

This document will serve as the process for Planning & Development (PDD) Inspections for new street light construction.

Purpose

PDD will begin inspecting the installation of new street lighting along public rights-of-way.

Development Process

Plan Submittal and Review

Plans need to be approved by PDD and the City of Phoenix, Streets Transportation Department, Utility Coordination Group prior to obtaining the STL and CUT permits. For more information, see [Street Lighting Plan Review and Submittal](#), TRT 00901A

Required Inspections

1. CUT Inspections
  - a. Contact the civil inspector to schedule the required pre-construction meeting.
  - b. Inspections will be needed to verify clearances from structures, utilities crossings, proper back fill material, compaction, and pavement and/or concrete replacement in the rights of way.
2. STL Inspections
  - a. Contact the electrical inspector to schedule the required pre-construction meeting.
  - b. Underground inspection, request inspection code number 315.
  - c. Final inspection, request inspection code number 399.

Utility Clearance

The PDD Electrical Inspector will issue a utility clearance and the CET will issue a letter of authorization.
