

Neighborhood Notification: Bicycle Improvements on 32nd Street from Baseline Road to Highline Canal

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: 32nd Street from Baseline Road to Highline Canal.

What: Where there is enough space on the roadway, buffers will be added to existing bike lanes. The number of travel lanes will remain the same, but the traffic lanes will be narrowed. This project does not remove or add parking.

When: Pavement maintenance (new asphalt) is scheduled for fall 2021 and traffic lane improvements will happen shortly after.

Why: Buffered bike lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffers will help to guide cars and deter speeding.

What Will the Project Look Like?
