

STREET TRANSPORTATION DEPARTMENT

PROJECT UPDATE – MARCH 2022

Fillmore Street (Central Avenue to 7th Street) Proposed Bike Lanes

The City of Phoenix Street Transportation Department thanks community members for their consideration of a proposal to add bike lanes to Fillmore Street from Central Avenue to 7th Street.

Department staff used engineering judgment and stakeholder feedback gathered during public engagement to select the final design from three options. Design options were presented during a December 14, 2021 virtual public meeting. A community survey was available from December 14, 2021 to January 16, 2022.

DECISION

- Central Avenue to 1st Street: Three options were presented, and option B was selected – adding protected bike lanes and removing parking. Comments were received from community members who suggested different options for this section, such as adding more bike lane protection along the north side of Fillmore Street. The department is reviewing whether additional protection could be integrated into the final design for the north side of the street.
- 1st Street to 7th Street: Two options were presented, and option B was selected – adding protected bike lanes.

WHAT'S NEXT

- An updated design cross section for Central Avenue to 1st Street will be shared with the community soon, along with the project schedule.
- The timeline for project completion is spring/summer 2022.
