

October Monthly Update

Renovations are Underway!

Crews are working hard including Saturdays to improve the site and re-open as quickly as possible.

The Site is Closed:

The site is closed to the public during construction for your own safety. Please obey all warning signs and fenced areas. Please don't enter the closed site through construction gates (even when they are opened for construction traffic).

New Ramadas and Bathrooms are going up:

Concrete foundations for the Ramadas are being poured. Rough grading for the new expanded parking lot is complete. Steel posts for the Ramadas have been installed. Parking lot curbing installation is also complete.

New Utilities for Modern Restrooms:

Installation of new water and sewer lines for the proposed multiple flush toilets, and drinking fountains with water bottle filling stations, are almost done.

Plant Salvage:

Existing vegetation has been salvaged and will be replanted. The least amount of disturbance is our goal during construction.

Wildlife Access:

During work and sewer line installation, open gates in the fence are to allow wildlife to exit the site.
