To ensure that TaxSlayer Pro Online prints the appropriate ERO name on each Form 8879, set up a separate ERO for each ad hoc/virtual site.

Tip: We recommend that you include the ad hoc/virtual site's SIDN in the ERO name box so it is easier for the return preparer to select the appropriate ERO in the **Efile** section of the return.

Note: The ad hoc/virtual site's Customer ID, EFIN and Office Identifier must be the same as the main site's identifier. Make sure you type these correctly to prevent validation errors or IRS rejections.

NOTE: User names are unique across the platform and are assigned to the site in which they are created. Preparers **cannot** use the same user name used in the Practice Lab environment. To comply with the standards for Multi-Factor Authentication, all email addresses and cell phone numbers must also be unique unless they are marked to allow for multiple accounts.

TIP: If you know the preparer will have multiple logins, you can select **Allow Multiple Accounts** during the initial preparer setup. You must mark this option on the original user account.

Support Tip: If you no longer have access to the original user account, contact VITA/TCE support via email with detailed information on the email address or cell phone you are trying to use.

Password Requirements

15. Type a password for the preparer.

TIP: When you create a password for the preparer, make sure that you use at least one special character (!@#, etc.). Use at least one uppercase letter, one lowercase letter, and numbers. Also, ensure the password contains at least eight (8) characters. This will be the default password for the preparer/user the first time he or she logs in.

Support Tip: Use a common default password for each user since the user is required to change their password on the first login. This prevents the site administrator from having to maintain a list of default passwords.

16. Select the security template you want this preparer to use from the list.

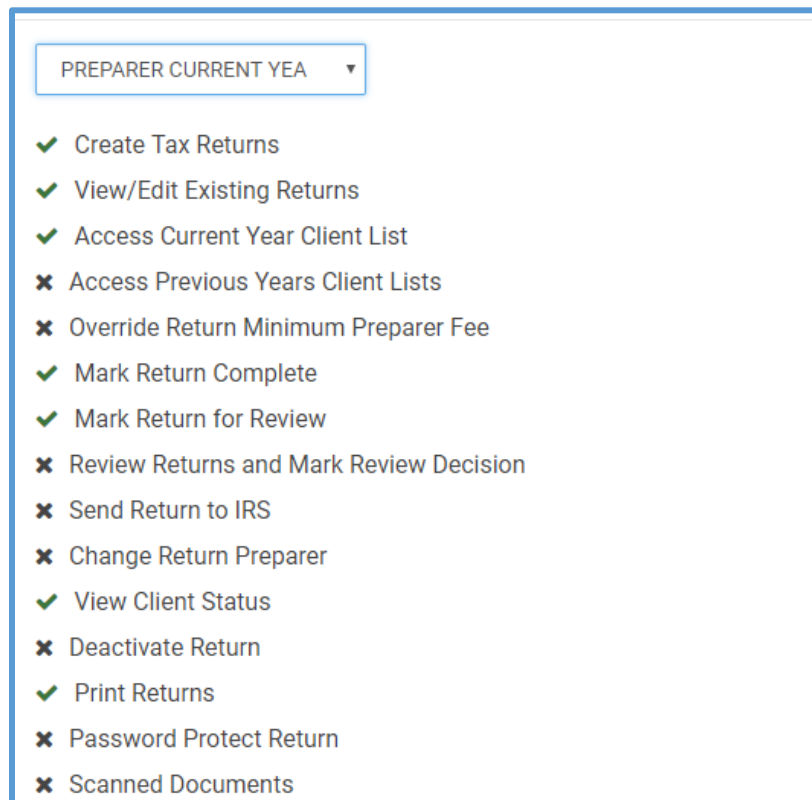

Security Template

Note: There is no Security Template selected for this preparer. They will have full access to the program unless you assign a template.

- Mark all preparers as active or inactive.
- View the preparer's email address.
- Mark a preparer to allow for multiple accounts

To change the status of the preparer, use the following steps from the **Preparers Menu**:

1. If you need to change the status of all active preparers, select **Active** from the **Status** drop-down list.
2. Click **Flip Active Status**.

TaxSlayer Pro Online changes all active preparers to inactive.

Note: TaxSlayer Pro Online displays a warning if you mark all preparers as inactive. Click **OK** to continue or **Cancel** to return to the Preparer(s) Menu page.

TIP: Before you click **Continue**, find your user name and mark yourself as active to avoid login issues.

Support Tip: If you inadvertently mark the site administrator's user name as inactive, contact VITA/TCE support via email with the user name and SIDN.

3. If you need to change the status of all inactive preparers, select **Inactive** from the **Status** drop-down list.
4. Click **Flip Active Status**.

TaxSlayer Pro Online changes all inactive preparers to active.

5. If you need to change the status of only one preparer, find the preparer in the list, and then select or clear the **Active** check box.

From this page, you can also see the preparer's email address in the new **Email** column. Use this to ensure that your preparers use unique email addresses and find the preparer's email address when needed.

TIP: Type the preparer's name or email address in the **Search By** box to easily find preparers.

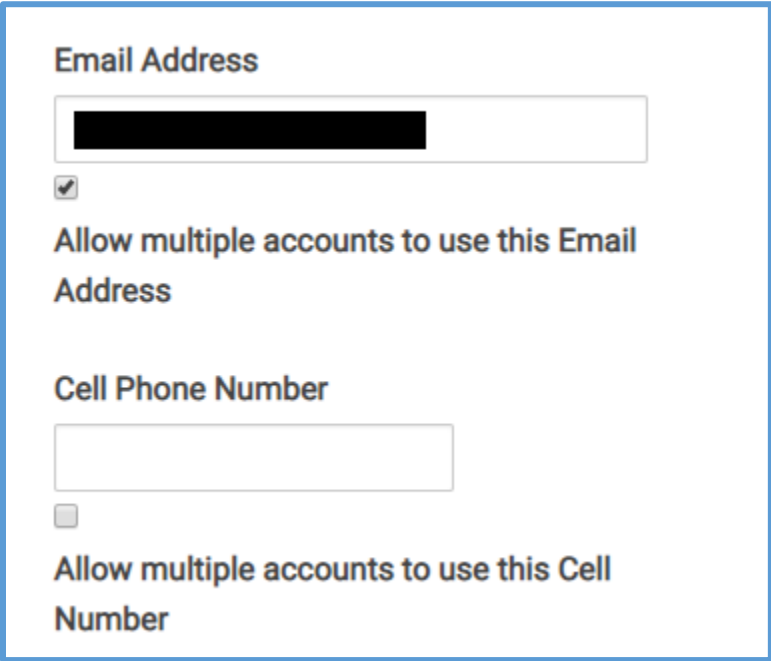

Marking a User Name to Allow Multiple Accounts (Optional)

You can select email addresses or cell phone numbers to be used for multiple accounts. This allows you to use the Multi-Factor Authentication (MFA) verification code to authenticate using the same contact information.

NOTE: We strongly recommend that you use a unique email address and cell phone number for each user instead of using this feature.

To allow the contact information to be used for multiple users, use the following steps:

1. Find the **Email Address** and **Cell Phone Number** boxes in the **Preparer(s) Setup Menu**:

The screenshot shows a form titled "Preparer(s) Setup Menu". It contains two main sections. The first section is labeled "Email Address" and includes a text input field with a blacked-out placeholder, a checked checkbox, and the text "Allow multiple accounts to use this Email Address". The second section is labeled "Cell Phone Number" and includes a text input field, an unchecked checkbox, and the text "Allow multiple accounts to use this Cell Number".

2. Select the appropriate check box(es) below the **Email Address** or **Cell Phone Number** box.

Support Tip: If you no longer have access to the original user name account, contact VITA/TCE support via email with detailed information on the email address or cell phone you are trying to use.

Setting up Ad Hoc and Virtual Sites

If a volunteer prepares returns at the main site and one or more ad hoc/virtual sites, create a user name for each site to ensure TaxSlayer uses the correct SIDN in the e-file. The preparer can use the same email address and/or cell phone number for MFA purposes in this circumstance.

Scenario

The site has a “main” site and also has one or more ad hoc and/or virtual sites:

- The main site has an EFIN and SIDN (Snnnnnnn01).
- The ad hoc/virtual site has its own SIDN (Snnnnnnn02) because the IRS wants the returns prepared at the ad hoc/virtual site to be reported under the correct SIDN.

Instructions for Setting up in TaxSlayer Pro Online

1. Create additional preparers in TaxSlayer Pro Online for the volunteers who work at the ad hoc/virtual site.
2. In Preparer Setup, type the SIDN of the ad hoc/virtual site in the PTIN box.

NOTE: TaxSlayer Pro Online carries the SIDN on the Preparer record to the appropriate box in the e-file for reporting purposes.

Best Practice Tip: Use a description in the user name to indicate the site where the volunteer will prepare returns. For example, if Kim will prepare returns both at the main site and at an ad hoc/virtual site at Kroger, use *KimMain* for the main site and *KimKroger* for the ad hoc/virtual site.

TIP: Search the VITA/TCE Blog for more detailed information on setting up the ERO information for your ad hoc and/or virtual site(s).

Marking a User Name **Is Archived** (Optional)

In addition to **Active** and **Inactive**, the site administrator can mark preparers who no longer volunteer at your site as **Archived**.

How would I use this at my site?

With this feature, you can distinguish between users who are inactive because the site is not open and users who will not volunteer again in the future. This gives you flexibility to mark all users active/inactive (except yourself) without having to individually review the inactive list.

TaxSlayer Pro Online does not display archived accounts in the main Preparer Setup list and will not mark them as active when you click the **Flip Active Status** button. With this extra layer of security, you can ensure that volunteers do not access TaxSlayer Pro Online outside of site hours.

Who can archive a user?

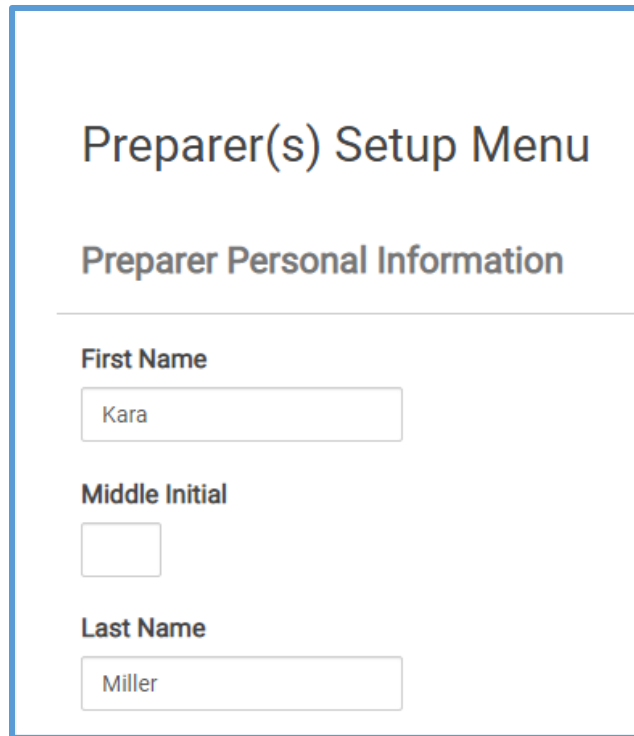

Any user with a security template that allows adding or editing of preparers can archive users. You can only archive inactive users.

How do I archive users?

To archive users, use the following steps from the **Preparer(s)Menu** page:

1. Select **Edit** for the appropriate preparer.

TaxSlayer Pro Online displays the **Preparer(s) Setup Menu** for the preparer you selected:

The screenshot shows a web form titled "Preparer(s) Setup Menu". Below the title is a section header "Preparer Personal Information" followed by a horizontal line. There are three input fields: "First Name" with the value "Kara", "Middle Initial" which is empty, and "Last Name" with the value "Miller".

3. Clear the **Active** check box to make the user inactive.
4. Select the **Is Archived** check box to archive the user.
5. Click **Continue**.

TaxSlayer Pro Online no longer displays the user in the **Preparer(s) Menu**, but does display the user and archived status on the **Username Report**:

TIP: Take a few minutes before tax season begins to mark non-returning volunteers as archived so you can easily mark all users (except the administrator) as inactive when the site is not open.

Question Reports

- Question Statistics
- Return Questions with Consent Indicator Report
- Return Questions

Question Statistics

The Question Statistics report generates a summary level report for each question at the site level.

Return Questions with Consent Indicator Report

The Return Questions with Consent Indicator report generates a detailed listing of the information gathered from the questions and answers at the site level, along with the corresponding taxpayer demographic information. This report also includes the answers to any assigned or custom consents. You can use this report to send any additional information to the taxpayer if they have given their consent to use their tax information for that purpose.

Return Questions

The Return Questions report generates a detailed listing of the information gathered from the questions and answers at the site level, along with limited demographic information.

Refer to the [Working with Reports](#) lessons for detailed instructions on sorting reports and exporting the data for further analysis.

Working with Consents

After completing this lesson, you should be able to:

- Add a new consent form.
- Edit an existing consent form.
- Delete a consent form.
- Complete a consent in a tax return.
- Use the Global Carryforward Consent.
- Work in the Consent Report.

Adding a Consent

If you need to request consent from taxpayers for certain actions, you need to add a consent form. To add a consent to be used by your site, use the following steps from the **Configuration Menu** page:

Note: If your order was placed with a relational EFIN, the Reporting Consent is assigned to your site and required for electronic filing.

1. Click **Select** on the **Consent Forms** line.

TaxSlayer Pro Online displays the **Consent Forms** page, listing any assigned consent forms:

3. Type a name and description for your consent form.

4. Select the **Consent Tax Year**. You can select either **All** to display the consent in all tax years, the current year, or one of the three prior years.

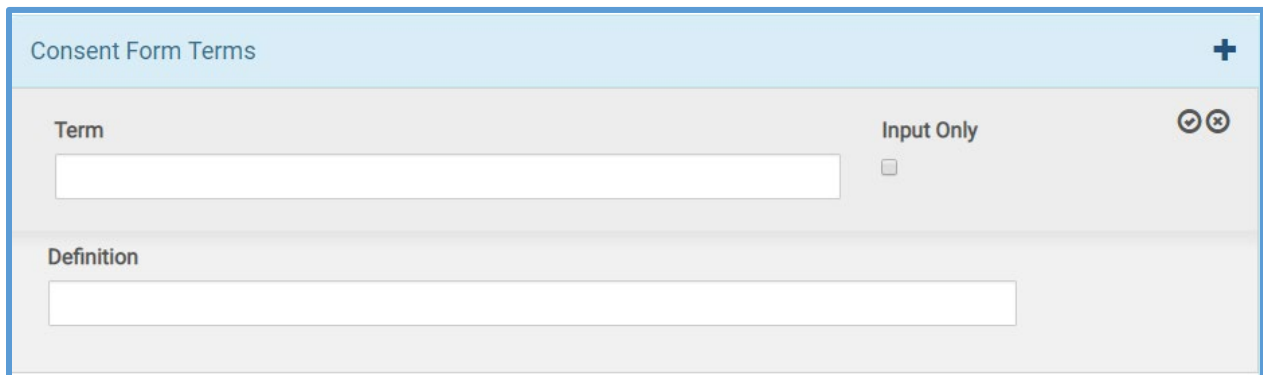

5. Select the **Display Disclosure Limitations** check box if you need to display the disclosure limitations.

TIP: Displaying the disclosure limitations is optional and must be tracked manually by the site.

6. Click the **Add** icon in the **Consent Form Terms** section.

NOTE: The **Required For Efile** check box prevents the preparer from marking the return complete if the taxpayer denies the consent. Preparers are required to complete all consents created or assigned to the site before creating an e-file.

TaxSlayer Pro Online expands the **Consent Form Terms** section:

The screenshot shows a user interface for managing consent form terms. At the top, there is a light blue header bar with the text "Consent Form Terms" on the left and a plus sign icon on the right. Below this header, the interface is divided into two main sections. The first section is labeled "Term" and contains a text input field. To the right of this field is a checkbox labeled "Input Only". The second section is labeled "Definition" and contains a larger text input field. In the top right corner of the form area, there are two circular icons: one with a checkmark and one with an 'X'.

7. Type the term, which is typically 1 year.
8. Type the definition.

NOTE: Type a descriptive definition so the preparer and taxpayer can see the exact terms of the consent and knowingly accept those terms. **Do Not** select **Input Only**, since this requires the return preparer to manually type consent form terms on each consent for each taxpayer and must be tracked manually by the site.

9. When you finish adding the term, click the **Save** icon (check box) to save the term.
10. If you need to add more terms, click the **Add** icon to add another term.
11. When you finish adding terms, click **Save**.

Editing a Consent Form

If you later need to edit a consent form that was created at your site, use the following steps from the **Consent Forms** page:

1. Click **Edit** for the consent form you want to edit.

TaxSlayer Pro Online displays the **Edit Consent Form** page:

2. Make any changes to the consent the same as when you created a new consent.

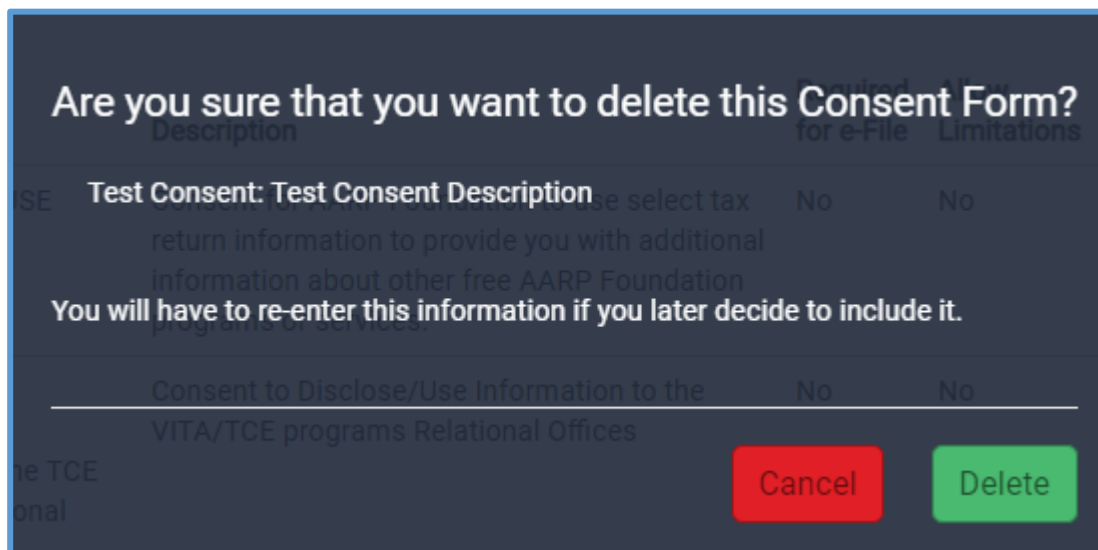

TIP: TaxSlayer Pro Online makes changes to a consent immediately available in returns. We do not recommend making changes to consents after you start preparing returns.

Deleting a Consent

If you later need to delete a consent form that was created at your site, use the following steps from the **Consent Forms** page:

1. Click **Delete** for the consent form you want to delete.

TaxSlayer Pro Online displays a confirmation message:

2. Ensure that you want to delete the consent form, and then click **Delete**.

TaxSlayer Pro Online deletes the consent form and removes it from the list.

NOTE: You cannot retrieve a consent form after you delete it. Make sure that you want to delete the consent form to avoid re-entering the information.

TIP: If you have assigned a consent to a group, you must unassign the consent from the group before deleting it. Once you delete it, there is no way to unassign it from a site.

TaxSlayer Pro Online prints the consent form with the tax return.

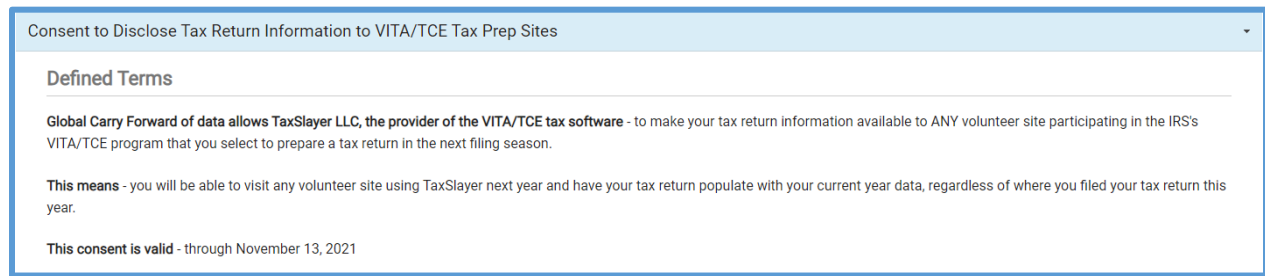

Support Tip: The program prints the required legal language on the consent with specified page margins and fonts. You cannot change these items.

Completing the Consent in the Tax Return

When you finish a tax return, you can complete the consent. To do so, use the following steps from the **E-File** page:

1. Work through the sections of the **E-File** page until you reach the **Consent to...** section.

TaxSlayer Pro Online displays the **Consent to...** section:

Consent to Disclose Tax Return Information to VITA/TCE Tax Prep Sites

Defined Terms

Global Carry Forward of data allows TaxSlayer LLC, the provider of the VITA/TCE tax software - to make your tax return information available to ANY volunteer site participating in the IRS's VITA/TCE program that you select to prepare a tax return in the next filing season.

This means - you will be able to visit any volunteer site using TaxSlayer next year and have your tax return populate with your current year data, regardless of where you filed your tax return this year.

This consent is valid - through November 13, 2021

2. Follow your site procedures to complete the Consent pages.

TIP: If your site has set up Consents, you must answer them before creating the e-file. If the taxpayer denies consent, you **do not** need a PIN or date.

NOTE: The Consent forms print with taxpayer and spouse signature lines.

Global Carryforward Consent

SPEC and TaxSlayer agreed to implement global carryforward of taxpayer information to all VITA/TCE tax preparation sites beginning with Filing Season 2018. Taxpayers must affirmatively consent during the return preparation process to allow their information to be available for global carryforward in the subsequent tax year.

Based on the agreement with SPEC, TaxSlayer assigns the electronic version of the Global consent to all VITA/TCE Pro Online sites. You cannot edit or delete this consent.

If the taxpayer granted Global Consent in the prior year and visits a different volunteer site in the current filing season, TaxSlayer alerts the preparer that carryforward data exists for use in the current year's tax return.

Note: If the taxpayer denied the Global Consent in the prior year, there is no impact on the same-site carryforward option.

Consent Report

Each site can run a report that indicates which consents a taxpayer granted or denied. To run the reports, do the following from the **Welcome** page:

1. Click **Select** on the **Reports** line.

TaxSlayer Pro Online displays the **Office Reporting** page:

Adding an Office IP Whitelist

After completing this lesson, you should be able to:

- Discuss the purpose of an Office IP Whitelist.
- Add IP addresses to the Office IP Whitelist.
- Configure TaxSlayer Pro Online to verify IP addresses.
- Delete IP addresses from the Office IP Whitelist.

For added security measures, you can restrict access to TaxSlayer Pro Online only to IP addresses associated with your site. If you do this, you and other site users can only log in to TaxSlayer Pro Online from the IP addresses you specify.

NOTE: If you use this feature, add the office's IP addresses **before** you enable the feature. If you do not have any IP addresses whitelisted, no one will have access to the program.

Adding IP Addresses

First, add any IP addresses associated with your site. To do this, use the following steps from the **Welcome** page:

1. Click **Select** on the **Configuration** line.

Managing Multiple Sites

After completing this topic, you will be able to:

- Log in as the multi-site/group administrator.
- List management options.

If you manage multiple sites, your group administrator login allows you access to different features, and your **Welcome** page looks different based on your login profile. Log in to TaxSlayer Pro Online as you would with any other user name and password. When you log in, TaxSlayer Pro Online displays the **Welcome** page:

Using Multiple Office Features

You can access the same features as any other site. However, as the manager of multiple offices with a Relational EFIN, TaxSlayer Pro Online provides additional features.

Assigning Settings to Offices

When you configure certain settings, you can assign those to offices. You can assign the following settings:

- a) Security Templates
- b) Question Templates/Custom Question
- c) Taxpayer Profiles
- d) Consent Forms
- e) Print Sets
- f) Return Tags
- g) Custom credits

For this example, when you set up custom questions, you can assign the questions to offices, as shown below:

NOTE: This feature is available to **ALL** multi-site (MSA) group administrators.

The screenshot displays the 'Assign Questions' interface. At the top, it says 'Assign Questions' and 'New Template' with an edit icon. - You must **unassign** items from any applicable site before you delete it from the group level. Once you delete an item, you cannot remove it from a site.

Searching by Office (Relational EFIN required)

In many features, you can search by office if you are using a Relational EFIN and your user name is assigned a security template that allows access to this feature. This way, you can run reports or search for clients in one of the sites you manage. For example, on the **Client Search** page, you can search by office, as shown below:

The screenshot shows the 'Client Search' form. The 'Search By:' dropdown menu is open, displaying options: SSN, SSN, Name - First or Last, Phone, Preparer - First or Last, EFIN, and Office (highlighted in blue). The 'Date From:' and 'Date To:' fields are set to 'mm/dd/yyyy'. The 'Show By Return Tag' dropdown is set to 'Any Tag'. The 'Show By Status:' dropdown is empty. A green 'Search >' button is visible on the right.

When you search by an office, TaxSlayer Pro Online displays only returns created by that office:

TaxSlayer Pro Desktop Administration

Contingency Procedures

After completing this topic, you will be able to:

- Describe the TaxSlayer Pro Online contingency plan.
- Download TaxSlayer Pro's desktop application.

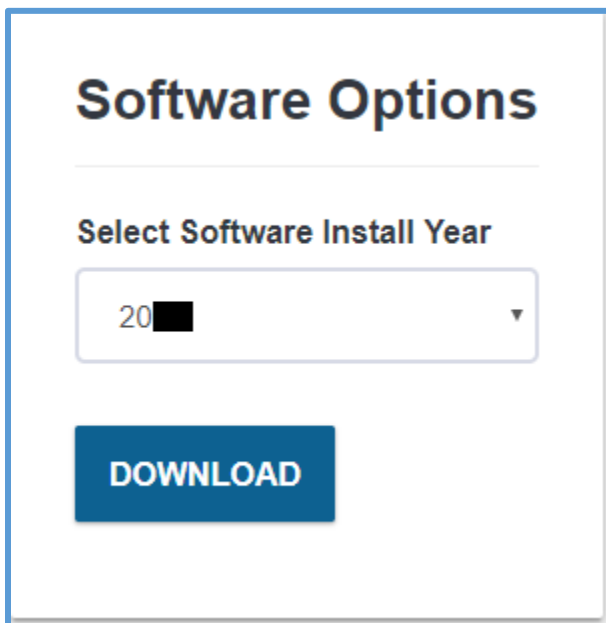

TaxSlayer Pro

TaxSlayer makes a contingency procedure available in the rare event that the web site or the site's Internet service becomes unavailable for an extended period. If that happens, you can use TaxSlayer Pro's desktop application to prepare and e-file returns.

Download the desktop application in advance so that your site does not have any downtime. We recommend that you do not install TaxSlayer Pro on a network as a contingency plan. Instead, install on a standalone computer with an Internet connection.

Site Administrators can download the desktop application. To do so, use the following steps:

1. Log in to My Account/Account Hub from the VITA/TCE Springboard.
2. Select the appropriate year to download, located as shown below:

A screenshot of a web interface titled "Software Options". Below the title is a label "Select Software Install Year" followed by a dropdown menu. The dropdown menu shows "20" followed by a black square and a downward arrow. Below the dropdown is a blue button with the word "DOWNLOAD" in white capital letters.

TaxSlayer Pro Online begins downloading the setup file:

3. When TaxSlayerPro.com completes the download, click the file.

Windows displays the InstallShield Wizard for TaxSlayer Pro:

4. Complete installation and setup as described in the *Installing TaxSlayer Pro Desktop* section.

Tip: For a complete listing of contingency options, refer to IRS Publication 4396-A, *Partner Resource Guide*. You can download this publication from the *Contingency Plan* lesson on the Practice Lab.

In order for the TaxSlayer Pro Desktop contingency plan to work successfully, it is important to keep the designated computers updated with the latest desktop software versions. TaxSlayer Pro Desktop automatically updates the first time you open it each day. We recommend that you do this daily or weekly.

If a software system outage or local Internet outage necessitates the use of a temporary contingency plan, you can use the installed and updated version of TaxSlayer Pro Desktop to complete any returns you need to prepare during the outage. Sites will be able to work the return completely from the desktop application, including e-filing and getting acknowledgments. The return will remain in the desktop application for the duration of the filing season.

Tip: Returns prepared using the desktop software during a contingency plan will be transmitted from the desktop software. You will also use the desktop software to retrieve any acknowledgement associated with the returns transmitted from the desktop software.

When TaxSlayer Pro Online is available again, use it to prepare new returns and complete any returns you started previously in TaxSlayer Pro Online.

Summary

You should now be able to:

- Describe the TaxSlayer Pro Online contingency plan.
- Download TaxSlayer Pro's desktop application.

To see a video of what you just learned, go to [Contingency Procedures](#). Note that videos are updated each Fall. Use the information in this user guide for the most current steps.

5. Click **Start Return**.

NOTE: You can choose a Taxpayer Profile to automatically display income and adjustment entry pages that most closely reflect information from the taxpayer. When you do this, you save time in the return. You can still add other information to the return after you complete any of the necessary forms displayed by the taxpayer profile. For more information on taxpayer profiles, see the [Entering Basic Income](#) lesson.

TaxSlayer Pro saves the new return and displays the **What's your filing status** page:

The screenshot shows a web form titled "What's your filing status?". On the left, there is a list of filing status options, each with a radio button: "Single" (selected), "Married Filing Joint", "Married Filing Separate", "Head of Household", "Qualifying Widow(er) with Dependent Children", and "Nonresident Alien". In order to change to a resident filing status, you must deactivate the return and then reactivate the return using new return data. See the [Managing Returns](#) lesson for more detailed information on deactivating and reactivating returns.

Cancellation of Debt Form 1099-C, Form 982

Nonbusiness Credit Card Debt

If a taxpayer received a cancellation of debt (COD) in the previous year, you should report that amount as income. Generally, if a taxpayer receives Form 1099-C for cancelled credit card debt and was solvent (assets greater than liabilities) immediately before the debt was canceled, all the cancelled debt should be included on the **Other Income** line. You do not need any additional supporting forms or schedules to report cancelled credit card debt.

Lenders and creditors are required to issue Form 1099-C if they cancel a debt of \$600 or more. If the debt cancelled is less than \$600, some lenders or creditors may send a letter or some other form of notification to the taxpayer. Generally, taxpayers must include all cancelled amounts (even if less than \$600) on the Other Income line of Form 1040.

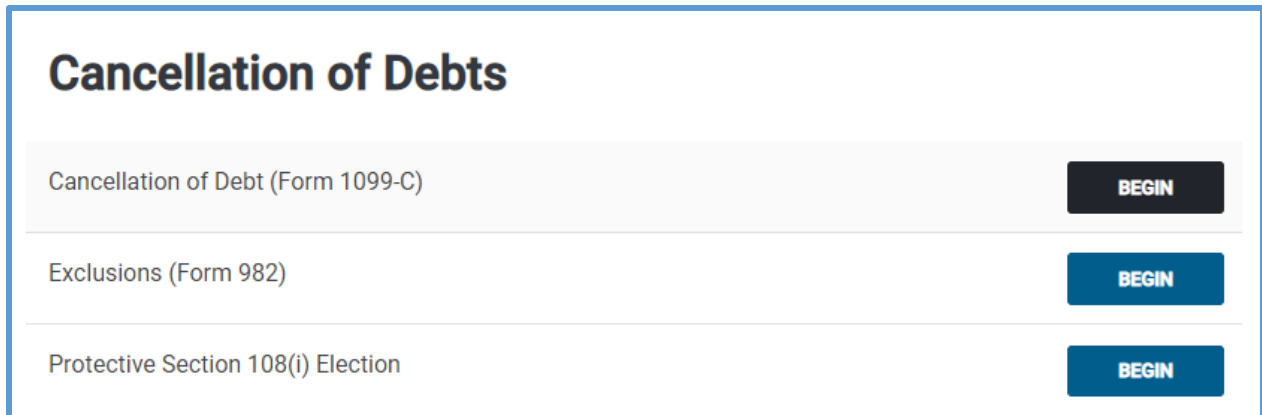

TIP: Make sure that you only prepare returns that are in scope of the VITA/TCE Programs (COD-Nonbusiness credit card debt and COD-

Principal Residence). See IRS Publication 4012 for more COD in scope information.

State and Local Income Tax

If the taxpayer paid state and local income tax during the year, TaxSlayer Pro Online automatically adds those taxes to Schedule A based on information you enter on Form W-2, Form 1099-R, estimated tax payment worksheets, and other forms where the payer may have deducted state and local income taxes.

In some cases, the taxpayer may have paid state taxes that you have not previously added to the return. If you need to add state and local income tax paid, use the following step on the **Schedule A – Taxes You Paid** page:

- Type the amount of any state and local income tax paid in the **Additional State and Local Income Tax** box. Remember that you should not include any amounts from Forms W-2, 1099, or W-2G already entered into the return. Also, do not include any estimated tax payments.

General Sales Taxes

Some taxpayers qualify to claim general sales tax paid instead of state and local income tax paid. If the taxpayer needs to figure the better of the two, you can add sales tax to the return. To take the sales tax deduction, use the following steps from the **Schedule A – Taxes You Paid** page:

1. Click **Add Sales Tax Worksheet**.

TaxSlayer Pro Online displays the **Sales Tax Deduction** page:

What is this page for?

The Credit for Dependent Care Expenses is for individuals who paid for child care so that they could work. For this credit to calculate, the Taxpayer and the Spouse, if applicable, must each have earned income. There are exceptions to the rule for disabled or full-time students who were unable to work. Complete the "Addition to Income" section below for the appropriate non-working spouse for the purpose of calculating this credit only.

*NOTE: Any amounts entered here are **only** used for the purposes of figuring this credit. It will not be added to your total income on your tax return.

Additions to Income for Taxpayer for this credit

NOTE: If the taxpayer was a full-time student or disabled, enter any additional income.

Figuring the amount to enter:

Step 1: Figure out how many months you were a student (or disabled) and did not work. Do not include any month in which both you and your spouse (if applicable) were both students.

Step 2: If you have just one qualifying child that you paid expenses for, multiply the number of months you figured in Step 1 by \$250. If you have more than one qualifying child, multiply the number of months by \$500. The result is what you should report as Additional Income for Taxpayer.

21. If the taxpayer or spouse is a student or disabled, for each month or part of a month your spouse was a student or was disabled, he or she is considered to have worked and earned income. To figure the amount he or she can use as earned income for purposes of this credit, type that amount in the **Additional Income for Taxpayer for purposes of this credit**, based on the instructions on the screen.
22. Enter the amount of any additional employer provided dependent care benefits that were **not** included on Form W-2 in the appropriate boxes.

12. If the taxpayer has more than one eligible student, click **Add** and use the same steps to enter education credit information for each student.
13. When you finish entering eligible students and their qualifying expenses, click **Continue**.

TIP: TaxSlayer Pro Online does not display the eligible names in the **Select an Eligible Student** drop-down list after you complete a credit for that student. You cannot take both the American Opportunity and Lifetime Learning Credits for the same student in the same tax year. Figure the taxpayer's tax liability both ways and choose the one that works best for the taxpayer.

TaxSlayer Pro Online calculates any refundable portion of the American Opportunity Credit to the appropriate schedule.

NOTE: TaxSlayer Pro Online dynamically generates entry screens based on the type of credit you select.

- Explain how TaxSlayer Pro Online calculates self-employment tax.
- Enter unreported Social Security and Medicare taxes.
- Enter a tax on early distributions.

Some taxpayers may have other taxes added to the return. This lesson covers those taxes. To report those taxes, use the following steps:

Understanding Self-Employment Tax Calculations

Self-employed taxpayers must pay self-employment tax in order to contribute to Social Security and Medicare. If the taxpayer has a business and you entered a Schedule C, TaxSlayer Pro Online automatically calculates self-employment tax and enters it on the tax return. Make sure you entered all income from the self-employed taxpayer or spouse on the Schedule C to calculate the self-employment taxes and the automatic adjustment to income for the deductible portion of this tax.

If you need to enter other income or make adjustments on Schedule SE, you should use the Schedule C to ensure proper calculations in the return.

Entering Unreported Social Security and Medicare Tax

Taxpayers who receive tips must report those tips in order to contribute to Social Security and Medicare. If the taxpayer has tips included on Forms W-2, TaxSlayer Pro Online automatically calculates this tax and enters it on Form 4137 in the tax return. If the taxpayer has unreported tips not reported elsewhere, you need to adjust the tip income. To do this, use the following steps from the **Other Taxes** landing page:

1. Click the **Tax on Unreported Tip Income** line.

TaxSlayer Pro Online displays the **Form 4137 Social Security and Medicare Tax on Unreported Tip Income** page:

Advanced Income

You can enter the following six types of advanced income in a tax return:

- Form 1099-MISC
- Profit or loss from a business
- Schedule K-1 income items that are within the scope of the VITA/TCE Programs
- Rental income
- Capital gains and losses
- Other income

This section covers entering those types of income in TaxSlayer Pro Online.

Entering Form 1099-MISC

If a taxpayer received a Form 1099-MISC, *Miscellaneous Income*, you need to enter that information in the tax return. To do that, use the following steps from the **Income** page:

1. Click the **1099-MISC** line.

TaxSlayer Pro Online displays the **Form 1099-MISC** page:

The screenshot shows the 'Form 1099-MISC' page in TaxSlayer Pro Online. At the top, there are two buttons: 'CANCEL' on the left and 'CONTINUE' on the right. Below these buttons is the section title 'Form 1099-MISC'. Underneath, the 'Payer Information' section is displayed. It includes a text box for 'Payer's name *' with a small icon on the right. Below this is a checkbox labeled 'Check here if foreign address'. Then, there is a text box for 'Address (street number & name) *'. Below the address box are three fields: 'ZIP code *' (with a hyphen separator), 'City, town, or post office *', and 'State *' (a dropdown menu currently showing '- Please Select'). At the bottom of the form, there is a checkbox labeled 'Use payer's SSN as ID'. Below this checkbox is the label 'Payer's TIN *' and a note 'Also may be found in the box labeled Payer's Federal Identification Number'. At the very bottom, there are two text boxes for the TIN, separated by a hyphen.

2. Type the information on this form as it appears on the paper copy of the taxpayer's Form 1099-MISC.
3. Use the following tips for completing Form 1099-MISC in TaxSlayer Pro Online:
 - a. If the payer used a Social Security number instead of an EIN, select the **Use Payer's SSN as ID** check box. TaxSlayer Pro Online displays a Social Security number box instead of the EIN box.

- b. If the payer is a business, and you entered that payer previously, TaxSlayer Pro Online automatically completes the payer's name and address when you type the EIN.
 - c. If the taxpayer's address on the paper Form 1099-MISC is different from the one on the tax return, make changes to the taxpayer's address on this page.
 - d. TaxSlayer Pro Online disables boxes on this form that are not used for e-filing the tax return. You can leave these boxes blank.
4. When you finish typing information on the form, click **Continue**.

TaxSlayer Pro Online determines where to report the income based on the box containing an amount. For example, if Form 1099-MISC shows other income in Box 3, TaxSlayer Pro Online reports that income on the **Other Income** line. For some lines, TaxSlayer Pro Online needs direction on where to report the income and displays a page similar to the following:

Transferring 1099-MISC to Schedule C

To see a video of what you just learned, go to [Advanced Tax Topics Part 1](#) and [Advanced Tax Topics Part 2](#). Note that videos are updated each Fall. Use the information in this user guide for the most current steps.

Working with Amended Returns

After completing this topic, you should be able to:

- Create Form 1040X after receiving an accepted IRS acknowledgement.
- Create Form 1040X when you did not prepare the taxpayer's original return.
- Make changes to the original return.
- Review or enter information from the original return.
- Complete a state amended return.
- Provide an explanation for the changes in the return.
- Print the amended return.

Sometimes, taxpayers need to file an amended return after they have already filed the original return. In that case, you should file Form 1040X for that taxpayer. If necessary, you should also amend the state tax return. If your site prepared the taxpayer's original tax return, you can search for and make changes to the original return from TaxSlayer Pro Online. If the original return was prepared elsewhere, you need to enter the taxpayer's information, and then prepare the amendment.

Creating Form 1040X from Accepted Return

If your site created and e-filed the original return, you should take slightly different steps than if your site did not prepare the return, or if the taxpayer mailed the return. This section discusses preparing the amendment when you have an IRS acceptance in the system.

Finding the Original Return

If your site prepared the original tax return, you should first find that tax return. To do so, use the following steps from the TaxSlayer Pro Online Home page:

1. Click **Select** on the **Client Search** line.

Making Changes to the Return

After you find and open the return, you need to add or change the information previously entered. To do so, use the following steps from the open return:

1. Print a copy of the original return. You will need this later.

Note: You can print a copy of the accepted return from the Client Status page located in the Tools menu.

2. Make all necessary changes to the return based on the new information from the taxpayer. For example, if the taxpayer needs to add a Form W-2, click the amount in the **Wages, salaries, tips, etc.** line to navigate to the **W-2 Wage Statement** page. Then, add the new Form W-2 just as you would when preparing the original return.

Note: If you need help adding information to the return, review the appropriate section in [Preparing a Return](#).

Please be sure to include in the Amended Filing, the amended form (1040X for the Federal) and the correct copy of any forms that were changed or affected. You will also need to include any supporting documentation. For example, if you amended your return because you received an additional W-2, please include a copy of the W-2 with your amended filing. When in doubt, you can always choose to submit the entire corrected return along with the amended form.
- **6. Sign and Mail your Amended Return for filing:** Once you have printed, reviewed and attached all necessary forms to your amended return, you are ready to mail the return. Creating Form 1040X without Accepted Return

If your site did not create and e-file the original return, you should take slightly different steps than we just discussed. While many of the steps are the same, this section covers the process in detail to avoid confusion.

Note: Make sure that you have a printed copy of the original return as filed to the IRS. If you do not have this information, you cannot amend the taxpayer's return.

Starting the Return

Finding an Existing Return

If your site prepared the original tax return, but did not e-file it, you should first find that tax return. To do so, use the following steps from the TaxSlayer Pro Online Home page:

1. Click **Select** on the **Client Search** line.

TaxSlayer Pro Online displays the **Office Client List** page:

The screenshot shows the 'Office Client List' interface. At the top, it says '2018 Client Tax Return List'. Below this are two filter sections: 'Filter by Status' with a dropdown set to 'Any Status', and 'Filter by Return Tag' with a dropdown set to 'Any Tag'. There are two checkboxes: 'Do Not Show Deactivated Returns' and 'Do Not Show Accepted Returns', both currently unchecked. Below these are date filters: 'Date From:' and 'Date To:' with input fields for 'yyyy/mm/dd' and calendar icons, and a 'Date Type' dropdown set to 'Create Date'. A 'Search Client List' text box is present. Below the search box is a 'Show' dropdown set to '100' and the text 'entries'. At the bottom left, it says 'Showing 1 to 100 of 200 entries'. At the bottom right are 'Previous', '1', '2', and 'Next' buttons. The bottom of the page shows a table header with columns: SSN, FIRST, LAST, PHONE, PREPARER, STATUS, and a sort icon.

2. In the **Search Client List** box, type the taxpayer's Social Security number.

Note: If you need help adding information to the return, review the appropriate sections in [Preparing a Return](#).

TaxSlayer Optional Programs

FSA Program

After completing this lesson, you should be able to:

- Define the TaxSlayer FSA program.
- Set up the TaxSlayer FSA program at your site.
- Guide taxpayers to complete a return in TaxSlayer FSA.
- List and describe the differences in TaxSlayer Pro Online and TaxSlayer FSA.
- Deactivate a TaxSlayer FSA return if opened using the wrong URL.

What is the FSA Program?

The TaxSlayer FSA Program is the Facilitated Self Assistance program. The FSA program allows taxpayers to self-prepare returns with assistance from a certified volunteer. VITA/TCE sites can order FSA three different ways for the 2021 Filing Season:

- **Fusion:** FSA has the same physical location as the traditional site. Clients can self-prepare their current Federal and state tax returns with a certified volunteer available to help with tax law questions. The FSA fusion product must be ordered at the same time as the traditional online or desktop TaxSlayer product.
- **Standalone:** FSA has a separate physical location. Clients can come in during posted hours to self-prepare their current Federal and state tax returns with a certified volunteer available to help with tax law questions.
- **Remote:** A volunteer can email the site's custom FSA URL to known individuals or place a link on a private website. Clients can self-prepare their current Federal and state tax returns with a certified volunteer available to help with tax law questions via phone, chat, or email. Remote sites cannot place the custom FSA URL on any public-facing website, social media or blog platform, or include the URL in any electronic newsletter or newspaper article or mass email.

The TaxSlayer Online FSA program works the same way for the taxpayer in all cases.

Setting up FSA

TaxSlayer sends each participating FSA site a unique link that contains the site's SIDN. Read the email you receive from TaxSlayer carefully and ensure that the last characters of the URL correspond with your SIDN:

Please safeguard this URL and DO NOT make any modifications to it. If the last 8 numbers do not correspond with the URL assigned to your FSAFS order, please let us know so we can update our records and generate a new URL

XXXXXXXXXXXX

XXXXXXXXXXXX

We recommend making your URL the default homepage for each self-prep station at your site. Refresh the homepage after each use to ensure the next taxpayer is creating their account under the correct URL for your site.

The above URL will take the taxpayer directly to a VITA/TCE Kiosk landing page login page. They will click continue to create a user account.

Tip: TaxSlayer recommends making the FSA URL the default home page on the kiosk you will use for FSA.

You do not need any additional setup from TaxSlayer for FSA.

[Summary/Print Page](#)

TaxSlayer FSA displays only the Summary View display on the **Summary/Print** page. Taxpayers cannot view the 1040 View.

Qualified dividends	\$0.00

Click the line to navigate to that section in the return.

E-file

With TaxSlayer FSA, the taxpayer e-files his or her own return. TaxSlayer FSA asks for the taxpayer's prior year AGI:

Testing, for IRS Acceptance, we need the Adjusted Gross Income (AGI) from your tax return.

Do you have access to your 2018 tax return?

☐ Yes, I have my 2018 tax return with me.

☐ No, I cannot locate my 2018 tax return.

☐ No, I didn't file a 2018 tax return.

If the taxpayer does not have access to the previous year's return, TaxSlayer FSA defaults the prior year AGI to \$0 and continues with e-file.

If the taxpayer does have the previous year's AGI, TaxSlayer FSA walks the taxpayer through entering the information from that return:

Testing, which tax return did you file last year?

Look for the number in the top-left corner of your federal return.

Round to the closest dollar if your AGI has cents

Note: Your 2018 AGI can only be found on last year's tax return. It isn't on your W-2 or any other form. The IRS will compare the number you enter to the AGI they have on file for you. If the number you enter is incorrect, your e-file will be rejected.

Your AGI is listed on **line 7** of your 2018 form **1040**.

Taxpayer PIN

With TaxSlayer FSA, the taxpayer creates his or her own PIN to e-file the return. The taxpayer can use any 5-digit number for the PIN.

Create your PIN.

Create a 5-digit PIN for this year's tax return. Next year, we will automatically populate this for you.

Some states request the taxpayer's ID information. If so, TaxSlayer FSA walks the taxpayer through entering the information.

Security Check

As a last step before e-filing the return, TaxSlayer FSA asks the taxpayer to submit a security check, as shown below:

The IRS requires us to verify you're a human, which helps keep your information and money safe and sound.

Enter the code shown above into the box below:

Payment

Taxpayers do not need to pay when preparing a return through TaxSlayer FSA. If TaxSlayer asks the client to pay, the taxpayer did not start from the appropriate TaxSlayer FSA URL. He or she will need to deactivate the return and start from the correct TaxSlayer FSA URL provided by your site. If the taxpayer needs to deactivate the return, direct the client to use the following steps:

1. Click **My Account** in the left navigation panel.

TaxSlayer FSA displays the **My Account** page:

5. Click **CLEAR YOUR RETURN AND RESTART**.
