</table>

**Top Recommend Actions**

- Transitioning to renewable energy
- Increase light rail options, routes, and frequency
- Develop policies that prevent the creation of waste
- Increase shade by planting more trees and structural shade
- Preserving and protecting local groundwater supplies from appropriation and contamination for future use
- Update zoning codes and ordinances to allow/encourage urban agriculture and food production
- Reduce the release of air pollutants from local industrial operations

**How important to you are the following community benefits provided by the implementation of climate solutions?**

- Improved air and water quality (77%)
- Leaving a world where future generations can thrive and succeed (76%)
- A more equitable community that addresses climate change for all people living in Phoenix (66%)
- Reduced reliance on fossil fuels (65%)
- Improved health of my family (61%)

**What do you think are the major barriers to addressing climate change?**

- Lack of government mandated regulations/support (82%)
- Difficulty in changing behavioral habits (70%)
- Lack of business or industry support (66%)
- Lack of public information and education (65%)
- Cost of implementation (53%)
