719) primarily speak a language other than English. Most of these households (136,855) primarily speak Spanish. In three villages – Maryvale, Estrella, and Central City – more than half of households primarily speak a language

other than English. Households are considered ‘linguistically isolated’ if no one in the household over the age of 14 years old is reported as speaking English ‘very well’. In Phoenix, 38,334 households, 7.3 percent of all households, are linguistically isolated, with most primarily speaking Spanish. The number of linguistically isolated households declined more than 25 percent since the 2013 Community Assessment.

Approximately one-in-seven Phoenix residents are not United States citizens (the Census does not ask whether non-citizens have legal status) compared to about one-in-twelve statewide. In the Maryvale, Central City, and Estrella villages, more than 20 percent of residents are non-citizens. The number of non-citizens in Phoenix declined by almost 24,000 (10 percent) since the 2013 Community Assessment.

Figure 4 compares the educational levels of Phoenix residents over the age of 25 years to the statewide numbers for the same age group. In general, the City’s educational levels are somewhat less than the State as a whole. Almost one-in-five Phoenix residents, 19.0 percent, in this age group have not completed high school or equivalent, compared to 14.1 percent statewide. Almost

another quarter of the Phoenix population has no education beyond high school. There are 251,588 Phoenix residents with a bachelor’s or higher degree, representing 26.7 percent of all individuals in this age group, which is only slightly less than the 27.1 percent statewide average.

A greater proportion of Phoenix’s working age population has jobs than the overall State average, likely due both to the City’s younger population and relatively more job opportunities than in other parts of Arizona. Of Phoenix residents who are 16 years of age or older, 59.3 percent are employed; statewide, 54.1 percent are employed. These ratios represent reductions from the 2013 Community Assessment, which found that 62.7 percent of working-age Phoenix residents and 57.5 percent of working-age Arizonans were employed. In Ahwatukee Foothills, Deer Valley, Desert View, and North Gateway, more than 65 percent of working age residents are employed. By comparison, only 42.6 percent of working age residents in Central City are employed.

The annual median income of Phoenix households is \$46,881, which is 6.1 percent less than the \$50,448 statewide median and 12.3 percent less than national median of \$53,842. The City’s median income represents a 4.0 percent reduction from the 2013 Community Assessment. Figure 5 notes the number of households at various income ranges. Incomes vary widely

across the City. Although households earning less than \$15,000 annually represent only 14.5 percent of all Phoenix households, they comprise more than 35 percent of Central City households. At the other end of the spectrum, 45.7 percent of Desert View households earn more than \$100,000 annually.

## Section I-2: Health Profile

The health of the City's residents is an important determinant of quality of life. Good health is a result of a number of factors, including access to routine health care and healthy behaviors.

Health insurance is often a prerequisite to receiving quality healthcare. The federal Affordable Care Act aimed to increase insurance coverage by expanding Medicaid and establishing a system of subsidies for low- and moderate-income individuals to purchase coverage through insurance marketplaces ('exchanges'). Coverage through both the Medicaid expansion and the federally-operated exchanges began January 1, 2014. Data from the Census Bureau's American Community Survey suggests that these options have reduced the ranks of the uninsured in the State and City.<sup>6</sup>

Between 2010 and 2013, the insured rate amongst the City's residents ranged from 76 to 78 percent. In 2014, the insured rate increased to 82 percent as more than 78,000 residents gained coverage. Between 2010 and 2014, almost 68,000 Phoenix residents gained private health insurance coverage and 63,000 gained public health insurance coverage (primarily Medicaid through the Arizona Health Care Cost Containment System, AHCCCS). Still, more than 276,000 residents remained without health insurance in 2014. The City's insured rate lags behind the State's rate, which was 86 percent in 2014.

Despite improvements in insurance coverage rates, there remain significant differences across demographic groups. Notably:

- Young adults are least likely to have health insurance. More than 30 percent of residents between 18 and 24 years of age are without health insurance. The City's oldest and

<sup>6</sup> Unlike other analyses of American Community Survey data that use five-year estimates in order to allow for village-level estimates, this report uses one-year estimates for health insurance coverage in order to evaluate the impact of the Affordable Care Act.

youngest residents were most likely to be insured; fewer than three percent of those over the age of 65 and about nine percent of children under six years of age were uninsured.

- There are significant disparities across racial/ethnic groups. The uninsured rate for White/Caucasian residents was less than ten percent, but exceeded 25 percent among Native American and Hispanic residents.
- Nearly half of non-citizens were without health insurance, accounting for almost 40 percent of uninsured Phoenix residents.
- The 42 percent uninsured rate for persons who have not completed high school is seven times greater than the six percent uninsured rate for persons with at least a bachelor's degree.
- Although only half as likely to be uninsured as unemployed persons, 20 percent of individuals who are working do not have health insurance.

For those able to access healthcare services, Phoenix is home to numerous providers, including:<sup>7</sup>

- 31 hospitals
- 16 federally qualified health centers
- 329 assisted living centers and homes
- 23 nursing homes

Information regarding the health of the City's residents comes from a number of sources.

Recognizing that good health begins before birth, the Arizona Department of Health Services (DHS) tracks various statistics related to Arizona births.<sup>8</sup> There were 23,905 Phoenix births in 2013, an increase of 10.1 percent compared to 2010, but still 7.6 percent less than the 25,859 birth in 2008. Of the 2013 births:

- Only 1.0 percent of mothers did not receive any prenatal care during their pregnancy
- 7.2 percent of newborns were considered low birth-weight
- 9.5 percent of births were to teen mothers, down from 12.6 percent in 2010
- 64.1 percent of births were paid by a public payer (generally the State's Medicaid program)

The Big Cities Health Coalition is a project of the National Association of City and County Health Officials funded by the U.S. Centers for Disease Control and Prevention. The project tracks more than 30 health indicators in 26 cities. Notable findings for Phoenix include:

- The overall mortality rate of 519.8 deaths per 100,000 residents was the lowest among 14 reporting cities.

---

<sup>7</sup> Source: <http://azdhs.gov/licensing/index.php#databases>. Downloaded February 13, 2016.

<sup>8</sup> Source: <http://www.azdhs.gov/plan/report/index.php>. Downloaded November 13, 2015.

- Mortality rates due to cancer (108.4 deaths per 100,000 residents) and heart disease (106.4) were the lowest amongst the 14 cities that reported data, and diabetes (20.2) was below average.
- Mortality rates due to homicide (6.7 deaths per 100,000 residents) and firearms (12.2) were below the unweighted average for reporting cities while motor vehicle deaths (9.1) were higher than average.
- Only 5.3 percent of adults and 5.4 percent of children received a seasonal flu shot, and only 0.2 percent of adults over 65 years of age received a pneumonia vaccine. The City's pneumonia mortality rate of 28.6 deaths per 100,000 residents was the highest amongst 13 reporting cities.
- The AIDS diagnosis rate was third-lowest of 23 reporting cities, with 14.3 diagnoses per 100,000 residents.
- 24.5 percent of adults are obese, the third highest rate of 10 reporting cities.
- 15.3 percent of adults binge-drank in 2013, significantly less than the 22 percent unweighted average in the other reporting cities. 16.6 percent of adults currently smoke.

DHS also reports information regarding mortality and causes of death. In 2013, 9,027 deaths were reported in Phoenix. A comprehensive listing of causes is not provided, but the leading cause among those listed was cardiovascular disease, which accounted for 25.6 percent of all deaths. Another 5.3 percent of deaths were drug- or alcohol-related. Suicides were 2.3 percent of the total, motor vehicle accidents were 1.7 percent, and homicides were 1.3 percent.

The Arizona Behavioral Risk Factor Surveillance System (BRFSS) is a telephone survey administered by DHS and partially funded by the federal Centers for Disease Control and Prevention. The 2012 survey included 2,600 respondents in the greater Phoenix area. Notable highlights include:

- Eighty-three (83) percent stated their health was good, very good, or excellent.
- Almost 60 percent had a body mass index (BMI) considered overweight or obese.
- About three-quarters of women over the age of 50 years had a mammogram within the past two years, a similar proportion of women over 18 years had a pap test within the past three years, almost 70 percent of adults over 50 years had ever had a sigmoidoscopy or colonoscopy, and about two-thirds had visited a dentist or dental clinic within the past year.

According to American Community Survey data, 141,878 Phoenix residents – 9.5 percent – have a disability. The most prevalent disability is an ambulatory difficulty (73,398), followed by cognitive difficulty (56,427), independent living difficulty (49,648), hearing difficulty (36,688), self-care difficulty (28,190), and vision difficulty (27,852).<sup>9</sup>

Additional detail for the information presented in this Section is provided in Appendix J.

---

<sup>9</sup> Individuals may have multiple disabilities so these are duplicated counts.

## Section I-3: Education Profile

Phoenix residents have a variety of options across the education continuum. State law establishes ‘open enrollment’, which allows students to apply for admission to any public school, based on available classroom space.<sup>10</sup> Additionally, there are numerous charter and private schools located in Phoenix. There is similar diversity in higher education options, including public community colleges and universities, as well as private technical colleges and universities.

### *Primary and Secondary Education*

According to the City of Phoenix, there are 30 school districts whose boundaries extend at least partially into the City.<sup>11</sup> These include 21 elementary districts, 4 high school districts, 4 unified districts offering kindergarten through high school, and the Maricopa County Regional School District. In general, the southern part of the City has non-unified elementary and high school districts while the northern portion is served by unified districts. In several instances, only a small portion of the City falls into a district’s boundaries. In a couple of cases, part of Phoenix is covered by a district’s boundaries, but the district does not have any schools actually located within the City. According to the Arizona Department of Education (ADE), there are 269 traditional public schools physically located in Phoenix.<sup>12</sup> These schools reported total enrollment of nearly 195,000 students.<sup>13</sup> Additionally, Arizona is a national leader in school choice and there are more than 550 public charter schools operating in the State, including 146 within the City. Almost 40,000 students attend these schools.

Arizona schools have been challenged in recent years by funding reductions as the State has contended with historic declines in tax revenues. According to the Arizona Joint Legislative Budget Committee (JLBC), State funding for education declined 19.5 percent, from \$5.1 billion to \$4.0 billion between the high water funding year of fiscal year 2008 and fiscal year 2012.<sup>14</sup> Since then, funding has increased to an estimated \$4.7 billion in fiscal year 2016.

Additionally, a special election has been scheduled for May 17, 2016 to decide a legislative referendum to increase funding for education. Proposition 123 – the Arizona Education Finance Amendment – would increase distributions from the State’s Permanent Land Endowment Trust Fund by \$3.5 billion over ten years and direct these funds to public schools.

Overall, the JLBC reports the State is providing \$4,242 per student in fiscal year 2016, compared to an inflation adjusted \$4,949 in fiscal year 2008. When adjusting for inflation, the JLBC reports that funding has declined 25.0 percent during the period. When local and federal funds are included, schools receive \$9,078 per student, compared to \$9,574 in fiscal year 2008.

<sup>12</sup> Source: <http://www.ade.az.gov/edd/default.asp>. Searched for schools located in “Phoenix”. Accessed October 21, 2015.

<sup>13</sup> Source: <http://www.azed.gov/research-evaluation/arizona-enrollment-figures/>.

<sup>14</sup> Source: <http://www.azleg.gov/jlbc/allfunding.pdf>. Accessed October 21, 2015.

Like Phoenix residents overall, students in schools within the City are a diverse group. Figure 6 compares the racial/ethnic composition of students attending traditional public schools and public charter schools within the City to the overall total.

As seen in the chart, Hispanic students comprise more than 60 percent of enrollment in Phoenix schools, White students less than 27 percent, and Black students about seven percent. Racial composition varies widely across districts. Consistent with demographic trends, school districts located primarily in the southern part of the City are largely non-White while schools in the northern portion of the City are majority White. Of the 19 elementary school districts in Phoenix, 16 are at least 75 percent non-White; the exceptions are Madison, Kyrene, and Washington. In contrast, the Phoenix schools in the unified districts serving the northern parts of the City are majority White, except for Glendale Union, which is 40 percent White.

The chart also shows there are noticeable differences in school selection across racial and ethnic groups. In relative terms, White students are significantly more likely to attend charter schools, where they comprise 38.3 percent of enrollment compared to 24.2 percent of traditional school enrollment. Conversely, Hispanic and Native American students are comparatively more likely to attend traditional schools.

Many students have special needs. Figure 7 notes the proportion of students who receive free or reduced lunch, are English language learners, or receive special education services.

<b>Figure 7: Counts of Students in Public Schools Located Within City of Phoenix</b>						
	All Public Schools		Traditional Schools		Charter Schools	
	<u>Count</u>	<u>%</u>	<u>Count</u>	<u>%</u>	<u>Count</u>	<u>%</u>
Total Students	233,897		194,742		39,155	
Free/Reduced Lunch	140,719	60.2%	120,941	62.1%	19,778	50.5%
English Language Learner	24,698	10.6%	22,117	11.4%	2,581	6.6%
Special Education	24,578	10.5%	21,563	11.1%	3,015	7.7%

As the table demonstrates, more than 60 percent of students in Phoenix schools receive free or reduced price lunches, meaning their families' incomes are less than 185 percent of the federal poverty level, which translates to \$37,200 for a family of three in the current school year. In several districts in the southern and western parts of the City, more than 80 percent of students qualify for free or reduced lunches. More than ten percent of all students are English Language Learners (ELL) and more than ten percent receive special education services. Notably, both ELL and special education students are much more likely to attend traditional district schools than charter schools.

Additionally there are nearly 12,000 children experiencing homelessness who attend school districts or charter providers with schools in Phoenix as noted in Figure 8.<sup>15</sup> There are 2,943 children experiencing homelessness in the Maricopa County Regional District. Other districts with large populations of homeless students are Roosevelt Elementary (909), Washington Elementary (854), Glendale Union High School (607), and Phoenix Union High School (589).

<b>Figure 8: Number of Phoenix School Children Experiencing Homelessness, 2014</b>	
School District	10,787
Charter Schools	1,119
<b>Total</b>	<b>11,906</b>

There are a variety of ways to measure the performance of schools. ADE has established a system that seeks to incorporate many of these metrics and produce a single A through F letter grade. The formula takes into account Arizona Instrument to Measure Standards (AIMS) scores, the percent of ELL students reclassified, high schools' graduation and drop-out rates, academic growth amongst all students, and academic growth amongst the bottom quartile of students.<sup>16</sup> A somewhat different formula is utilized for alternative schools. Figure 9 notes the distribution of grades for schools in Phoenix.

Comparing traditional and charter schools, greater proportions of charters schools score high 'A' grades and low 'D' grades while larger shares of traditional schools rate 'B' and 'C' grades. There is significant variation across districts, even among neighboring districts. For example, all five Osborn Elementary schools in Phoenix

all have an 'A' or 'B' while 10 of 12 Phoenix Elementary schools have 'C' or 'D' grades.

<sup>15</sup> The data is available at the district or charter holder, rather than school, level so this count includes all children in a district with a school located within the City. Since some districts and charter holders have schools outside of the City, the counts will be somewhat overstated.

<sup>16</sup> Laws 2015, Chapter 76 prohibits the assignment of letter grades in the 2014-15 and 2015-16 school years and requires the development of a new framework for assignment of letter grades.

The Arizona Department of Education calculates graduation rates for all traditional and charter high schools in the State. Its data indicates the five-year graduation rate for the class of 2014 was 80.2 percent.<sup>17</sup> High schools located in Phoenix had a 77.2 percent graduation rate as detailed in Figure 10.<sup>18</sup>

**Figure 10: Five-Year Graduation Rates for Class of 2014, by Select Groups**

District (Schools in Phoenix)	Total	Female/ Male	Asian	Black/African American	Hispanic	Native American	White/ Caucasian	Economically Disadvantaged	Students with Disabilities
Deer Valley Unified (1)	87.9%	91.4%/ 84.4%	100%	80.0%	82.8%	-	89.5%	85.6%	72.7%
Glendale Union High School (7)	92.2%	94.5%/ 89.7%	88.6%	90.9%	92.6%	84.4%	92.6%	91.2%	75.3%
Maricopa Co. Regional (2)	0.0%	0.0%/ 0.0%	-	-	0.0%	-	-	0.0%	-
Paradise Valley Unified (6)	92.2%	93.1%/ 91.5%	98.5%	90.2%	87.1%	87.5%	93.9%	87.2%	77.3%
Phoenix Union H.S. (13)	81.6%	86.5%/ 77.0%	58.3%	75.5%	83.3%	76.1%	81.6%	84.6%	76.9%
Scottsdale Unified (1)	92.1%	95.2%/ 88.5%	93.8%	88.0%	86.8%	-	94.8%	86.7%	96.4%
Tempe Union High School (2)	90.8%	95.5%/ 86.5%	92.1%	88.6%	87.9%	90.0%	92.3%	-	80.6%
All Charters (57)	51.9%	56.2%/ 46.5%	-	42.2%	48.6%	53.1%	57.2%	48.5%	44.1%
<b>Total - Phoenix High Schools</b>	<b>77.2%</b>	<b>81.5%/ 73.0%</b>	<b>84.5%</b>	<b>75.4%</b>	<b>74.5%</b>	<b>76.0%</b>	<b>83.7%</b>	<b>75.6%</b>	<b>72.5%</b>
<b>Total - Arizona High Schools</b>	<b>80.2%</b>	<b>83.5%/ 77.0%</b>	<b>88.0%</b>	<b>77.0%</b>	<b>76.4%</b>	<b>69.9%</b>	<b>84.9%</b>	<b>77.1%</b>	<b>72.5%</b>

The table shows traditional schools have significantly higher graduation rates than charter schools overall. However, there is wide variation across charter schools; of the 57 charter high schools in Phoenix, 12 have graduation rates that exceed 90 percent. Graduation rates for Native American, Hispanic, and Black students lag those of Asian and Caucasian students. Students who are economically disadvantaged or who have disabilities generally have lower graduation rates.

School-level detail for the information presented in this Section is provided in Appendix C.

<sup>17</sup> Source: <http://www.azed.gov/research-evaluation/graduation-rates/>. Downloaded October 20, 2015.

<sup>18</sup> ADE assigns students to their high school 'cohort' based on the school where the student entered high school regardless of whether they change to or graduate from a different school. Additional information at <http://www.azed.gov/research-evaluation/files/2012/08/gradratetechnicalmanual.pdf>.

### *Post-Secondary Education*

Phoenix residents seeking post-secondary education have a large and diverse number of options. The Maricopa County Community College District is the largest in the country, with 10 campuses serving more than 230,000 students in fiscal year 2013. The District serves recent high school graduates as well as those seeking to gain occupational skills and lifelong education. Overall, the District offers almost 1,000 occupational programs (degrees and certificates), 31 academic associate degrees, and 981 courses.<sup>19</sup> The District awarded more than 24,000 certificates and associate degrees in fiscal year 2013.

Four of the District's campuses are located in Phoenix: Gateway, Paradise Valley, Phoenix, and South Mountain. Figure 11 reports fiscal year 2013 enrollment figures for these campuses, which has declined 11 percent over the past ten years.<sup>20</sup>

**Figure 11: FY 2013 Enrollment for Community Colleges in Phoenix**

Gateway	10,962
Paradise Valley	14,380
Phoenix	19,476
South Mountain	7,338

Each of the State's three public universities – Arizona State University (ASU), the University of Arizona (U of A), and Northern Arizona University (NAU) has some presence in Phoenix. ASU has a downtown Phoenix campus, which includes colleges of law, nursing, teaching, journalism, and public programs. The University of Arizona opened a medical school in Phoenix in 2007. NAU has partnerships with several community colleges allowing students to complete two years at the community college and two years with NAU on the same campus.

Phoenix is also home to 75 private vocational programs and degree-granting institutions licensed by the Arizona State Board for Private Postsecondary Education ranging from small specialized schools in areas such as massage therapy and polygraph science, to large universities such as the University of Phoenix and Grand Canyon University.<sup>21</sup>

### *Section I-4: Economic Profile*

Phoenix's economy is large and diverse. The greater Phoenix area economy supports jobs at all skill levels and educational requirements in a variety of industries, as illustrated in Figure 12.<sup>22</sup> Using federal Bureau of Labor Statistics industry definitions, the greater Phoenix area's largest industry by employment is trade, transportation, and utilities (more than 60 percent of this industry is comprised of retail jobs and wholesale trade accounts for more than 20 percent), followed by professional and business services (with the largest share in administrative services), education and health services, and government.

Information	35,400	1.9%
Financial Activities	167,400	8.8%
Professional and Business Services	320,700	16.8%
Education and Health Services	279,600	14.7%
Leisure and Hospitality	205,300	10.8%
Other Services (except Public Admin.)	68,200	3.6%
Government	234,300	12.3%
<b>Total</b>	<b>1,906,000</b>	

Note: numbers do not sum due to rounding

2015 marked the fifth consecutive year of job growth in the greater Phoenix area. More than 180,000 jobs have been added since 2009, with annual growth of between two and three percent. With this growth, the region has effectively recovered the jobs that were lost during the Great Recession, with the 2015 employment total nearly equaling the peak set in 2007.

The jobs recovery has been uneven, however. Construction and manufacturing jobs remain 44 percent and 16 percent, respectively, below their 2006 high points. Job gains have occurred primarily in the health services/social assistance (net gain of 55,500 jobs since 2007) and education (15,000) sectors as well as accommodations/food services (14,100) and finance/insurance (13,700). Additional industry data is provided in Appendix D.

Despite the growth in jobs, wages in the Phoenix area have been stagnant since 2011. According to federal Bureau of Labor Statistics' occupational employment statistics, the region's median wage was \$16.91 per hour in 2011 and \$16.90 in 2014 (the most recent year available).<sup>23</sup>

The State's Employment and Population Statistics office forecasts continued job growth in the greater Phoenix area over the coming decade. Its most recent report estimates that the region will experience 2.3 percent annual growth between 2012 and 2022, adding 355,500 jobs.<sup>24</sup> Figure 13 presents this estimate by industry.

As the chart illustrates, the professional and business services sector is projected to add the most jobs (84,000) over this period, followed by educational and health services (70,500); trade, transportation, and utilities (53,100), and construction (41,100).

<sup>23</sup> Source: <http://www.bls.gov/oes/tables.htm>. Data for May 2011 and May 2014 for the Phoenix-Mesa-Glendale metropolitan statistical area.

<sup>24</sup> Source: <https://laborstats.az.gov/sites/default/files/documents/files/ifor-04-2012to2022-report.pdf>.

This report did not include the educational requirements for the projected new jobs, but a separate report forecasting job growth between 2014 and 2016 showed that the Phoenix economy is projected to provide opportunities for individuals with a variety of skills and educational backgrounds.<sup>25</sup> As shown in Figure 14, more than 70 percent of new jobs created between 2014 and

2016 require no more than a high school diploma. Seventeen (17) percent of the forecasted jobs are in occupations that require a bachelor's or higher degree.

Information collected by the Maricopa Association of Governments (MAG) provides insight into the employers located within the City. The database includes information from employers with at least five employees. The 2014 database includes 16,870 employers located within the City of Phoenix that collectively employ more than 615,000 individuals.<sup>26</sup>

<sup>25</sup> Source: 2014-2016 Phoenix MSA Occupation Projections Tables & Graphs from <https://laborstats.az.gov/employment-forecasts>.

<sup>26</sup> Source: MAG employer survey. The contents of this report reflect the views of the Licensee who is responsible for the facts and accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of MAG and have not been approved or endorsed by MAG. The methodology used to construct the database has changed since the 2010 database used in the previous Community Assessment so reported figures cannot be compared to the previous report.

Figure 15 reports jobs by employer size. Although more than 70 percent of employers included in the database employ between 5 and 24 individuals (as noted, employers with fewer than five employees are excluded), larger firms are responsible for most Phoenix jobs. Firms with at least 25 employees represent

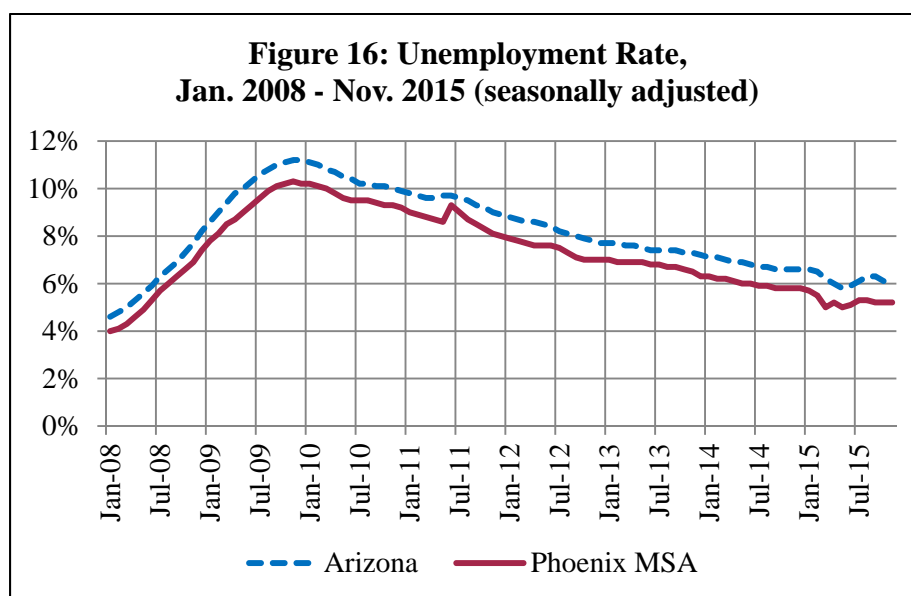

less than 30 percent of Phoenix businesses, but are responsible for more than 80 percent of the jobs in the City. According to the MAG employer data, the three largest employers in Phoenix are governments, led by the State and followed by the City and Maricopa County. The ten largest private employers are Banner Health, Honeywell, American Express, Wells Fargo, Bank of America, Grand Canyon University, Fry's Food Stores, JP Morgan Chase, Wal-Mart, and U-Haul.

The MAG employer database illustrates the major employment centers within the City. The Central City village has the greatest number of jobs as it encompasses downtown Phoenix and Sky Harbor Airport, and it has access from Interstates 10 and 17 and State Route 51. The next largest numbers of jobs are in Camelback East (which includes the Biltmore Corridor), Deer Valley (with major employers including American Express and Mayo Clinic, and South Mountain (which benefits from its proximity to Sky Harbor). The areas with the fewest jobs are the far northern (Rio Vista and North Gateway) and southern (Laveen and Ahwatukee Foothills) villages. Appendix D details employer and employee counts by industry and firm size across villages.

The City's unemployment rate has been declining since exceeding 10 percent in late 2009 and early 2010. The trend over the past eight years is displayed in Figure 16.<sup>27</sup> In January 2008 (one month after the technical beginning of the Great Recession), the unemployment rate was four percent. The City's rate grew nearly uninterrupted for two years, peaking in November 2009 at 10.3 percent. Since that time the rate has trended downward, reaching 5.2 percent in November 2015.

<sup>27</sup> Source: Query from <http://azstats.gov/laus-data-query-tool/>, downloaded October 24, 2012. Seasonally adjusted rates are not available at the city level so presented figures are not seasonally adjusted.

Job loss has affected residents in all regions of the City. In July 2012, 18,495 Phoenix residents received unemployment insurance (UI) benefits, a 336 percent increase over the 4,241 recipients in July 2008.<sup>28</sup> Because there are many individuals who either do not qualify or have exhausted their benefits,<sup>29</sup> undercount the true number of individuals unable to find work. UI claimant counts by village are included in Appendix D.

## Section I-5: Housing Profile

The City has significant stocks of both rental and owner-occupied housing. American Community Survey estimates indicate 54.3 percent of Phoenix residents live in owner-occupied housing.<sup>30</sup> In four villages – Central City, Encanto, Alhambra, and Camelback East – more than half of residents live in rental property.

The State and City real estate market was one of the biggest casualties of the Great Recession. Between 2006 and 2011, the median price of single family home resales declined 61 percent.<sup>31</sup> The number of home foreclosures increased 373 percent between 2007 and 2011. ‘Normal’ resales and new homes have generally increased since that time, while foreclosures have declined. Sales prices have steadily increased.

Figure 17 notes the number of single family home sales in Phoenix since 2000 and illustrates the City’s housing sales in recent years. After several fairly steady years to begin the decade, the

<sup>28</sup> Source: Department of Economic Security, Division of Employment and Rehabilitation Services.

<sup>29</sup> Unemployment benefits are typically available for up to 26 weeks. However, a series of federal extensions temporarily increased the limit to as much as 99 weeks. These extensions have all expired.

<sup>30</sup> See Appendix A for discussion of the American Community Survey. Appendix E includes owner-occupied and renter-occupied housing for each village.

<sup>31</sup> Citywide home sales, home price, and foreclosure data taken from Arizona State University’s Arizona Real Estate Center at [http://realty.wpcarey.asu.edu/arec/market\\_update.html#affordability](http://realty.wpcarey.asu.edu/arec/market_update.html#affordability). Accessed November 19, 2012.

number of single family home resales jumped from about 20,000 in 2003 to more than 30,000 in 2005. The near-collapse of the housing market pushed that number to less than 15,000 in 2007. Sales then rose to nearly 35,000 as distressed homeowners sold their homes and banks unloaded foreclosure properties. In fact, foreclosures in Phoenix increased more than five-fold in one year, from 2,395 in 2007 to 12,165 in 2008. The reduction in home sales is due to significant reduction in foreclosure sales, which fell to 2,488 in 2014. Normal resales more than doubled between 2011 and 2014.

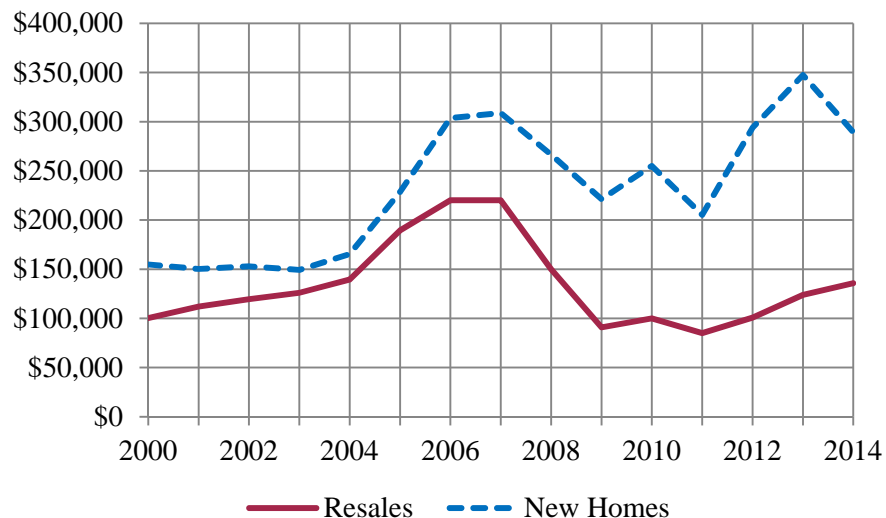

**Figure 17: Single Family Home Sales in Phoenix, 2000 - 2014**

As the number of foreclosures makes

clear, the onset of the recession and accompanying job losses resulted in a large number of individuals and families unable to make their mortgage payments, especially those who had anticipated home equity growth to allow them to refinance. This has had a profound impact on

**Figure 18: Median Single Family Home Sale Prices in Phoenix, 2000 - 2014**

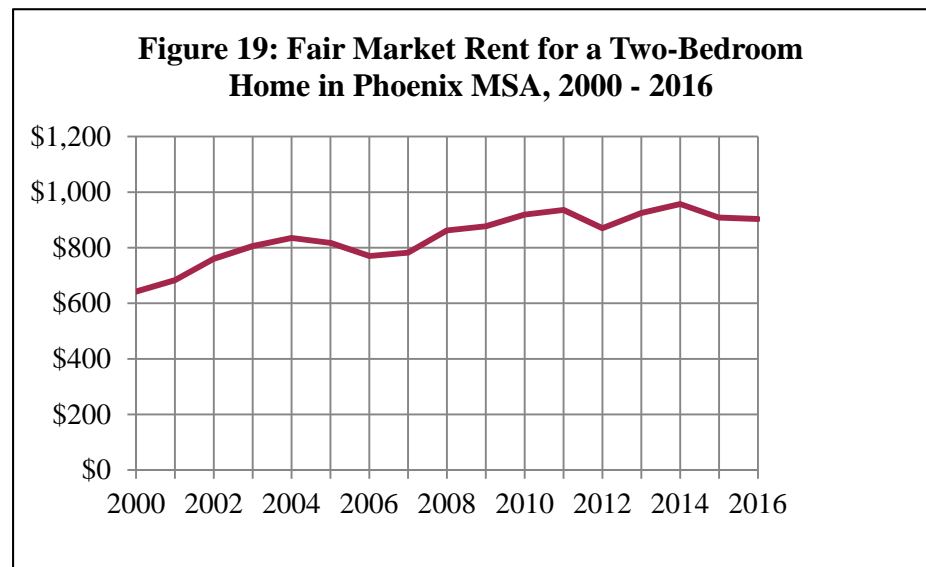

home prices as illustrated in Figure 18. Between 2000 and 2006, the City experienced nearly uninterrupted growth in housing prices with the median prices for both new and resold homes roughly doubling. From 2007 to 2011, the median price of home resales in Phoenix declined from \$220,000 to \$85,000. As foreclosures have become a smaller proportion of resales,

homes prices have increased in each of the past three years.

Arizona State University's Arizona Real Estate Center (AREC) maintains an 'affordability index' to measure the extent to which an individual with average earnings can afford an average priced home. An index value of 100 indicates an individual earning the median income for a given area can afford the median priced home in that area. An index below 100 means an individual with average earnings cannot afford a median priced home; for example an index of 90 means the median income provides only 90 percent of what is necessary for the median priced home. An index above 100 indicates median earnings are more than enough to afford a median priced home. The greater Phoenix area is largely considered to be affordable with an index score of 166.7, although this score has been declining as home prices have increased.

As home prices declined after 2007 rental housing prices in the greater Phoenix area increased markedly, presumably

due to growth in demand as former homeowners became renters. As home prices have increased, rental costs have been more stable in recent years. The fair market rental cost for a two-person home in the greater Phoenix area is displayed in Figure 19.<sup>32</sup> As the chart illustrates, the fair market rent, which includes utilities, is \$903 in 2016.

## Section I-6: Public Safety Profile

Mirroring national and state trends, the City of Phoenix experienced a significant reduction in crime in between 2000 and 2011. However, crime rates in the City increased in the last three years and remain notably higher than the rest of the State. Further, crime is not evenly distributed across the City, but is concentrated in lower-income South Phoenix neighborhoods.

Figures 20 and 21, respectively, summarize violent and property crime rates for the United States, Arizona, and Phoenix from 2000 to 2011<sup>33</sup> Detailed information is included in Appendix F. Violent crimes include murder and non-negligent manslaughter, forcible rape, robbery, and

<sup>32</sup> Source: U.S. Department of Housing and Urban Development. <http://www.huduser.org/portal/datasets/fmr.html>. Accessed November 20, 2015. Fair Market Rents are currently established at the 40<sup>th</sup> percentile; that is, the dollar amount below which 40 percent of rental housing units are rented.

<sup>33</sup> Information from the FBI's Uniform Crime Reporting Statistics, retrieved from <http://www.fbi.gov/about-us/cjis/ucr/ucr>. National data comes from Table 1, State data from Table 5, and City data from Table 8.

aggravated assault. Robbery and assault typically comprise 90 percent or more of the crimes in this category. As Figure 20 illustrates, violent crime rates have been gradually declining across the country and State since 2000. In Phoenix, the violent crime rate fell until 2009, but since then has been flat or increasing. In particular, the City has experienced significant increases in reported forcible rapes and aggravated assaults. Media reports have suggested that the increases may reflect a rebound from historically low levels as well as efforts to improve reporting by undocumented immigrants and victims of domestic violence.<sup>34</sup> Despite this increase, the violent crime rate in Phoenix remains 22.5 percent below the 2000 rate.

Property crimes include burglary, larceny/theft, and automobile theft. Figure 21 shows property crime rates have declined substantially in the State and City of Phoenix since 2000 and, although the violent crime rate has stagnated or increased in recent years, the property crime rate has continued to decline. Since 2000, the City's property crime rate has fallen by a remarkable 43.9 percent. In particular, automobile theft has declined 68 percent.

Figures 20 and 21 show crime rates in Phoenix are notably higher than the statewide and national rates. This reflects national trends, with crime rates higher in major urban centers than in suburban and rural areas. In comparison to the other nine largest cities in the country, Phoenix is fairly average, as shown in Figure 22.

<sup>34</sup> Hensley, JJ. "Violent Crime up in Phoenix area in 2012." Arizona Republic. November 10, 2013.

In terms of violent crime, Phoenix has the sixth-highest rate, which is 21.1 percent lower than the total rate within the group. The City's property crime rate is 37.1 percent higher than the total for the group and third highest.

Crime is not distributed equally across the City, as illustrated by Figure 23.<sup>35</sup> For example, the highest village violent crime rate (1,534 crimes per 100,000 residents in Central City) is 17 times higher than the lowest village violent crime rate (Desert View with 17 crimes per 100,000 residents). The ratios are similarly stark for property crimes.

**Figure 22: 2014 Crime Rates (per 100,000 Residents) in Ten Largest U.S. Cities**

	<u>Violent Crime</u>	<u>Property Crime</u>
New York	597	1,602

Philadelphia	1,021	3,388
<b>Phoenix</b>	<b>572</b>	<b>3,724</b>
San Antonio	539	5,418
San Diego	381	1,959
Dallas	665	3,589
San Jose	321	2,434
<b>Total</b>	<b>725</b>	<b>2,716</b>

<sup>35</sup> Data taken from <http://www.raidsonline.com/gridstat/>, to which the Phoenix Police Department and other law enforcement agencies report data. Calendar year 2015 summary data by police beat was retrieved on February 13, 2016. Although the data is primarily fed from the Phoenix Police Department, it is noted that this compilation may differ from the Department's official counts and classifications, but the Police Department data was not made available for detailed geographic areas. Finally, rates are reported as a ratio to 100,000 residents to allow for comparisons to FBI data, but it is noted that several village areas have fewer than 100,000 residents.

Generally, the southern areas of the City have significantly higher crime rates than other areas, with the Central City, Encanto, and Alhambra villages in the central part of the City respectively ranking one, two, and three in almost every category of violent and property crime. As noted earlier, these are also among the areas of the City with the highest poverty rates. In contrast, the more affluent areas of the City, including the three northernmost villages (Rio Vista, North Gateway, and Desert View) and Ahwatukee Foothills in the southeast, have the lowest crime rates. Appendix F details crime counts and rates by type and village.

The City has established a number of emphases related to crime. The Police Department's Chief has outlined five main areas of focus: crime suppression, community engagement, technology, training, and hiring.<sup>36</sup> In 2013, the City convened a domestic violence work group that created a strategic plan with five "pillars": increasing community awareness and advocacy, making Phoenix a national model, reforming the justice system to focus on domestic violence, ensuring coordination of the service delivery system, and developing community partnerships to end domestic violence.<sup>37</sup> A human trafficking task force was created in December 2013 and developed a strategic plan covering four areas: community awareness and outreach, training, law enforcement collaboration, and victim services improvements.<sup>38</sup>

## Section I-7: Community Resources Profile

Befitting its status as the nation's sixth-largest city and the political and economic capitol of Arizona, the City of Phoenix boasts numerous world-class educational, cultural, and performing arts institutions; several professional sports franchises; an expansive parks system and diverse outdoor activity opportunities; and myriad entertainment options. The City is also home to a great number of civic and faith-based organizations.

In addition to the numerous social services discussed elsewhere in this report, the City itself is responsible for operating or providing a wide array of services, including:

- 182 city parks
- 41,000 acres of desert parks and preserves with 200 miles of trails
- 31 recreation and community centers
- 29 swimming pools
- Sky Harbor, one of the top ten busiest airports in the country
- Phoenix Workforce Connection, including two comprehensive sites, four affiliate sites, and 25 access points.
- 17 public libraries
- Five museums and historical sites

- Two arts centers and a children's chorus
- Five 18-hole golf courses and three nine-hole courses
- The Japanese Friendship Garden, Latino Institute, and Irish Cultural Center

Appendix K includes a map noting the locations of the City's parks, recreation and community centers, pools, and golf courses.

According to the Association of Religion Data Archives, there were 2,299 religious congregations representing 139 religious bodies in Maricopa County in 2010.<sup>39</sup> The City has a 20-member Faith-Based Initiatives Work Group that facilitates collaboration between the City and its many faith communities. Current faith-based initiatives include neighborhood transformation, individual and family stability, seniors, an earned income tax credit campaign, heat relief, financial education classes, and the homeless street count.

Arizona 2-1-1's website, <http://www.cir.org>, provides a comprehensive searchable database of social services providers. Categories include adoption and foster care, caregiver services, clothing, disability related services, domestic violence services, education, employment services, family services, financial services, food/meals, health and dental care, home services, housing, legal assistance, mental health and substance abuse treatment, veterans services, refugee services, senior services, transportation, and utility assistance.

## Part II: Human Services Department and the Populations It Serves

To achieve its mission to “improve the quality of life for Phoenix residents through innovative social services, educational and victim advocacy programs, collaborations and partnerships”, the City of Phoenix’s Human Services Department (HSD) provides an extensive array of services that include:

- Early Head Start and Head Start
- Emergency assistance services, including utility, eviction prevention, and move-in cost assistance
- Senior centers
- Homeless services, including operation of the Watkins Emergency Shelter and delivery of summer and winter respite programs
- Crime victim services through the Family Advocacy Center

These programs collectively form an important part of the social safety net for vulnerable individuals and those in need.

The Human Services Department provides assistance to tens of thousands of Phoenix residents every year, spanning the age spectrum from infants and toddlers to seniors, including low-income individuals and families, persons experiencing homelessness, and victims of violence. Additionally, a number of State and federal programs are also available to aid individuals and families in need. Appendix G details village-level caseload estimates for most of the programs discussed in this Part.

### Section II-1: Individuals and Families Living in Poverty

More than 350,000 Phoenix residents, 23.2 percent of the City’s population, live in poverty. Figure 24 notes the 2015 federal poverty level (FPL) for families of various sizes.<sup>40</sup> The FPL is used for the purposes of eligibility for many government

**Figure 25: MIT Living Wage Calculator for Greater Phoenix**

<u>Family Type</u>	<u>Living Wage</u>
1 Adult	\$22,194
1 Adult, 1 Child	\$47,216
1 Adult, 2 Children	\$58,947
1 Adult, 3 Children	\$78,125
2 Adults	\$36,920
2 Adults (1 works), 1 Child	\$44,595
2 Adults (1 works), 2 Children	\$50,107

**Figure 24: 2015 Federal Poverty Levels**

<u>Family Size</u>	<u>Poverty Guideline</u>
1	\$11,770
2	\$15,930
3	\$20,090
4	\$24,250
5 <sup>a</sup>	\$28,410

<sup>a</sup> add \$4,160 for each add’l person

programs, but a number of commentators have suggested the FPL is inadequate for identifying individuals and families in need.

Rather, they argue a ‘living wage’ that reflects the income required to meet minimum standards of living should serve as the benchmark.

<sup>40</sup> “Annual Update of the HHS Poverty Guidelines.” Federal Register 80:14 (January 22, 2015) p. 3236.

To that end, the Massachusetts Institute of Technology (MIT) has developed a living wage calculator that considers the cost of housing, food, medical care, transportation, and child care in a given area. The calculator also accounts for differences in family composition. Figure 25 presents the living wage calculator for several family types in the greater Phoenix area.<sup>41</sup> Comparing the two measures, the living wage calculator yields much greater income requirements. For example, a single person is above the poverty line if they earn more than \$11,770, but the living wage is almost twice as much – \$22,194. The differences are even greater for families, particularly those with children. Nevertheless, many HSD programs use the federal poverty level, or some percentage thereof, to determine program eligibility.

### *Demographics of Individuals and Families Living in Poverty*

The City's 23.2 percent poverty rate is considerably higher than the 18.9 percent statewide poverty rate. Over the past five years, the poverty rate has changed little, ranging from 22.5 percent to 24.1 percent. Rates of poverty vary widely across the City as depicted in Figure 26.

<b>Figure 26: Poverty Rate by Village</b>					
Central City	49.0%	Encanto	28.9%	Paradise Valley	11.1%
Maryvale	35.3%	North Mountain	21.8%	Rio Vista	6.8%
Alhambra	34.5%	Camelback East	21.7%	Ahwatukee Foothills	5.9%
South Mountain	30.9%	Laveen	14.9%	Desert View	5.9%
Estrella	30.0%	Deer Valley	11.3%	North Gateway	5.2%

In five villages, more than 30 percent of residents live in poverty, including nearly half of those in Central City, while the poverty rate is less than ten percent in four other villages. Compared to the City's overall poverty rate, six villages have higher than average rates and nine have lower than average rates.

Poverty in Phoenix is inversely proportional to age; that is, poverty decreases as age increases. Children are significantly more likely to live in poverty than adults or seniors, with children under five years of age experiencing the highest poverty rates. Figure 27 illustrates the rate of poverty among

<sup>41</sup> Source: <http://livingwage.mit.edu/metros/38060>. Accessed October 19, 2015.

various age groups. As the chart demonstrates, more than one-in-three children in Phoenix live in poverty, including 35.7 percent of children under five years of age, who are almost three times more likely to live in poverty than individuals over 55 years of age.

As shown in Figure 28, household composition is a strong predictor of poverty. Households headed by unmarried females are far more likely to be living below the poverty line than any other household type. More than one-in-three of such households are in poverty. In comparison,

only 10.7 percent of homes headed by a married couple live in poverty.

There are also significant differences in poverty rates across racial groups as depicted in Figure 29. Poverty rates for the Native American, Hispanic, and Black populations exceed 30 percent, compared to 14.6 percent for the Asian population and 11.9 percent for the White population. The 37.7 percent poverty rate for non-citizens is nearly twice as high as the 20.8 percent rate for citizens.

There is a predictable correlation between educational attainment and poverty as shown in Figure 30. More than 37 percent of residents who have not completed high school live in poverty. Each successive level of educational attainment significantly reduces the likelihood of living in

poverty, with fewer than six percent of college graduates in poverty.

The five-year American Community Survey estimates do not include counts of the language spoken at home or linguistic isolation data amongst households in poverty. It does provide estimates of the primary language spoken by all individuals who are at least five years of age and living in poverty. Of these more than 300,000 individuals, the majority (51.8 percent) speak Spanish while 45.1 percent speak English only and the balance speaks some other language.

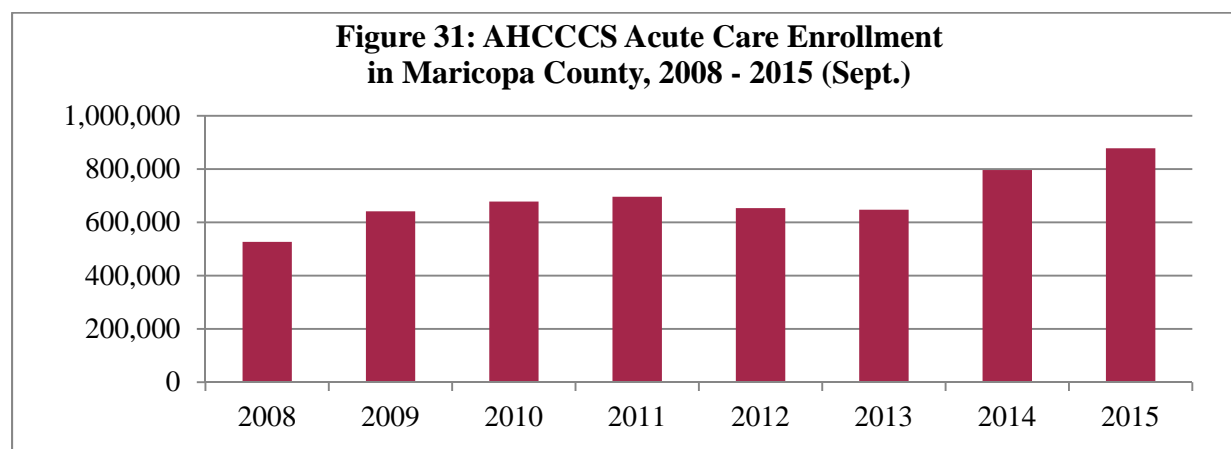

### *Select Supports Available to Individuals and Families Living in Poverty*

There are a variety of government programs that provide assistance to low-income individuals and families. Responsibility for these programs is divided amongst the federal, State, and City governments. Many of these programs, however, reach only a fraction of those residents living in poverty.

State government is responsible for administering a number of assistance programs, including health care, income supports, food assistance, child care, child protection and child welfare services, and crisis services. Historically, social services in Arizona have been fairly limited, though health care is a notable exception, and program cuts necessitated by declining revenues have further reduced these programs.

Due to the high cost of health care, many low-income individuals would not be able to access these services without public assistance. The primary health care program for low-income individuals is Medicaid, which is jointly funded by the federal government and the states and administered by the states operating within federal requirements. The Arizona Health Care Cost Containment System (AHCCCS) is responsible for administering Arizona's Medicaid program.

Figure 31 presents AHCCCS acute plan enrollment for all eligibility groups in September of 2008 through 2015 for Maricopa County.<sup>42</sup>

<sup>42</sup> Sources: Enrollment Reports by Health Plan Historical Index from the AHCCCS Document Archive at <https://archive.azahcccs.gov/>. Accessed February 13, 2016.

Enrollment of Maricopa County residents in AHCCCS acute plans grew 32 percent between 2008 and 2011 due to the recession and weak recovery. In 2012 and 2013, though, the caseload declined, primarily due to a ‘freeze’ in enrollments for childless adults beginning in July 2011. As noted previously in this report, Arizona took advantage of the Affordable Care Act option to expand the program, resulting in enrollment growth of more than 35 percent between 2013 and 2015.

In addition to the traditional Medicaid program, AHCCCS was responsible for administering the KidsCare program, which provided health insurance coverage to children with family income above the Medicaid program requirements (133 percent of the FPL for children under six years of age and 100 percent of the FPL for children six years and older) and below 200 percent of the FPL. Enrollment in that program, which covered more than 40,000 children in Maricopa County in 2008, was frozen in January 2010.

A more limited program, titled KidsCare II and with a family income limit of 175 percent of the FPL and an enrollment cap, was established with enrollment beginning in June 2012. That program was terminated January 31, 2014 with the expectation that these children and their families could access subsidized health insurance through the exchange. The elimination of KidsCare II leaves Arizona as the only state without a comparable program. Proposals to reestablish a program have been proffered and may be considered as part of the 2016 legislative session.

Income support programs are cash payments to eligible populations intended to augment their incomes and to assist them to meet their basic needs. One major income support program is the State-operated Temporary Assistance for Needy Families (TANF) cash assistance, which provides monthly payments to very low-income families with dependent minor children. Figure

32 compares the number of Phoenix families receiving cash assistance in July 2008 and July 2015.<sup>43</sup> As the chart shows, the Phoenix caseload has declined by almost 75 percent since 2008. This reduction, however, is due not to changes in need, but to changes to eligibility criteria. Specifically, the Legislature changed the lifetime benefit limit for cash assistance from

five year to three years in 2010 and then to two years in 2011 and, effective July 1, 2016, to one year. The State’s one year limit will be the most restrictive in the country. Arizona’s maximum benefit for a single-parent family of three is \$278 per month. According to the Center on Budget and Policy Priorities (CBPP), this is the ninth-lowest benefit in the nation as of July 2015.<sup>44</sup>

<sup>43</sup> Source: Department of Economic Security, Financial Services Administration.

<sup>44</sup> Source: <http://www.cbpp.org/research/family-income-support/tanf-cash-benefits-have-fallen-by-more-than-20-percent-in-most-states>. Accessed February 13, 2015.

The greatest number of families receiving cash assistance are in the Maryvale, Alhambra, North Mountain, and South Mountain villages, although these still represent only a fraction of the low-income households in these areas.

The supplemental nutrition assistance program (SNAP, formerly food stamps) provides payments to low-income households (generally with gross incomes at or below 130 percent of the federal poverty level and net incomes at or below 100 percent of the FPL) to purchase food. The average monthly benefit in Arizona was \$273.78 in July 2015.<sup>45</sup> This amount has fallen by approximately six percent since 2013 when a temporary benefit increase authorized by the federal stimulus legislation expired.

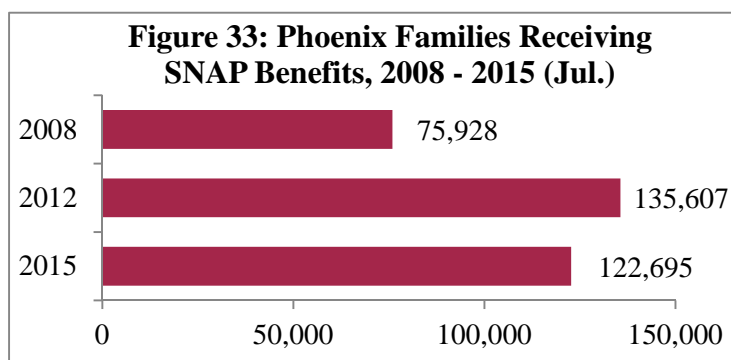

Figure 33 compares the number of Phoenix households receiving SNAP benefits in 2008, 2012, and 2015.<sup>46</sup> SNAP caseloads across the country grew significantly between 2008 and 2012 as the national economy struggled and eligibility was expanded. Due to both economic improvements and tightened eligibility requirements, SNAP

enrollment has fallen about 9.5 percent over the past three years. More than 23 percent of Phoenix households are currently enrolled in SNAP. By village, more than 50 percent of households in Central City are enrolled compared to two percent in Rio Vista.

The City provides assistance to low-income families through three family services centers: the John F. Long Center at 51<sup>st</sup> Avenue and Osborn Road, the Travis L. Williams center at Central Avenue and Broadway Road, and the Sunnyslope center at 9<sup>th</sup> Avenue and Hatcher Road. These centers collectively served at least 27,317 individuals, with the greatest number served at the John F. Long center (12,702), followed by the Sunnyslope center (7,891) and the Travis L. Williams center (7,516).<sup>47</sup> The number of persons served represent less than 10 percent of the individuals living in poverty in the City.

Services were delivered to a diverse cross-section of Phoenix residents. Services were provided to residents of all ages. Of the total clients served, 45.5 percent were children, somewhat higher than the 39.1 percent proportion of all residents living in poverty who are children. Individuals over the age of 60 years account for 7.2 percent of residents in poverty and 8.1 percent of individuals served by the family services centers. Persons of Hispanic descent account for 61.0 percent of residents living in poverty, but only 38.9 percent of those served by the family service centers while Black residents represent 8.8 percent of residents living in poverty, but 31.7

<sup>45</sup> Source: Family Assistance Administration Statistical Bulletin, July 2015. Downloaded from <https://des.az.gov/documents-center?qt-content-tab=1>.

<sup>46</sup> Source: Department of Economic Security, Financial Services Administration.

<sup>47</sup> The sum of the individual locations exceeds the total number of individuals served because individuals may have received services from more than one location.

percent of services users. Of the families served, 37.4 percent are single mothers and 16.7 percent are two-parent households.

## Section II-2: Individuals Experiencing Homelessness

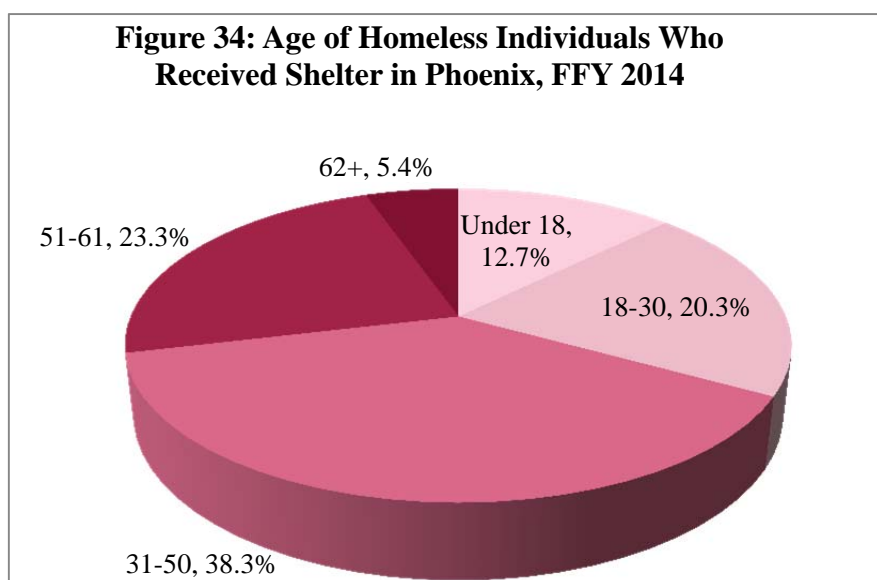

A subset of individuals living in poverty is those experiencing homelessness. For obvious reasons, it can be difficult to obtain accurate counts of the number of individuals who are homeless and to survey them.

### *Demographics of Individuals Experiencing Homelessness*

Information regarding individuals who seek shelter is collected through the federal Department of Housing and Urban Development's (HUD) Homeless Management Information System (HMIS). HUD publishes annual homeless assessment reports for various jurisdictions, including the City of Phoenix, that summarize data relating to individuals who received shelter and provide estimates to account for providers that do not participate in HMIS.<sup>48</sup> The report provides both an estimate of the number of individuals who received shelter during a one-year period as well as details regarding those in shelter at specific points-in-time.

In federal fiscal year 2014 (October 1, 2013 through September 30, 2014), an estimated 18,126 individuals experiencing homelessness sought shelter services. Of the total estimated population experiencing homelessness, 28.2 percent were individuals in families and 71.8 percent were single individuals. Totaling 10,345, single males were the largest category of individuals who sought shelter, followed by 3,446 single females. There were 2,725 children who received shelter services, including 273 unaccompanied minors.

Figure 34 displays the distribution of ages among individuals experiencing homelessness as reported to HMIS. Overall, children accounted for 12.7 percent of those who received shelter services. Most of these children were less than 12 years of age. After this group, there appears to be a fairly even distribution of ages through 61 years. Individuals over the age of 61 years accounted for only 5.4 percent of those who received shelter services.

<sup>48</sup> Source: <http://hudhdx.info/publicReports.aspx>. Downloaded AZ-502 Phoenix (AZ) report November 27, 2015.

Of the adults, 41 percent were disabled and 16 percent were military veterans. In terms of race and ethnicity, individuals who are non-Hispanic White accounted for 41 percent of the population experiencing homelessness, followed by individuals who are Black (25 percent) and Hispanic (24 percent).

Additional information regarding individuals receiving shelter services anywhere in Maricopa County is produced by the Maricopa County HMIS Project. Highlights of its Continuum-wide Housing Demographics Report for fiscal year 2014 include:<sup>49</sup>

- More than 38 percent of those accessing shelter were homeless for the first time while 14 percent were considered chronically homeless
- The most common causes of homelessness were lack of financial resources or loss of a job (22 percent) followed by loss of their home due to eviction, foreclosure, or family issues (12 percent)
- Of those who reported a disability, 26 percent had a mental health issue and 16 percent reported drug or alcohol abuse
- About 16 percent reported they had been a victim of domestic violence, including 49 percent of this group who had been a victim within the past twelve months

Less is known about individuals experiencing homelessness who do not seek shelter services. An annual point-in-time street count is coordinated by the Maricopa Association of Governments (MAG). It is conducted by volunteers who attempt to count the number of individuals who are homeless and not in a shelter on a given night. According to the 2014 Homeless Street Count, there were 1,053 homeless individuals living on the streets in Maricopa County on January 27, 2014.<sup>50</sup> The overall count continues a multi-year decline. Some observers believe, however, the decrease is a result of difficulties in identifying people living on the streets rather than a real reduction in the number of individuals experiencing homelessness.

### *Select Supports Available to Individuals Experiencing Homelessness*

According to HMIS data, there were 4,733 slots to serve individuals experiencing homelessness in federal fiscal year 2014, including emergency shelter beds, transitional housing beds, and permanent supportive housing beds. The total was spread across the three bed-types with 1,708 year-round equivalent emergency shelter beds, 1,638 transitional housing beds, and 1,387 permanent supportive housing beds. Since that time, Central Arizona Shelter Services' Men's Overflow Shelter and East Lot have been closed as stakeholders continue the shift towards a housing first strategy.

---

<sup>49</sup> Source: <http://www.211arizona.org/hmis/FY2014.pdf>. Accessed November 17, 2015.

<sup>50</sup> Source: [http://www.azmag.gov/Documents/CoC\\_2015-01-22\\_PIT-Count-2014\\_Homeless-Populations-Count-Report.pdf](http://www.azmag.gov/Documents/CoC_2015-01-22_PIT-Count-2014_Homeless-Populations-Count-Report.pdf). Accessed November 17, 2015.

Figure 35 illustrates the number of individual served in each setting. As the chart demonstrates, the bulk of shelter services were provided in emergency shelters, rather than transitional housing or permanent supportive housing. Because individuals tend to stay in emergency

shelters for shorter periods, an emergency shelter bed serves more individuals in a year, an average of 7.8 persons per year compared to 2.1 in transitional housing, and 1.0 in permanent supportive housing. Of note, all of these figures exceed those from federal fiscal year 2011. The number of persons served in permanent supportive housing grew at the fastest rate and increased from 485 individuals to 1,411. This emphasis is consistent with City and provider efforts to rapidly house individuals and then provide wrap-around supports.

The City's Watkins Emergency Shelter provided services to approximately 2,400 individuals in fiscal year 2014.

The City's Housing Department also provides important services to low-income residents. The Department manages more than 5,000 City-owned units of public and affordable housing, as well as almost 6,500 housing choice vouchers. The Housing Department reports these programs provide homes for more than 25,000 residents. However, the demand for housing assistance greatly exceeds the supply. A recent survey found more than 26,000 individuals on waiting lists for federal rental assistance programs.

### Section II-3: Low-Income Children

The City's Human Services Department funds Early Head Start and Head Start programs for low-income children through agreements with school districts and community providers.

#### *Demographics of Low-Income Children*

There are nearly 41,400 children less than five years of age living in poverty in Phoenix. An estimated 60 percent, about 24,800 children, are under three years old and therefore meet the age requirements for Early Head Start. The remaining 16,600 children are three or four years old, or the age of most children served by Head Start. Of these totals, an estimated 14,102 birth-to-three year-olds reside in the City's Early Head Start service area and 12,358 three and four year-olds live in the areas served by the Human Services Department's Head Start delegate agencies.

Figure 36 displays the racial composition of young children in poverty in the City. More than three-quarters of the children under five years old and living in poverty are Hispanic. In only the

In only the Deer Valley service area is the proportion of young children in poverty who are Hispanic under 50 percent. In six service areas, at least ten percent of the young children in poverty are Black.

Nearly half of young children in poverty live in households led by a single woman.

**Figure 36: Race/Ethnicity of Children Under 5 Years Old in Poverty in Phoenix**

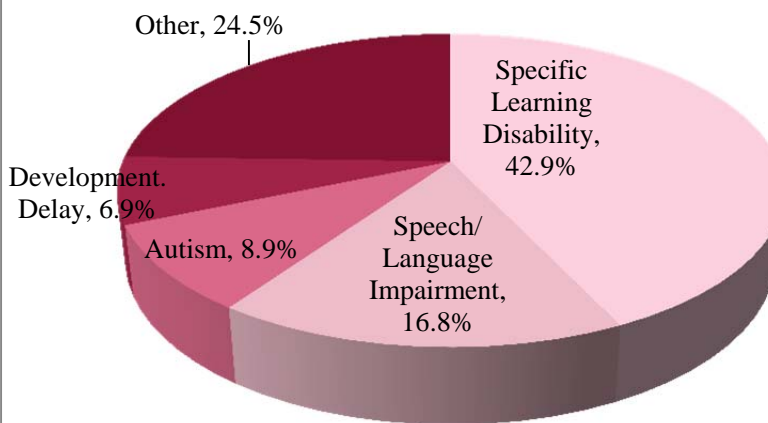

Children with disabilities are a special focus of the Head Start program with the Head Start Act requiring at least ten percent of the children enrolled by each Head Start agency and each delegate agency be children with disabilities.<sup>51</sup>

The broadest available information related to disability rates are the special education counts tracked by the Arizona Department of Education. City-wide, there were 24,758 children with disabilities. As noted previously, children with disabilities are much more likely to attend traditional district schools than charter schools.

Figure 37 summarizes the types of disabilities reported for these children. The most common reported disability is a specific learning disability, accounting for almost 43 percent of all disabilities, followed by speech/language impairments, autism, and developmental delay. Other disabilities include intellectual disability, emotional disability, and hearing and vision impairments.

**Figure 37: Composition of Disabilities for Phoenix Children in Kindergarten Through 3rd Grade**

<sup>51</sup> 42 United States Code § 9837.

### *Select Supports Available to Low-Income Children*

There are a number of programs that support low-income families with children, including preschool and child care programs, home visitation programs, and health and wellness programs. Additionally, the Arizona Early Childhood Development and Health Board (referred to as First Things First) is dedicated to providing a variety of services to preschool aged children.

There are several publicly funded preschool programs in the State, including Early Head Start and Head Start. These programs, though, fall far short of meeting the need for preschool programs. In fact, American Community Survey data shows that Arizona has the fourth-lowest proportion of its three and four year-olds enrolled in school.

Federal regulations generally require 90 percent of participants to be living in families with incomes below the federal poverty level. Head Start provides services to children from three to five years old while Early Head Start serves children from birth through two years of age. Services support the education, nutrition, health, and developmental needs of children as well as assist the families of participating children.

Responsibility for the delivery of Head Start and Early Head Start services in the City of Phoenix is divided across five organizations that are direct grantees of federal funds. In addition to the City, other grantees that serve specified geographic areas that include some portion of the City are Maricopa County, Southwest Human Development, Chicanos Por la Causa, and Crisis Nursery. The City, in turn, has 10 delegate agencies that deliver Head Start services in specified non-overlapping geographic areas. Most delegate agencies have multiple locations. Appendix K includes maps of the City's Head Start and Early Head Start service areas.

HSD is funded for 3,090 'slots', effectively the number of children who could be served for a full year. HSD, in turn, assigns these slots to its 9 delegate agencies. The number of children who receive services over the course of a year will generally exceed the number of slots as children who leave the program are replaced by others. HSD also has Early Head Start funding for 300 home-based slots and 188 childcare partnership slots.

HSD's 3,090 Head Start slots is equal to only 25.0 percent of all eligible children while the 488 Early Head Start slots represent only 3.5 percent of the estimated 14,102 eligible children. Figure 38 displays the ratio of slots to estimated eligible children by delegate agency.

In general, the number and location of Head Start sites in the delegate agencies' service areas would appear to facilitate access when slots are available. Based on current site locations, almost two-thirds of eligible children are within one mile of a site and 93 percent are within three miles as illustrated by Figure 39. In both the Deer Valley and Greater Phoenix Urban League service areas more than 15 percent of eligible children are further than 3 miles from a site.

**Figure 38: Estimated Eligible Population and Service Levels for Phoenix Early Head Start and Head Start By Phoenix's Delegate Agency**

In addition to the Early Head Start and Head Start programs, there are numerous child care providers located in the delegate agencies' service areas. The Arizona Department of Health Services (DHS) is responsible for licensing most child care facilities in the State, including centers (facilities providing paid care to five or more children), small group homes (residential locations in which paid care is provided to between five and ten children), and public schools providing child care services, including Head Start providers. As of February 1, 2016, there were a total of 236 DHS-licensed child care providers with capacity for more than 24,000 children in the area covered by the delegate agencies, as summarized in Figure 40.<sup>52</sup> Additionally, families may receive child care from small family homes with four or fewer children that are certified by the Arizona Department of Economic Security (DES) or non-

<sup>52</sup> Source: [http://www.azdhs.gov/als/databases/providers\\_cc.pdf](http://www.azdhs.gov/als/databases/providers_cc.pdf). Accessed February 2, 2016.

certified relative providers, but only about 15 percent of families using DES child care subsidies receive care from these provider types.<sup>53</sup>

Provider capacity, however, does not guarantee access for low-income families. According to DES' 2014 Child Care Market Rate Survey, the median daily cost of center-based child care in Maricopa County is \$44.19 for infants; \$40.00 for one and two year-olds; and \$35.00 for three, four, and five year-olds.<sup>54</sup> Assuming 21.7 weekdays per month, the median monthly cost ranges from \$760 to \$960. For a family of three living at the poverty level (\$1,674 per month), the cost of center-based child care for a single child is as much as 45 percent to 57 percent of their total earnings. Consequently, low-income families often require assistance in order to access paid child care.

The primary child care assistance program in Arizona has historically been the subsidy program administered by the Arizona Department of Economic Security. The program generally provides subsidies for children up to twelve years of age to families receiving cash assistance when necessary to support their job development efforts, those transitioning from cash assistance to employment, those earning up to 165 percent of the federal poverty level, and families involved with the Department of Child Safety (DCS). The subsidies are available for children from birth to 12 years of age and are intended to remove the lack of child care as a barrier to employment and, except for DCS-involved families, recipients must be employed or looking for work while receiving cash assistance. Working families must make copayments set on a sliding scale based on their incomes.

<sup>53</sup> Arizona Child Care Development and Fund (CCDF) Plan for FFY 2012-2013, p. 80. Accessed November 30, 2012 at [https://www.azdes.gov/InternetFiles/Reports/pdf/child\\_care\\_development\\_fund\\_plan\\_2012-2013.pdf](https://www.azdes.gov/InternetFiles/Reports/pdf/child_care_development_fund_plan_2012-2013.pdf).

<sup>54</sup> Source: <https://des.az.gov/sites/default/files/legacy/dl/MarketRateSurvey2014.pdf>. Accessed November 30, 2015.

Funding for the DES child care program has been significantly reduced in recent years, falling from \$198.5 million in fiscal year 2008 to \$98.4 million in fiscal year 2016.<sup>55</sup> As a result of these funding cuts, the statewide number of children receiving assistance has declined 43.2 percent, from 54,343 to 30,829, between July 2008 and July 2015.<sup>56</sup> Additionally, a waiting list has been in effect at various times since February 2009. As of February 5, 2016, there were 4,304 children on the waiting list.<sup>57</sup>

Figure 41 notes the number of children under five years of age receiving DES subsidies and the number on the waiting list in each of the delegate agencies' service areas.

**Figure 41: DES Child Care Subsidy Caseload Birth to Five Years by Delegate Agency (Jul. 2015)**

	Alhambra	Booker T. Washington	Deer Valley	Fowler	Greater Phx Urban League (GPUUL)	Murphy	Roosevelt	Washington	Wilson	Total – Phoenix Delegate Agencies
Under 5 Caseload	334	78	218	113	2,046	53	482	881	16	4,221
Under 5 Wait List	91	15	35	25	289	12	125	196	4	792

As shown in the table, the Greater Phoenix Urban League service area has the greatest number of young children receiving child care subsidies, followed by Washington and Roosevelt. The table also shows there were 792 young children on the waiting list for subsidy assistance. However, it is believed this number is an underestimate because the waiting list has been in effect in most months since February 2009, likely discouraging applicants. Additionally, families on the waiting list must periodically reapply, but there is little incentive to do so when they are not receiving assistance, so many do not reapply and are removed from the list.

Despite these programs, Arizona has one of the lowest rates of school enrollment amongst three and four year-olds. Only 35.9 percent of three and four year-olds are enrolled in preschool, a rate that trails only Nevada, Idaho, and North Dakota. The national average is 47.4 percent. The enrollment rates in the City's Head Start service areas are even lower, as displayed in Figure 42.

In addition to Early Head Start home-based services, there are a variety of other home visitation programs available to pregnant women and families with children under five years of age. These programs are part of a network titled Strong Families AZ. As described on the Strong Families AZ website<sup>58</sup>, programs available in at least some parts of Phoenix include:

- Early Head Start
- Healthy Families Arizona supports pregnant women and parents of newborns facing obstacles to successful parenting throughout the first five years of the child's life. The program links families to community resources, health care, child care, and housing; helps parents obtain education and employment; provides child development, nutrition, and safety education; and provides developmental screenings.
- The High Risk Perinatal/ Newborn Intensive Care Program is dedicated to reducing maternal and infant mortality through a variety of interventions for certain babies that required time in a neonatal intensive care unit.
- The Nurse-Family Partnership program supports low-income first-time mothers less than 28 weeks pregnant through home visits by nurses who help build parenting skills.
- The Parents as Teachers program is available to parents-to-be and parents with children under five years of age and helps to develop stronger relationships between parent and child.

The women, infants, and children program (WIC) program provides vouchers to pregnant, breastfeeding, and postpartum women, and infants and children under five years of age to allow them to purchase certain nutritional foods. The program also provides nutrition education and referrals to health and social services. In order to qualify, clients

<sup>58</sup> <http://strongfamiliesaz.com/>

must have incomes below 185 percent of the federal poverty level. Figure 43 compares the number of WIC recipients between 2009 and 2014.<sup>59</sup> With more than 16,000 recipients in 2014, Maryvale had more than twice as many residents using the program as the next greatest village. The three northern-most villages had fewer than 300 recipients each.

Several programs exist to support children with disabilities, including Children's Rehabilitative Services (CRS) administered by AHCCCS and DES' Arizona Early Intervention Program (AzEIP) and Division of Developmental Disabilities (DDD).

CRS provides Medicaid-funded health care services to children and young adults under 21 years of age with serious chronic and disabling conditions such as congenital heart disease and cystic fibrosis. As of February 2016, 16,725 children were enrolled statewide.<sup>60</sup> Prior to fiscal year 2010, the State operated a 'state-only' program for about 4,500 children who were not Medicaid eligible, but the program was eliminated that year as part of budget cuts made in response to declining revenues.

AzEIP provides a continuum of developmental services (including physical, occupational, and speech therapy; service coordination; and special instruction) to infants and toddlers under three years of age with, or at risk of, developmental delays or disabilities to promote the child's development and facilitate the child's successful engagement in relationships, activities, routines, and events of everyday life. More than 1,500 Phoenix children were enrolled in July 2015.

DDD provides a variety of habilitative and medical services to individuals with intellectual and developmental disabilities, including cognitive disabilities, cerebral palsy, and autism. The program served 1,327 children under the age of six years in July 2015.

Arizona First Things First (FTF) supports a variety of programs that support young children. The agency was created by Proposition 203, a citizen initiative approved by voters in November 2006. The proposition also created a new 80-cent per pack of cigarettes tax to fund the agency. FTF funds a variety of early childhood development and health programs for Arizona children through five years of age intended to ensure they begin school healthy and ready to succeed. The tobacco tax generates about \$120 million annually and the majority of these funds are directed to 31 regional partnership councils that allocate the dollars based on local needs. First Things First funds are directed to four priority areas: quality early care and education, strengthening families, early literacy, and preventive health.

The City of Phoenix is largely divided between two partnership councils: Phoenix North and Phoenix South, with Thomas Road as the dividing line. According to their 2015 impact reports, Phoenix North spent \$19.9 million and Phoenix South expended \$21.4 million, producing outcomes including:<sup>61</sup>

- 8,590 children in Phoenix North and 6,844 children in Phoenix South received child care through programs participating in Quality First, which aims to improve the quality of early learning
- 2,667 children in Phoenix South and 2,434 children in Phoenix North received scholarships to access high quality child care
- 8,988 families in Phoenix South and 7,840 families of newborns in Phoenix North left the hospital with tools to help them support their child's health and learning
- 1,291 parent and other caregivers in Phoenix North and 1,033 in Phoenix South completed a series of classes on parenting skills, brain development, and early literacy and nutrition
- 9,450 vision, hearing, and developmental screenings were completed in Phoenix South and 4,104 were completed in Phoenix North

## Section II-4: Older Residents

There are 208,913 individuals in the City of Phoenix who are 60 years of age or older, 13.8 percent of all residents. This is a significantly smaller proportion than the State as a whole, in which 20.5 percent of residents are 60 years or older.

### *Demographics of Older Residents*

In six villages –Paradise Valley, North Mountain, Desert View, Camelback East, Rio Vista, and Ahwatukee Foothills – more than 15 percent of the population is at least 60 years of age – while

**Figure 44: Land Area and Seniors Within Specified Distances of a Senior Center**

	<u>Land Area</u>	<u>60+ Pop.</u>
Within 1 Mile	7.9%	15.1%
Within 3 Miles	46.5%	72.7%

the proportion in three villages – Estrella, Laveen, and Maryvale – is less than 10 percent. The City has strategically located its 15 senior centers in areas with the greatest numbers of older residents. Figure 36 displays the physical land area that is within one and three miles of a senior center and the number of seniors within

these same distances. As the table demonstrates, only 46.5 percent of the City's land area is within three miles of a senior center, but 72.7 percent of residents over 60 years of age live within that distance to a center. Appendix K includes several maps that illustrate the areas of the City with the greatest number of older residents and senior center locations.

Twenty-nine (29) percent of the 60 and older population is currently employed. As would be expected, employment decreases as age increases. The employment rate is 51.8 percent for individuals between 60 and 64 years and falls to 24.8 percent and 6.5 percent among those between 65 and 74 years and older than 75 years of age, respectively.

As a group, older individuals are more affluent than other age groups. The senior poverty rate of 12.1 percent is substantially less than the City's overall 23.2 percent poverty rate. The senior

poverty rate in Central City is 38.4 percent, almost twice as great as the second-highest village. In contrast, the senior poverty rate in Rio Vista and Desert View is less than five percent.

The racial/ethnic composition of older Phoenix residents is much different than the City overall, as illustrated by Figure 45. Whereas less than half of the overall population is White, 71.4 percent of the population over the age of 60 years is White. Conversely, individuals of Hispanic descent comprise more than 40 percent of the total population, but only 17.7 percent of the older age groups. Seniors of non-Caucasian descent are more than twice as likely to live in poverty as are older White residents.

Phoenix has 142,410 households with at least one resident over the age of 60 years. More than 57,000 of these are seniors living alone.

There are more than 40,000 Phoenix households in which a grandchild is living with one or more grandparents of any age. In the majority of these families, the grandparents are not financially responsible for the grandchild(ren), leaving 15,379 grandparents who do shoulder that financial responsibility. In most of these homes, a parent is present, but apparently unable to provide financially for the child. There are 3,379 households in which no parent is present in the home, including 1,765 in which the grandparents are over sixty years of age.

There are 10,290 households in which grandparents and grandchildren reside together in Maryvale, which is more than one-in-six of all households in this village. Estrella, Laveen, and South Mountain have similarly high proportions of these households. These are also the villages that have some of the highest poverty rates in the City, which may explain the number of multigenerational homes.

### *Select Supports Available to Older Residents*

Probably the best known support for older individuals is Social Security. The income support program provides monthly payments for, to use its acronym, old age, survivors, and disability insurance (OASDI). As of December 2014, 1.2 million Arizonans were receiving Social Security benefits, an increase of 9.3 percent compared to 1.1 million recipients in December

2011.<sup>62</sup> In 2014, about 850,000 individuals were retirees, 200,000 were survivors, and 150,000 were individuals with disabilities. Aggregate monthly benefits for all recipients totaled \$111 million.

Figure 46 compares the number of Social Security recipients in Phoenix in December 2007, 2011, and 2014. Between 2011 and 2014, the number of Social Security recipients in Phoenix increased 9.9 percent, to 181,173. As a percent of total Social Security recipients, Desert View, Ahwatukee Foothills, Paradise Valley, Rio Vista, and North Gateway had the highest proportions of retirees, while Central City, Maryvale, Encanto, Estrella, and Laveen had the highest rates of individuals with disabilities.

The City's senior centers provide a number of services to seniors, including nutrition programs, educational opportunities, recreation and socialization programs, and transportation. In fiscal year 2014, the centers offered breakfast four days per week and a morning snack one day per week and lunch five days per week. The Human Services Department provided a total of 480,000 congregate and home-delivered meals to seniors in fiscal year 2014.

## Section II-5: Victims of Violent Crime and Child Welfare

The City provides services to victims of crime through its Family Advocacy Center (FAC). As appropriate, the FAC will make referrals to and work with the State's Department of Child Safety (DCS) program for cases that involve child abuse or neglect.

### *Victims of Violent Crime*

According to the Federal Bureau of Investigation's Uniform Crime Reporting Statistics cited earlier in this report, there were 8,749 violent crimes in the City reported in 2014. Figure 47

**Figure 47: Violent Crimes Reports By Type in Phoenix, 2014**

Homicide	114
Forcible Rape	1,006
Robbery	2,952
Aggravated Assault	4,677
<b>Total</b>	<b>8,749</b>

details the reported crimes within this category. In fiscal year 2015, the FAC provided services to approximately 4,000 crime victims, 87.3 percent of whom were victims of domestic violence and 19.8 percent of whom were victims of sexual assault. However, the FAC's caseload is not directly comparable to the reported crime counts because certain crimes, such as domestic violence, frequently go unreported.

<sup>62</sup> Source: [http://www.ssa.gov/policy/data\\_date.html](http://www.ssa.gov/policy/data_date.html). Downloaded November 3, 2015.

There is not a demographic ‘profile’ of persons who are crime victims as crime spans individuals of all ages, racial and ethnic backgrounds, and economic classes. However, the concentration of crime provides some insight into those who are more likely to be affected. As noted in Section I-6, violent crimes occurs in every Phoenix village, but the greatest numbers are in the central parts of the City. As described earlier in this report, residents of these areas are more likely to be living in poverty, to be non-White, and to speak a language other than English.

The demographic data collected by the FAC supports some of these assumptions. Of the approximately 4,000 individuals who received services from the FAC in fiscal year 2015:

- 93 percent were women
- By age, 7 percent were under 12 years old, 4 percent were 13 to 17 years, 28 percent were 18 to 29 years, 38 percent were 30 to 44 years, 22 percent were 45 to 64 years, and 1 percent were 65 years or older
- 58 percent spoke a language other than English

The FAC offers a variety of services, including information and referral to available community resources; forensic exams; counseling; assistance with safety planning, injunctions against harassment, and orders of protection; identifying shelter; providing financial assistance and vouchers; and aiding with transportation.

### *Child Welfare*

The State, through the Department of Child Safety, is responsible for child protection and child welfare services. DCS investigates reports of neglect and abuse. The number of reports statewide has increased dramatically in recent years, from 35,019 in fiscal year 2008 to 40,389 in 2012 to 51,784 in 2015.<sup>63</sup> DCS reports in Phoenix grew at a similar rate, increasing 50.3 percent compared to fiscal year 2008 and 29.2 percent compared to fiscal year 2012. There were more than 14,500 reports of neglect and abuse in Phoenix in fiscal year 2015, about 28.0 percent of the statewide total. It is rare for any household to have contact with DCS, but the villages with the highest rates of investigations were Central City, Alhambra, Estrella, South Mountain, Maryvale, and Laveen.

When DCS does not believe a child can remain safely in their home, they remove the child and place him or her in foster care. Between July 2008 and July

<sup>63</sup> Source: Department of Child Safety

2015, the number of Arizona children in foster care increased 79.3 percent to 17,981.<sup>64</sup> The number of Phoenix children in foster care grew much more quickly, by 130.6 percent, to 4,701, during this period. Figure 48 illustrates this growth as well as the types of placements into which children were placed. Unlicensed placements are typically relatives or other individuals with whom the child has a relationship; congregant placements include shelters and group homes.

When a child cannot be returned home, CPS seeks a permanent placement, usually a guardianship or adoption. In guardianships, natural parents' parental rights have not necessarily been severed. Between 2008 and 2015, the number of children in adoptions and guardianships from foster care in Phoenix grew 298 percent and 133 percent, respectively.<sup>65</sup> Figure 49 presents the totals.

<sup>64</sup> Ibid.

<sup>65</sup> Ibid.

## Part III: Community Survey Results

In order to hear directly from Human Service Department clients and partners, the City conducted a survey as well as two focus groups. The surveys and focus groups sought to capture the perceptions of clients and partners related to the strengths and needs of their neighborhoods and HSD services.

The client survey was conducted in January and February 2016. The survey was made available online in English and Spanish and at Head Start delegate agency sites, senior centers, and family services centers. A separate online survey was emailed to a sample of HSD partners, including providers, advocates, and HSD Commission members. Similar surveys were conducted in 2013, allowing results to be compared. The survey documents, as well as detailed response totals for each question, are included in Appendix I.

### Section III-1: Client Feedback

A combined 2,246 client surveys (2,021 English and 225 Spanish) were completed. Of these, 204 indicated they participated in Early Head Start services within the past year, 631 received Head Start services, 268 attended a senior center, 65 utilized a Family Service Center, 54 received services from the Watkins Homeless Shelter, 20 used a family advocacy center, and 70 received volunteer income tax assistance (VITA). Respondents may have used multiple services, making this a duplicated count. A total of 1,171 respondents did not report receiving any services.

Illustrating the value that clients place on services provided by HSD and other City departments, survey participants ranked ‘City services’ as their neighborhoods’ greatest strength. City services were at or near the top of the list for all client groups. Other commonly-cited strengths

<b>Figure 50: Client Survey Results –Neighborhoods’ Greatest Strengths</b>			
<u>Client Group</u>	<u>1<sup>st</sup> Strength</u>	<u>2<sup>nd</sup> Strength</u>	<u>3<sup>rd</sup> Strength</u>
Early Head Start-In Home	City Services	Good Schools	Public Transportation Caring Neighbors (tie)
Early Head Start-Child Care	City Services Good Schools (tie)		Public Transportation
Head Start	City Services	Good Schools	Affordable Housing
Senior Center	City Services	Public Transportation	Caring Neighbors

Watkins Emergency Shelter	Public Transportation	City Services	Affordable Housing
Family Advocacy Center	Good Schools	City Services Positive Police Presence Public Transportation (tie)	
Volunteer Income Tax Assist.	City Services	Public Transportation	Affordable Housing

include public transportation, affordable housing, and good schools. Figure 50 shows the top three reported strengths for each client group. These results largely track those from 2013.

Clients' support of HSD programs is further evidenced by their high satisfaction ratings. The survey asked clients to use a five-point scale to rate several aspects of the program(s) in which they participate, including convenience of location, hours of operation, quality of services, and availability of other services. Early Head Start and Head Start programs were rated particularly highly, with no average score lower than 4.35. Family services centers, senior centers, and VITA also rated well, with all scores averaging 4.00 or higher. Scores for the Watkins Emergency Shelter (averages from 3.29 to 3.70) and the Family Advocacy Center (averages from 3.63 to 3.87) were not as high, although still above the neutral rating of 3.00.

When asked about the greatest challenges facing their neighborhoods, Early Head Start and Head Start clients mentioned a lack of after-school activities and a lack of community resources while other client groups were most likely to mention crime-related issues including drug use and property crime. Figure 51 lists the top three selections for each client group. As with the strengths, reported challenges are consistent with those reported in 2013.

<b>Figure 51: Client Survey Results –Neighborhoods' Greatest Challenges</b>			
<u>Client Group</u>	<u>1<sup>st</sup> Challenge</u>	<u>2<sup>nd</sup> Challenge</u>	<u>3<sup>rd</sup> Challenge</u>
Early Head Start-In Home	Lack of Community Resources	Drug Use	Lack of After-School Activities
Early Head Start-Child Care	Lack of Community Resources	Lack of After-School Activities	Lack of Affordable Housing
Head Start	Lack of Community Resources	Drug Use	Lack of After-School Activities
Senior Center	Property Crime Drug Use (tie)		Not Enough Police
Family Services Center	Drug Use	Property Crime	Lack of Affordable Housing Property Blight (tie)
Watkins Emergency Shelter	Drug Use	Property Crime	Lack of Good Jobs No Affordable Housing Property Blight (tie)
Family Advocacy Center	Lack of Affordable Housing	Property Crime	Drug Use Lack of Good Jobs Juvenile Crime/Gangs Not Enough Police Property Blight (tie)
Volunteer Income Tax Assist.	Property Crime	Drug Use	Not Enough Police

The survey included several questions relating to health care and health insurance. Of note, 26 percent of respondents reported that either they or a child in their home needed health care services that they did not receive. This is a significant increase from 17 percent in 2013. Interestingly, the increase in foregone health care coincides with an increase in access to health insurance with 89 percent of respondents reporting that they had health insurance compared to 71

percent in 2013. However, when asked why they did not get care, most residents reported that they did not have health insurance or cannot afford copayments.

Clients were asked more broadly about what services that they are not currently receiving would be most helpful to them and their families. The three most frequently cited services are noted in Figure 52.

<b>Figure 52: Client Survey Results –Desired Services</b>			
<u>Client Group</u>	<u>1<sup>st</sup> Service</u>	<u>2<sup>nd</sup> Service</u>	<u>3<sup>rd</sup> Service</u>
Early Head Start-In Home	English Instruction	Dental Care	Full-Day Head Start
Early Head Start-Child Care	English Instruction	Dental Care	Full-Day Head Start
Head Start	Dental Care	Full-Day Head Start	English Instruction
Senior Center	Dental Care	Senior Centers	Home Repair
Family Services Center	Dental Care	Rent/Mortgage Assist.	Home Repair
Watkins Emergency Shelter	Dental Care	Rent/Mortgage Assist.	Transportation
Family Advocacy Center	Dental Care	Employ./ Job Training	Full-Day Head Start
Volunteer Income Tax Assist.	Dental Care	Home Repair	Utility Assistance

As with the 2013 survey, the most frequently reported need was dental care. English instruction was commonly mentioned by Early Head Start and Head Start clients in both 2013 and 2016 while full-day Head Start was not included in the 2013 survey. Other client groups were more likely to mention housing assistance, generally consistent with 2013 results.

When asked about the barriers to receiving services, clients mentioned that they were not aware of available services, that they did not quality, and that they could not afford copayments.

In addition to the survey, two focus groups were conducted – one with Early Head Start and Head Start clients and one with senior center volunteers and staff – to allow for more in-depth conversation regarding these programs.

Participants in the Early Head Start and Head Start group indicated their satisfaction with the programs and their belief that the programs were preparing their children for school in terms of emotional maturity, ability to follow instructions, being prepared for new environments, and good health. The group noted their involvement in the programs as parents and guardians in order to underscore lessons from the program, but noted that other parents may not be similarly engaged due to language barriers, work responsibilities, background check requirements, and cultural issues.

The group offered several suggestions for enhancing parental supports, including providing information regarding new teaching methods, increasing Spanish-speaking staff and offering more English as a second language instruction, hiring more social workers, and easing fingerprint clearance card requirements. The group also devoted time to discussing the importance of male role models in children's lives. The group believed that the programs could better involve males by developing events that are geared towards men (for example, sports and outdoor activities), by being more inclusive (that is, not focusing only on biological fathers), and by scheduling activities outside of work hours.

Attendees in the senior center group were similarly complimentary about the services offered at the centers. The group agreed that the most important aspect of the centers was simply providing an opportunity for social interaction and engagement. The group also noted the importance of providing a meal. Outings, particularly to other centers were reported to be particularly popular.

When prompted to identify opportunities to enhance the senior center experience, the group made a number of suggestions. Several mentioned the need to update the physical space, such as changing paint colors and incorporating more natural light, to make the centers more inviting. A number of participants mentioned that they receive complaints about the food that is offered. The group suggested increasing staffing at the centers, as well.

In terms of programs, the group suggested more physical activity, more computer instruction, and multi-generational programming. The group did note that some clients may not appreciate changes. For example, some exercise activities that have been established are little-used. For centers that are co-located with other programs, some seniors complain about sharing space with children or others. The group also voiced support for allowing more outings.

The group agreed that the most valuable source of new members is word of mouth. To reach a larger audience, the group suggested increasing awareness through marketing efforts and establishing a social media presence. The group also noted the importance of creating positive first impressions. In addition to the physical space noted above, the group suggested playing music at centers that are not already doing so and ensuring that equipment and computers are in working order.

### Section III-2: Partner Feedback

A total of 306 partner surveys were received. Respondents included Human Service Commission members, program staff, and employees in other City Department (such as the Office of the Prosecutor and the Neighborhood Services Department), community and non-profit organizations that work with HSD, and faith leaders.

The partner survey included several questions that were identical to those asked in the client survey. Although there is some overlap in the perceptions of clients and partners, there were a number of disconnects.

When asked about City neighborhoods' greatest strengths, partners ranked city services first, followed by public transportation, and strong cultural ties. In contrast to the client responses, affordable housing and good schools were ranked low by partners.

In terms of neighborhood challenges, the top-three ranked items were drug use, property blight, and lack of good jobs. Drug use was a concern expressed by many clients, but other issues that were frequently cited by clients such as a lack of community resources, a lack of after-school activities, a lack of affordable housing, and a shortage of police were ranked less highly by partners.

When asked what services clients most need, partners ranked employment assistance/ job training first, followed by child care and utility assistance. In contrast, clients were more focused on dental care, English instruction, full-day Head Start, and rent/ mortgage assistance.

Partners were also invited to offer their opinions on the strengths of HSD programs and recommendations for improvements.

Three survey participants identified themselves as members of the Human Service Commission. When describing the strengths of HSD, they mentioned its leadership and accountability, professionalism, and openness to new ideas. Their suggestions for improving programs include clearly identifying and articulating service gaps, engaging in more overt advocacy and involving Commissioners, offering longer access to assistance, and providing wrap-around services for persons experiencing homelessness.

A number of staff responsible for the operation and delivery of HSD programs completed the survey. A primary theme across staff in all programs include describing employees as one of the key strengths of HSD programs, describing them as dedicated, knowledgeable, caring, and willing to go above and beyond. Relatedly, staff suggested that more employees should be hired, that more training should be provided, and that there should be more communication. Staff across programs also agreed that HSD programs should receive more funding.

Head Start staff highlighted strengths that include providing individualized and child-centered services, involvement of whole family, and the availability and affordability of services. In terms of improvements, staff suggested providing full-day services, facilitating access to child care, offering transportation, and hiring a more diverse workforce.

Responses from senior center staff were consistent with findings from the senior center focus group. They listed the primary benefits of the service as the opportunity for socialization and the provision of a nutritious meal. They also noted the need for more transportation assistance.

Staff at family service centers emphasized connections across programs, non-profits, and the community. They also offered a number of suggestions for improvements, including operational issues (such as streamlining functions, addressing procurement issues, offering services outside of business hours) and programmatic issues (providing more financial counseling and offering more youth services).

Feedback from external partners were consistent with input discussed above. These partners reported that the primary strengths of HSD programs are the staff and partnerships with other organizations. Opportunities for improvement include increasing partnerships, securing more funding, improving communication and transparency, expanding Head Start and access to child care, and focusing on services for persons experiencing homelessness.

### Section III-3: Conclusion

Results from the surveys confirm observations from the data analyses and program inventories described in Part II. There are a wealth of resources available to individuals and families in need in Phoenix, but these services reach only a fraction of those that could qualify and benefit.

Individuals who access HSD services are generally very pleased with these supports. At the same time, HSD may consider options to establish or expand the services that clients report they most need as summarized in Figure 52.

Partners, including program staff and external partners, have similarly high opinions of the Human Services Department and value the services that it provides. The staff and departmental leadership were recognized as particular strengths, as were collaborations between City departments and external organizations. Although substantially positive, partners did offer a number of suggestions for further enhancing HSD that the Department may wish to consider as part of its planning.

## Appendix A-I: Community Assessment Demographic Data Overview

Demographic data included in the City of Phoenix Human Services Department's 2016 Community Assessment has been adapted from the Census Bureau's American Community Survey (ACS) five-year estimates for 2010 through 2014. This Appendix provides a brief overview of the ACS, lists the specific tables used in the Community Assessment, and outlines the methodologies used to map the data and combine race and ethnicity data.

### Background

The American Community Survey differs from the decennial Census in several important ways:

- The ACS is an ongoing survey that provides data every year, compared to the Census, which is conducted once per decade
- The ACS collects much more detailed demographic data than the Census, which only gathers data regarding gender, age, race/ethnicity, and home ownership
- The ACS is an estimate based on a sample – about one percent of households are surveyed every year – compared to the Census, which aims to collect data from every household

The first two bullets highlight the primary benefits of the ACS and the reasons it was used in the Community Assessment: its timeliness and the depth of information it provides.

The ACS makes available three different estimate timeframes: one-year, three-year, and five-year. The one-year estimates are the most timely because they are based entirely on data collected over the past year compared to the five-year figures for which 20 percent of the estimate is based on data from five years ago, 20 percent is derived from four year-old data, etc. The five-year estimates are derived from larger samples (that is, five years of surveys) so they will generally have a lower potential sampling error. Most importantly, data for individual census tracts are included only in the five-year estimates. In order to provide analyses at a sub-city level (i.e., across urban villages and Head Start service areas), the Community Assessment therefore uses the five-year estimates.

### ACS Tables Used

ACS data is made available online at [factfinder.census.gov/](http://factfinder.census.gov/). The Census Bureau has constructed a number of tables to summarize the data collected in the ACS. Figure A-1 lists the ACS data included in the Community Assessment and the table from which each was adapted.

**Figure A-1: Source of Demographic Data Included in Community Assessment**

<u>Demographic Data</u>	<u>American Community Survey (ACS) Table Used</u>
Total Residents (Total and Individuals Living in Poverty)	B17001: Poverty Status in Past 12 Months by Sex by Age
Household Composition (Total and Households Living in Poverty)	B17017: Poverty Status in Past 12 Months by Household Type by Age of Householder S1101: Households and Families
Households in Poverty with a Child Under Five Years of Age	B17010: Poverty Status in the Past 12 Months of Families by Family Type by Presence of Related Children Under 18 Years of Age by Age of Related Children
Age Ranges (Total and Individuals Living in Poverty)	B01001: Sex by Age B17001: Poverty Status in Past 12 Months by Sex by Age
Median Age	B01002: Median Age by Sex
Race/Ethnicity (Total and Individuals Living in Poverty)	B01001: Sex by Age B03002: Hispanic or Latino Origin by Race B17001: Poverty Status in Past 12 Months by Sex by Age B17020: Poverty Status in the Past 12 Months by Age
Citizenship (Total and Individuals Living in Poverty)	B17025: Poverty Status in the Past 12 Months by Nativity B05003: Sex by Age by Nativity and Citizenship Status
Language Spoken at Home/ Linguistic Isolation	B16002: Household Language by Household Limited English Speaking Status
Educational Attainment (Age 25+) (Total and Individuals Living in Poverty)	B17003: Poverty Status in the Past 12 Months of Individuals by Sex by Educational Attainment DP02: Selected Social Characteristics in the United States
Employment Status (Age 16+)	DP03: Selected Economic Characteristics B17005: Poverty Status in the Past 12 Months of Individuals by Sex by Employment Status
Household Income	DP03: Selected Economic Characteristics
Median Income	S1903: Median Income in the Past 12 Months (in 2010 Inflation-Adjusted Dollars)
Income as a Percent of Poverty (Age 55+)	B17024: Age by Ratio of Income to Poverty Level in the Past 12 Months
Households with One or More People 65 Years and Over	B11007: Households by Presence of People 65 Years and Over by Household Size and Household Type
Grandparents Living with Grandchildren	B10051: Grandparents Living with Own Grandchildren Under 18 Years by Responsibility for Own Grandchildren by Presence of Parent of Grandchildren and Age of Grandparent
Home Ownership Rates	B25008: Total Population in Occupied Housing Units by Tenure

Health Insurance Coverage	S2701: Health Insurance Coverage Status
Health Insurance by Age	B27010: Types of Health Insurance by Age

### Summarizing Data by Village/Head Start Service Area

Given the geographic size and diversity of the City, the Community Assessment summarizes demographic and caseload data at sub-City levels. Specifically, this data was reported for the City's urban villages and Head Start service areas. Allocation methodologies were developed in order to provide estimates for these smaller geographic areas.

Dividing the City into smaller areas allows service planning to take into consideration the unique characteristics of the City's neighborhoods. To facilitate this planning and taking advantage of already-defined regions, the Community Assessment details demographic and caseload data within each of the City's 15 urban villages. The villages – and the Planning Committee within each – exist to assist the City in updating the General Plan; defining the future function, density, and character of subareas within the village; and commenting on proposals for new zoning or land use districts. A map outlining the boundaries of these villages is included as Figure 1 in the Community Assessment.

Data was similarly detailed for Early Head Start and Head Start service areas. In most cases, these services areas correspond to the boundaries of a school district or group of school districts<sup>1</sup>.

Allocating information provided for census tracts and zip codes required the development of 'keys' to apportion the data. In brief, this process involved:

- Collecting 'shape files' that outline the location boundaries of the geographic areas for analysis (that is, the urban villages and Head Start service areas)<sup>2</sup>
- Overlaying these shape files with City boundary<sup>3</sup>, census tract, and zip code shape files
- Further overlaying these files with census block<sup>4</sup> and city boundary shape files

<sup>1</sup> Two different Head Start delegate agencies – Booker T. Washington and Greater Phoenix Urban League – serve portions of the Phoenix Elementary School District.

<sup>2</sup> The 'shape files' for the urban villages and Early Head Start service area were provided by the City. The school district 'shapes' were gathered from the Census Bureau. Phoenix Elementary School had to be split at Central Avenue to apportion its area to the two agencies that serve it.

<sup>3</sup> If a school district extended outside of the Phoenix, the analysis included only the portion within the City.

<sup>4</sup> The smallest Census geographic area is the census block. A collection of these blocks roll-up to form a census block group. And a collection of census blocks groups form a census tract.

- Calculating the total population of each zip code or census tract by adding the populations of the census blocks within each zip code or census tract
- Calculating the percentage of the total population of each census tract or zip code that is within the City limits by comparing the populations of the census blocks within the City to the total determined in the previous step
- Calculating the percentage of the City population that is within each urban village or Head Start service area by comparing the populations of the census blocks within the zip code or census tract to the City total determined in the previous step
- Applying these percentages to the census tract and zip code data to allocate the data to urban village and Head Start service areas

An example can make the methodology clearer. In this example, an estimate of the number of service users – based on caseload estimates by zip code – is developed for Example Unified School District (EUSD):

- An overlay analysis shows that all of zip code 12345 is within the city limits
- Another overlay shows a portion, but not all, of zip code 12345 lies within EUSD
- The 12345 zip code is composed of three census blocks
- These census blocks have populations of 30, 40, and 50 individuals, for a total of 120
- Only one of these census blocks – the one with a population of 30 – is in EUSD; thus, 25 percent (30 divided by 120) of any data for zip code 12345 is allocated to EUSD
- There are a total of 20 service users in zip code 12345 so an estimated 5 (20 multiplied by 25 percent) are in the EUSD boundaries

The allocation keys that were created are attached as Appendices A-II through A-V.

The Community Assessment also includes ‘buffer analyses’ to determine the proximity of service locations to eligible individuals. Specifically, these analyses consider the locations of senior centers, family service centers, and Head Start sites and measure the percentage of eligible individuals within one mile and three miles of a location.

For community centers and senior centers, the service location was plotted and one-mile radius circles were drawn around each. The population that was within a covered radius was tallied by census tract. If a census tract was split by the border of the coverage radius, the census tract population was prorated by geographical area, which assumes a constant population density within a census tract. For example, if a census tract had 25 percent of its total land area within the coverage radius, 25 percent of the census tract population was included. This was repeated using a three-mile radius from the service location.

The Head Start analysis was similar, but also had to account for delegate agency boundaries. Children may only attend Head Start delivered by the delegate agency serving that child’s school district. Thus, if a child resides in School District 1, they can only attend Head Start programs

delivered by the delegate agency for School District 1, even if they live nearer a Head Start site in School District 2. To account for that requirement, the analysis was conducted separately for each of the nine delegate agencies, calculating the proportion of children within a one-mile and three-mile radius of a Head Start site within the school district in which they reside.

## Race/Ethnicity

Many ACS tables can be filtered by racial group, allowing for analysis of demographic differences across races (for example, developing the racial distribution for children under five years of age living in poverty). However, for the purposes of the Census, 'Hispanic/Latino' is not considered a race. Rather, it is considered an ethnicity and individuals must choose another race, typically White/Caucasian or 'some other'. In order to develop estimates of racial populations that consider Hispanic/Latino on par with other races, a methodology was developed to adjust the race totals to account for individuals of Hispanic descent.

In brief, the methodology included the following steps:

- Query the demographic variable (e.g., age group) to establish a 'control total'
- Query the same demographic variable with filters for each race, total individuals of Hispanic descent, and individuals of White/Caucasian descent who do not also identify as Hispanic
- Treat the total count of individuals of Hispanic descent as its own race category
- Add the total for each racial group (including Hispanic)
- If the total across racial groups is greater than the overall control (indicating that some individuals are being counted as both Hispanic and another race), reduce the number of individuals in the 'other' category such that the resulting total equals the control total
- If the 'other' category is reduced to zero and the sum of the racial groups still exceed the control total, prorate the remaining difference across the remaining races based on their proportional representation within the census tract

This calculation was performed at the census tract level in order to facilitate the detailed geographic analyses included in the Community Assessment.

This methodology provides a more complete portrayal of the racial/ethnic composition of the City and its neighborhoods than separately reporting race excluding those of Hispanic descent and the count of individuals of Hispanic descent. However, it is imprecise because the ACS separately records race and Hispanic ethnicity requiring assumptions regarding how to assign individuals to a single group. As the methodological description outlines, the analysis effectively counted anyone of Hispanic origin as 'Hispanic' rather than whatever race they selected. Given that 95 percent of individuals of Hispanic descent in Phoenix described themselves as White or some other race (and another five percent selected multiple races), this assumption appears reasonable and does not significantly undercount other races.

## **Appendix B: Additional Information Relating to the Demographic Profile\***

<b>Appendix</b>	<b>Title</b>	<b>Page</b>
Appendix B-I	Select Demographics of Phoenix Residents by Village	B-2
Appendix B-II	Select Demographics of Phoenix Residents Living in Poverty by Village	B-5
Appendix B-III	Calculated Poverty Rates for Select Demographics by Village	B-7
Appendix B-IV	Select Demographics of Phoenix Residents 60 Years of Age and Older by Village	B-9
Appendix B-V	Projected Population Growth, 2010 – 2030	B-11

\* Summaries based on Census Bureau’s five-year (2010 – 2014) American Community Survey (ACS) tables. See Appendix A for additional information regarding the ACS and methodologies used to develop these estimates.

**Appendix B-I : Select Demographics of Phoenix Residents by Village**

\*Totals for occupied housing imply a Phoenix population of 1,477,935 compared to the 1,511,330 person estimate for other tables; a similar difference exists in the statewide total.

## **Appendix F: Additional Information Relating to the Public Safety Profile\***

<b>Appendix</b>	<b>Title</b>	<b>Page</b>
Appendix F-I	Crime in the City of Phoenix, Arizona, and United States, 2000 - 2014	F-2
Appendix F-II	Crime Reports by Village, 2015	F-5

\* Annual summaries in Appendix F-I are taken from the Federal Bureau of Investigation's Uniform Crime Reporting Statistics. Since this data is not reported at the zip code level, village estimates in Appendix F-II are taken from RAIDS Online crime report tracking database. Report classifications vary between the two data sets so information from the two cannot be compared.

**8. What are the primary barriers to accessing the services listed in the response to the previous question?**

	Count	%	Rank	13 Rank
Copayments	45	15%	6	5
Don't meet Eligibility Requirements	117	38%	2	1
Inconvenient Hours	39	13%	7	4
No Knowledge of Available Services	136	44%	1	
Lack of Transportation	100	33%	4	2
Waiting Lists	105	34%	3	3
Lack of Child Care	74	24%	5	

Dear Resident:

The city of Phoenix Human Services Department (HSD) provides a comprehensive array of services to help families achieve their highest level of self-sufficiency. Services and program reach a diverse population of Phoenix residents from preschool children participating in Head Start programs to older adults attending senior center activities.

HSD is in the process of conducting a three- year community assessment and is interested in hearing your thoughts about the neighborhood in which you and your family live. Please take a few minutes to fill out this survey; your opinions will help HSD make decisions regarding its programs. Completed surveys can be returned to the center where you received it by January 29, 2016. The survey can also be accessed at:

<https://www.surveymonkey.com/r/HSD2016SurveyE>. Your responses are completely anonymous. Thank you for your participation!

### Opinions Regarding the Community

1. What do you think are the three greatest **strengths** of your neighborhood?

- |  |  |
|--|--|
| <input type="checkbox"/> Affordable housing                          | <input type="checkbox"/> Help is available when needed   |
| <input type="checkbox"/> City services (such as parks and libraries) | <input type="checkbox"/> Neighbors care about each other |
| <input type="checkbox"/> College/trade school options                | <input type="checkbox"/> Positive police presence        |
| <input type="checkbox"/> Strong cultural ties                        | <input type="checkbox"/> Religious communities           |
| <input type="checkbox"/> Strong families                             | <input type="checkbox"/> Good schools                    |
| <input type="checkbox"/> Good jobs                                   | <input type="checkbox"/> Public transportation           |
| <input type="checkbox"/> Other (please explain): _____               |  |
- 

2. What do you think are the three greatest **challenges** facing your neighborhood?

- |  |   |
|--|---|
| <input type="checkbox"/> Lack of after school activities   | <input type="checkbox"/> Not enough police presence                       |
| <input type="checkbox"/> Not enough community resources or activities (parks, sports programs, etc.) | <input type="checkbox"/> Properties in poor condition/neighborhood blight |

- 

3. In your opinion, what are the three greatest **strengths** of residents and families in your neighborhood?

- ☐ People appreciate, respect and care about each other
  - ☐ Commitment to family and community
  - ☐ People spend time together doing enjoyable activities
  - ☐ Strong cultural ties
  - ☐ Extended family and friends that provide a lot of support
  - ☐ People care about children in the neighborhood
  - ☐ People value positive communication
  - ☐ Adults are positive role models for children
  - ☐ Strong religious faith
  - ☐ Other (please explain): \_\_\_\_\_
-

**Services that Help You and Your Family**

4. Which, if any, of the following income support services have you or someone in your household used in the past 12 months?
- ☐ Cash Assistance/TANF                      ☐ Supplemental Security Income (SSI)
- ☐ Unemployment Insurance
5. Which, if any, of the following nutrition/food services have you or someone in your household used in the past 12 months?
- ☐ Home Delivered Meals                      ☐ Dining Hall
- ☐ Food Stamps/SNAP                      ☐ Soup Kitchen
- ☐ Food Banks
- ☐ Congregate Meals (such as at a senior center)
- ☐ Women, Infants and Children Program (WIC)
6. Which, if any, of the following housing services have you or someone in your household used in the past 12 months?
- ☐ Emergency Home Repair                      ☐ Rental/Mortgage/Utility Assistance
- ☐ Home Weatherization Services                      ☐ Subsidized Housing (Section 8)
- ☐ Utility Repair/Replacement/Deposit Program
7. Which, if any, of the following adult education/employment services have you or someone in your household used in the past 12 months?
- ☐ GED classes                      ☐ Citizenship classes
- ☐ College/vocational classes                      ☐ Job training/job search assistance
- ☐ Parent education classes                      ☐ Subsidized child care (DES/First Things First)
8. Which, if any, of the following areas have served you or someone in your household in the past 12 months?
- ☐ Homeless shelter services                      ☐ Crime victim advocacy services
- ☐ Domestic violence shelter services                      ☐ Legal assistance
- ☐ Human trafficking services                      ☐ Foster care services
- ☐ Department of Child Safety and Family Services (formerly known as CPS)
9. Which, if any, of the following health care services have you or someone in your household used in the past 12 months?
- ☐ Any care at a doctor's office                      ☐ Immunizations
- ☐ Any care at urgent care                      ☐ Any dental care
- ☐ Any care at a hospital                      ☐ Mental health services
- ☐ Any care at a community clinic                      ☐ Substance abuse recovery or treatment
- ☐ Prenatal care services                      ☐ Early intervention/developmental disabilities
10. Were there any health care or dental services that you or a child in your home needed, but did not get in the past year?                      Yes ☐ No ☐

11. If you answered yes to the previous question, why didn't you or a child in your home get the needed health care?

- |   |  |
|---|--|
| <input type="checkbox"/> Lack of health insurance     | <input type="checkbox"/> Do not like/trust doctors |
| <input type="checkbox"/> Cannot afford copayments     | <input type="checkbox"/> Language barriers         |
| <input type="checkbox"/> No transportation            |  |
| <input type="checkbox"/> Other (please explain) _____ |  |
- 

12. Do you currently have health insurance?    Yes   ☐            No   ☐

13. If you answered yes to the previous question, what type of insurance do you have?

- |  |  |
|--|--|
| <input type="checkbox"/> Private (through a job) | <input type="checkbox"/> Veteran's Insurance |
| <input type="checkbox"/> Medicaid (AHCCCS)       | <input type="checkbox"/> Other               |
| <input type="checkbox"/> Medicare                |  |

14. Tell us which of the following services you have not received that would be the most helpful to you and your family?

- |   |   |
|---|---|
| <input type="checkbox"/> Child care                             | <input type="checkbox"/> Home repair  |
| <input type="checkbox"/> Dental care                            | <input type="checkbox"/> Legal assistance                                   |

**You and Your Family**

17. What is your gender?    Female   ☐                      Male   ☐

18. How old are you?  
☐ 18-24 years of age                      ☐ 35-44 years of age                      ☐ 55-64 years of age                      ☐ 75 + years of age  
☐ 25-34 years of age                      ☐ 45-54 years of age                      ☐ 65-74 years of age

19. Which of the following best describes your race/ethnicity?  
☐ Asian    ☐ Hispanic    ☐ White    ☐ Mixed/Mutiple  
☐ Black/African American   ☐ Native American                      ☐ Other

20. How long have you lived in Phoenix?  
☐ Less than one year                      ☐ 2-5 years    ☐ 10+ years  
☐ 1-2 years    ☐ 6-10 years

21. Which of the following best describes your housing status?  
☐ Own your home    ☐ Live with someone who owns/rents  
☐ Rent your home    ☐ Homeless

22. How many people live in your home?  
Adults 18+ years old                      \_\_\_\_\_ Children under 18                      \_\_\_\_\_

23. If any children were listed in the previous question, how many are in each of the following groups?  
0-2 years                      \_\_\_\_\_ 3-5 years                      \_\_\_\_\_ 6-12 years                      \_\_\_\_\_ 13-17 years                      \_\_\_\_\_

**24.** Which of the following best describes your household?

- ☐ Two-parent household                      ☐ Married/cohabitating and no children in home  
☐ Single-parent household                      ☐ Single and no children in home  
☐ Grandparent(s)/other family member(s) raising child

**25.** Of the adults in your household, how many are:

Employed full-time \_\_\_\_\_ Attending school or vocational training \_\_\_\_\_  
Employed part-time \_\_\_\_\_ Not working \_\_\_\_\_  
Looking for work \_\_\_\_\_ Not attending school \_\_\_\_\_

**26.** What is your household's combined annual income from all sources?

- ☐ Less than \$10,000                      ☐ \$15,001 – \$20,000                      ☐ \$25,001 - \$30,000  
☐ \$10,001 – \$15,000                      ☐ \$20,001 – \$25,000                      ☐ More than \$30,000

Dear Partner:

The city of Phoenix Human Services Department (HSD) provides a comprehensive array of services to assist individuals and families. These services include: Head Start Birth to Five Program, case management, utility/mortgage/rental assistance, older adult programs, senior centers, homeless services, and crime victim services (the Family Advocacy Center, domestic violence and sexual assault information, community and legal resources). In addition, HSD also coordinates the citywide domestic violence and human trafficking awareness campaigns as well as the Volunteer Income Tax Assistance program.

HSD is in the process of conducting a three-year community assessment and is interested in learning your thoughts about the neighborhoods in which your clients live. Please take a few minutes to fill out this survey – your opinions will help HSD make decisions regarding its programs. Completed surveys can be returned to HSD by January 29, 2016. The survey can also be accessed at:

<https://www.surveymonkey.com/r/HSDCNA2016SurveyP> . Thank you for your participation!

### **Involvement with the Human Services Department**

1. Who do you work for (if a Head Start program, note the specific location)?

---

2. What is your job title?

---

3. What service are you primarily responsible for?

---

### **Opinions Regarding the Community**

4. What do you think are the three greatest **strengths** of the neighborhood(s) served by your organization?

- |  |  |

5. What do you think are the three greatest **challenges** facing the neighborhood(s) served by your organization?

- |  |  |
|--|--|
| <input type="checkbox"/> Lack of after school activities   | <input type="checkbox"/> Not enough police presence                          |
| <input type="checkbox"/> Not enough community resources or activities (parks, sports programs, etc.) | <input type="checkbox"/> Properties in poor condition or neighborhood blight |
| <input type="checkbox"/> School dropouts   | <input type="checkbox"/> Property crimes (such as theft)                     |
| <input type="checkbox"/> Drug use  | <input type="checkbox"/> Residents do not work together                      |
| <input type="checkbox"/> Lack of good jobs   | <input type="checkbox"/> Lack of good schools                                |
| <input type="checkbox"/> No affordable housing   | <input type="checkbox"/> Lack of transportation                              |
| <input type="checkbox"/> Juvenile crime/gangs  | <input type="checkbox"/> Violent crimes                                      |
| <input type="checkbox"/> Parent involvement  | <input type="checkbox"/> Other (please explain):                             |

---

6. In your opinion, what are the three greatest **strengths** of residents and families in the neighborhood(s) served by your organization?

- ☐ People appreciate, respect and care about each other
  - ☐ Commitment to family and community
  - ☐ People spend time together doing enjoyable activities
  - ☐ Strong cultural ties
  - ☐ Extended family and friends that provide a lot of support
  - ☐ People care about children in the neighborhood
  - ☐ People value positive communication
  - ☐ Adults are positive role models for children
  - ☐ Strong religious faith
  - ☐ Other (please explain) \_\_\_\_\_
- 

### Opinions Regarding Services

7. What **three services** are most important to individuals and families seeking assistance in your community?

- |   |   |
|---|---|
| <input type="checkbox"/> Child care                             | <input type="checkbox"/> Home repair  |
| <input type="checkbox"/> Dental care                            | <input type="checkbox"/> Legal assistance                                   |
| <input type="checkbox"/> Employment assistance/job training     | <input type="checkbox"/> Transportation                                     |
| <input type="checkbox"/> English instruction                    | <input type="checkbox"/> Rental/mortgage assistance                         |
| <input type="checkbox"/> Literacy services                      | <input type="checkbox"/> Financial education                                |
| <input type="checkbox"/> Homeless shelter services              | <input type="checkbox"/> Food assistance                                    |
| <input type="checkbox"/> Senior centers                         | <input type="checkbox"/> Health care/health insurance                       |
| <input type="checkbox"/> Substance abuse/mental health services | <input type="checkbox"/> Independent living supports (homemaker assistance) |
| <input type="checkbox"/> Utility assistance                     | <input type="checkbox"/> Refugee services                                   |
| <input type="checkbox"/> Domestic violence services             | <input type="checkbox"/> Crime victim services                              |
| <input type="checkbox"/> Human trafficking services             | <input type="checkbox"/> Full day Head Start                                |
| <input type="checkbox"/> Half day Head Start                    | <input type="checkbox"/> Other (please explain): _____                      |
- 

8. What are the primary **barriers** to accessing the services listed in the response to the previous question?

- |  |  |
|--|--|
| <input type="checkbox"/> Copayments                          | <input type="checkbox"/> Lack of transportation              |
| <input type="checkbox"/> Don't meet eligibility requirements | <input type="checkbox"/> Waiting lists                       |
| <input type="checkbox"/> Inconvenient hours                  | <input type="checkbox"/> Lack of childcare                   |
| <input type="checkbox"/> No knowledge of available services  | <input type="checkbox"/> Other (please explain below): _____ |
- 

9. In your opinion, what are the three greatest **strengths** of the programs administered by HSD?

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

---

10. What three **improvements** would you recommend for the programs administered by HSD?

1.

---

2.

---

3.

---

11. Please provide any other comments that will help HSD to complete a comprehensive community assessment.
