

Neighborhood Notification: Bicycle Improvements on 95th Avenue from Minnezona Avenue to Camelback Road

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. We are updating the current traffic lane striping for to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: 95th Avenue from Minnezona Avenue to Camelback Road.

What: Where there is enough space on the roadway, buffered bicycle lanes will be added. The number of travel lanes will remain the same.

When: Traffic lane improvements are planned for Winter 2023.

Why: Buffered bicycle lanes add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the buffers will help to guide cars and deter speeding.

What Will the Project Look Like?
