"This alternative is the best. I think because it leaves the smallest remnant parcel of land that someone will want to come along & develop commercially"

"This seems to be the most cost effective to build"

"Please NO because it is between wash and homes:

"Not preferred because of proximity of the road to future single family north of wash"

"Strongly opposed"

"Intersection would require signalization and removal of 1/8 mile of existing infrastructure. Stops the flow of traffic. Trailhead access not very good"

"Sonoran Desert Drive located south of the wash presents a better scenic corridor opportunity and better protects future single family development"

"First choice - if not a lot of extra \$"

"If there has to be a 6 lane SDD, then B would be better by extending Paloma Pky Dr down and SDD over to the east. That protects the integrity of the existing homes south of Bronco Butte"

"I like because it is below the wash"

"Too much removal of existing infrastructure. Trailhead access not very good"

"Too big a remnant parcel. Wastes the land or encourages commercial development"

"Roundabout would make the transition easier and eliminate the need for a signalized intersection"

"The round-about flows better for w/b & e/b traffic. In addition the round-about would help calm traffic speeds on the street, through the intersection. No signal lights required"

"This is the best alternative since it offers a continuous flow across the parkway. The other alternatives require a stop light causing maintenance, fuel waste, and time"

"Roundabouts too complicated with putting in trailhead access"

"NO! I don't like roundabouts. They are dangerous!"

"I think there will be many heavy trucks using this route to access I-17 and Loop 303. I don't want to have to deal with them on a roundabout"
