

The city of Phoenix supports early meter sets for construction power to eliminate the use of gas generators and compressors. This program is for new single family residence construction only. There are no additional fees associated with this program.

The city requirements for use of this program are as follows:

- The panel must be installed as early as possible in the construction process in order to provide the most benefit.
- Inspection of the installation must be in conjunction with a required inspection. No additional inspections should be created by the use of this program.
- A lock-out/tag-out procedure must be in place and its use indicated with the appropriate panel labeling. A list of personnel trained in the procedure shall be maintained on site. The panel must be opened and de-energized for final inspection.
- No occupancy is permitted prior to final inspection and the issuance of a certificate of occupancy.
- The use of this program is a privilege granted to the customer. The city reserves the right to restrict the use of the program if it is abused or if its use affects the safety of the workers.
