Uniform Crime Reporting (UCR) counts should not be compared with Arizona Revised Statute (ARS) numbers.

It is important to note that a variety of factors can affect crime counts in addition to actual changes in the level of crime. For example, changes in FBI definitions of crime categories, changes in sworn staffing numbers that affect officer on-view activity levels, changes in citizen reporting practices, changes in computer algorithms that are utilized to auto-categorize crimes, changes in record management systems (RMS), changes in proportions of reports manually reviewed vs. computer-reviewed, etc., can all affect crime counts. This is regardless of whether or not crime levels have actually changed. These types of outside factors should be kept in mind when comparing crime trends across years.

Note that some reporting entities choose to include arson in the UCR Part One Property Crime totals. If arson is included, then the total for 2021 UCR Part One Property Crime counts is 51,095.
