General Fund Operating Expenditures

Description

This indicator measures how closely total General Fund operating expenses track with the estimate. On a monthly basis, year-to-date (YTD) actual expenditures are compared to the YTD historical high over the last five years, allowing an additional 1.2% to account for variations in the timing of expenditures from year to year. The additional 1.2% is based on the smallest year-end actual to estimate variance within the last five years. The total year-end (12 months) actual expenses are compared to the full-year estimate.

General Fund City Sales Tax

Description

City Sales Tax is the single largest source of General Fund revenue, accounting for more than 40 percent of the total. This indicator measures how closely General Fund City Sales Tax revenue tracks with the estimate. Estimates are developed during the budget preparation process each fiscal year and may be adjusted during the fiscal year depending on actual collections and other economic considerations.

Goal

At or above -1.9% of the estimate

Measurement Thresholds for Dial

Green > -1.9% Yellow -2% to -4.5% Red < -4.5%

Comments

Monthly revenues are reported mid-month, therefore General Fund reporting will be one month behind. City sales tax can be somewhat volatile and is affected by monthly adjustments from year to year. Revenues are closely monitored and spending levels may be reduced to ensure expenses do not exceed revenue.

It appears that city sales tax receipts are being impacted by timing or other technical issues in processing returns by the State. Staff will continue to monitor the situation and inform the Mayor and Council of any needed adjustments in a timely manner.

Total General Fund Revenue

Description

An accurate revenue estimate is crucial to achieving a balanced budget. This indicator measures how closely Total General Fund revenue tracks with the estimate. On a monthly basis, year-to-date (YTD) actual revenue is compared to a three-year historical YTD average. The total year-end actual revenue is compared to the full-year estimate.

UCR Part I Crime Statistics

Description

The City is committed to reducing crime and enhancing community safety. This measure compares monthly Uniform Crime Reporting (UCR) Part I crime totals to the three-year average of Part I crimes reported for that month. Part I crime statistics represent the combined sum of UCR Violent Crime and UCR Property Crime totals.

Crime statistics reported by the Phoenix Police Department conform to the Federal Bureau of Investigation's (FBI) UCR guidelines. The UCR standard is the most widely used crime statistics source for examining trends in serious crimes reported to law enforcement. More information about the UCR Program can be found at www.fbi.gov.

Total Valuation of New Building Construction Permit Activity

Description

Valuation of new construction is used by many to assist with formulating economic forecasts. Many permit fees for new construction and additions are calculated based on the valuation of a project. The valuation used in computing building permit fees is the total value of all construction work for which a permit is issued. Minimum valuation is determined using the occupancy classification, type of construction and square footage of each building in a project. Project valuation includes the value of materials, labor, overhead, and profit, and is determined by the higher of the minimum project valuation as calculated according to the Building Valuation Table (based on the International Building Code), or the project valuation as provided by the applicant. Some permits do not have a valuation such as fire, water and civil permits. These permits are included in the "Number of Permits Issued" indicator, but they are not reflected in this measure.

Annual Solar Energy Production

Description

The City is committed to securing environmental and economic livability for future generations in the region, with an emphasis on solar energy production. This indicator measures solar energy produced at City facilities on a monthly basis.

Goal

11,281,187 kWh

Comments

The City had two large PV systems come on line at the beginning of January. The addition of the Adams Street Garage (695.9 kw) and 305 Parking Garage (486.6 kw) brings the total City PV capacity to 15.2 MW (15,279.8 kw). The kWh decreases every year during and surrounding the winter months because the intensity of the sun decreases during that period of the year. The production data is estimated using PV Watts calculator, a web-based application developed by the US Dept. of Energy - National Renewable Energy Lab. (<http://rredc.nrel.gov/solar/calculators/PVWATTS/version1/US>). A 15 MW solar array system, located adjacent to the SR85 landfill, was

Solid Waste Recycling & Diversion

Description

The City seeks to capture and divert as much trash as possible from the landfill to better preserve natural resources. This measure tracks the percentage of residential and light commercial waste tonnage that is diverted from the City's landfill.
