

### Do you live in a home

built before 1978 in one of our target zip codes?

Does a child under 6 years old or a pregnant woman live in the home, or do you care for a child under 6 years old in the home?

Do you meet federal income limits?

### The home is tested

for lead-based paint hazards and a lead inspection report is created.

The homeowner is notified if lead is found.

If no lead is found, the case is closed.

### Licensed, insured lead

contractors bid on the project.

Homeowner signs an agreement with the City and a contract with the selected lead contractor.

If needed, relocation plans are discussed.

### Contractor performs

lead work. Home is retested to confirm lead hazards are cleared.

Previously identified health and safety issues are addressed. Rehab specialist and homeowner verify work is complete.

### Complete and submit

ALL needed application materials including proof of income for household members 18 years and older, and submit photo identification.

### If lead is found, a

blood sample is collected from children under 6 years old, and nurse shares health information with adults.

A consultant or rehab specialist visits the home and discusses health and safety issues.

A plan is created to address lead hazards and minor safety issues.

### Homeowner, rehab

specialist and contractor set a date for lead project to begin. The homeowner is advised to move personal property out of the work area.

If needed, relocation is arranged by program staff.

### Homeowner receives

a report showing identified lead hazards have been addressed.

Nurse schedules a follow-up blood test.

Homeowner is responsible for maintaining a **Lead Safe** home.
