

## Neighborhood Notification: Bicycle Improvements on 31st Avenue from Cactus Road to Sweetwater Avenue

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

### About the Project

**Where:** 31st Avenue from Cactus Road to Sweetwater Avenue.

**What:** Where there is enough space on the roadway, bike lanes will be widened, and parking lanes will be added. The number of travel lanes will remain the same. This project creates separate parking and bike lanes.

**When:** Pavement maintenance (new asphalt) is scheduled for Fall 2022 and traffic lane improvements will happen shortly after.

**Why:** Bike lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the bike lanes will help to guide cars and deter speeding.

### What Will the Project Look Like?

#### Current Travel Lanes

#### Proposed Travel Lanes
