

City of Phoenix Police Department Uniform Crime Reporting (UCR) Property Crimes Calendar Year 2016

Data is based on Uniform Crime Reporting criteria and can not be compared with any other report. UCR property crimes include burglary, theft, motor vehicle theft, and arson. Data is based on date of offense. Any reports with a missing offense date will be based on when the crime was reported.

Under the hierarchy rule of UCR, only the most severe offense of an incident is counted. Therefore, for example, burglary offenses are only counted where the burglary is the most severe offense committed in the incident.

UCR data excludes unfounded cases if the incident and the unfound occurred in the same month. However, if the incident and the unfound occurred in different months, then the removal of the unfounded cases will not be reflected in the data.

Any incidents with addresses or intersections that could not be geocoded are not included. The density layer was created using a search radius of .75 miles.

The Phoenix Police Department is not responsible for misinterpretation of this information and makes no inference or judgment as to the relative safety of any particular area or neighborhood.
